

Product information

WP 120

Code No. : **T0052919399**

Fast Response Heating Technology

Soldering iron WP 120, 120 W, 24 V with soldering tip XT B

Allrounder with 120 watts. For soldering applications from small to large components with high temperature demand.

Technical data

| | |
|---------------------------|---|
| Voltage (heater): | 24 V |
| Heating output: | 120 W |
| Heat-up time: | ca. 14 sec. 50°C - 350°C (120°F - 660°F) |
| Temperature range: | 50°C - 450°C (120°F - 840°F) |
| Tip type: | XT series, XT soldering head series |
| Connectable to: | all power units from 120 W WD 1M, WD2M, WR3M |

Fast Response Heating Technology

- Beneficial soldering tip prices
- Max. heating transfer
- Soldering tip in optimized sensor position
- Fast reaction time

Due to an optimized sensor position a high performance is given. With a wide range of beneficial soldering tips these tools are an alternative to the micro soldering irons.
