

# PTC 70

Article No.: 0710CD

Temperature controlled universal soldering iron

The Ersa PTC 70 is a powerful, sturdy, temperature controlled universal soldering iron. The proven Ersa RESISTRONIC temperature control together with the ceramic PTC heating element provides unusually fast heat-up and heat recovery. Due to the accurate temperature control and the wide range of ERSADUR long-life tips of the 832 and 842 series, the PTC 70 is a perfect tool for both very small solder joints as well as for applications with medium heat requirements. The PTC 70 is supplied with the soldering tip 0832CDLF.

Included in delivery: Ersa PTC 70 soldering iron with ERSADUR long-life soldering tip 832CDLF and tool holder A 18

## Technical Data

Power Rating in W	75 W / 350°C
Vers.Sp. (V)	230 V
Temperature range in °C	250 – 450°C
Heat up time in sec	ca. 34 s to 280°C
Coating	ERSADUR
Weight in kg	0,060

## Accessories

### Fitting soldering tips

- Soldering Tip Series 832
- Soldering Tip Series 842
