Pliers; side, for cutting, precision; 135mm

Hot drop forged high alloy steel for maximum strength. Precision box joint construction for smooth and ac life. Induction hardened blades for extended cutting life. Mirror polished surface removes the risk of dama double leaf springs remove the need for adjustment or replacement. PCV handles for comfort and grip

SPECIFICATION

Manufacturer	CARL KAMMERLING	<input type="checkbox"/>
Type of tool	pliers	<input checked="" type="checkbox"/>
Kind of pliers	side, for cutting, precision	<input type="checkbox"/>
Weight	101g	<input type="checkbox"/>
Pliers/knives application	designed for precise works in electronics and electrical engineering	
Pliers length	135mm	<input type="checkbox"/>

Oblique pliers/knives features:

- high durability and cutting convenience
- oval head
- a jaw joint design minimizes friction and enables to position jaws very precisely
- handles fitted with ergonomic, anti-slip, black plastic sleeves
- return spring
- cutting jaws with sharp tips, especially suitable in hard to reach places

Cutting range:

- copper wire 2mm thick
- soft steel wire with diameter 1,5mm
- hard steel wire of up to 0,7mm of diameter

Additional information

- Gross weight: 0.12 kg
