

**367 TORX® HF Screwdriver with holding function for TORX® screws, TX 25 x 300 mm**  
**Kraftform Plus – Series 300**

<b>EAN:</b>	4013288138408	<b>Size:</b>	405x37x37 mm
<b>Part number:</b>	05028071001	<b>Weight:</b>	129 g
<b>Article number:</b>	367 TORX® HF	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82054000

- Screwdriver for recessed TORX® screws
- Holding function for TORX® screws
- Multi-component Kraftform handle for fast and ergonomic screwdriving
- Handle markings simplify finding and sorting of tools
- Extra-long blade for low-lying working situations.

High quality Kraftform Plus screwdriver by Wera. Comes with an extra-long blade for low-lying, difficult-to-access working situations. Multi-component Kraftform handle for fast and low-fatigue working. Kraftform Plus: hard gripping zones for high working speeds whereas soft zones ensure high torque transfer. Holding function: the wedging forces resulting from the contact pressure between the drive tip and the screw profile securely hold the screw on the tool. The hexagonal anti-roll feature prevents any bothersome rolling away at the workplace. Handle markings for simplified finding and sorting of the tool.

# 367 TORX® HF Screwdriver with holding function for TORX® screws, TX 25 x 300

mm

Kraftform Plus – Series 300

## TORX® HF profile

Kraftform Plus screwdrivers – ergonomics you can grasp. They relieve the entire hand-arm system even when used intensively. Along with other technical and product advantages such as the Lasertip for a secure fit in the screw head, Kraftform screwdrivers are the ideal choice whenever manual screwdriving jobs are concerned.

In tight assembly or disassembly situations, for example in engine compartments, it is not possible to securely hold the screw with the hand on the screwdriver, and the screw subsequently often gets lost. Lengthy searches or the loss of the screw (with the associated danger that could bring about) are the consequence. The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that the screw is securely held on the tool!

## Kraftform

The basic idea for the prototype of the Kraftform handle – that the hand should dictate the design – has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

## Rapid hand repositioning

The hard materials used for the handle ensure rapid hand repositioning without any danger of the skin "sticking" to the handle. The surrounding hard zones with large diameters glide like wheels across the hand.

## Large contact area

The large contact area – with particularly high friction to the soft zones – results in high torque transfer without any bruising from the edges.

## Non-roll feature

The hexagonal non-roll feature prevents any rolling away at the workplace.

## Identification marking

The screw symbol and tip size identification markings on the handle make it easier to find the right screwdriver in the tool case, or at the workplace.
