

## 840/1 IMP DC Impaktor bits, 3 x 25 mm

### Bits for Hexagon Socket Screws

<b>EAN:</b>	4013288178701	<b>Size:</b>	25x7x7 mm
<b>Part number:</b>	05057603001	<b>Weight:</b>	3 g
<b>Article number:</b>	840/1 IMP DC	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82079030

- For socket head screws
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- Take it easy tool finder: colour coding according to profile and size

High quality Impaktor bits for hexagon socket screws. The Impaktor technology offers an above-average service life even under extreme circumstances. Enhanced friction resistance, thanks to the rough diamond-particle coating on the bit tip, prevents any slipping out of the screw head. Hex-Plus ensures a greater contact surface in the head of the screw. The notching effect is therefore reduced to a minimum and damage to the screw head more or less eliminated. 1/4" hexagon, suitable for holders as per DIN ISO 1173-D 6.3.

Bits for Hexagon Socket Screws

Impaktor-Bits

Impaktor technology for an above-average service life even under extreme demands

For an above-average service life. Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects – particularly high in power tool applications – which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

Above-average service life

Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

**Reduced danger of bit breakage.**

Particularly high strength. Reduce the danger of premature bit breakage.

**Torsion zone**

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

**Hex-Plus**

Hexagon socket screws are a problem, because the contact surfaces that transfer the force of the tool to the screw are very narrow. The consequence: the head of the screw can be damaged, usually rounding out the recess. Hex-Plus tools have larger contact surfaces to prevent this, driving from the flats of the recess, rather than the corners. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

**"Take it easy" tool finder**

"Take it easy" tool finder with colour coding according to profiles and size stamp – for simple and rapid accessing of the required tool

**Further versions in this product family:**

	 mm	 mm	 inch
<b>05057603001</b>	<b>3.0</b>	<b>25</b>	<b>1</b>
05057604001	4.0	25	1
05057605001	5.0	25	1
05057606001	6.0	25	1
