BICYCLE

- L-key set for hexagonal socket screws and TORX® screws
- L-keys with Hex-Plus advantage for a longer screw life
- L-keys are quickly to hand thanks to their size markings
- Wear-resistant size marking
- In a practical, lightweight folding pouch for easy carrying

L-keys made from circular material with plastic sleeve for use on bicycles. The plastic sleeve makes working comfortable even at low temperatures and is easy on the fingers. All L-keys are easily accessible due to their colour coding and size markings. For hexagonal socket screws and TORX® screws. In a robust and lightweight folding pouch.

## Bicycle Set 4, 9 pieces

### L-Keys for Hexagon Socket Screws

#### Set contents:

#### 950 SPKL Multicolour

05022602001 1 x 2 x 101 mm  
05022604001 1 x 2.5 x 112 mm

#### 950 SPKL HF Multicolour

05022200001 1 x 3 x 123 mm  
05022201001 1 x 4 x 137 mm  
05022202001 1 x 5 x 154 mm  
05022203001 1 x 6 x 172 mm  
05022204001 1 x 8 x 195 mm

#### 967 SXL TORX® HF Multicolour

05024473001 1 x TX 10 x 112 mm  
05024476001 1 x TX 25 x 154 mm

#### Bicycle tool set

For the road and the workshop

Compact screwdriving tool set for bicycle applications, also for mobile use.

#### SPKL L-keys

L-keys made from circular material with plastic sleeve for use on bicycles. The plastic sleeve makes working comfortable even at low temperatures and is easy on the fingers. All L-keys are easily accessible due to their colour coding and size markings. For hexagon and TORX® screws.

#### Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

## L-Keys for Hexagon Socket Screws

### L-keys with retaining function for hexagon socket screws

The clamping of the screw is achieved by a flexible locking ball. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw on the tool.

### Holding function for recessed TORX® screws

The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that TORX® screws made according to Acument Intellectual Properties specifications are securely held on the tool!

### Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

### Take it easy tool finder system

Take it easy tool finder system - with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklop bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklop sockets and Zyklop bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklop bit sockets).
