- Extremely slim ratchet with long lever
- Very robust without any restrictions on torque
- Return angle of only 4.7°
- Absolutely smooth switchover of the non-detachable push-through square
- Secure socket locking

Zyklop Metal ratchet with push-through square. Slim design for work in even very confined spaces. The dual ratchet teeth design makes a 76 fine-pitched toothing out of 38 robust teeth that allows a return angle of only 4.7°. Very simple direction change by actuating the non-detachable push-through square; for the first time also with secure socket locking function. Forged, full metal ratchet (chrome-molybdenum steel) for particularly high robustness and long service life.
