

# Dino-Lite AM4115ZTL

The wide range of magnification (10-140x), the large field of view and working distance of up to 23 cm makes the AM4115ZTL the ideal solution for all situations where a longer distance between the microscope and the object is required or when it is needed to work under the microscope (repair, rework and assembly tasks etc.) The built-in adjustable polarizer reduces glare and reflection on shiny objects.
