The IoT Hardware Enabler

The Grove Beginner Kit for Arduino is one of the best kits for beginners to get started with Arduino. No troublesome soldering and no complicated wiring so you can focus on learning. This kit includes a main control board Seeduino Lotus and 8 Grove modules, which covering sensor, actuator and display. All you need to do is follow the demo, plug the module into the Seeduino Lotus. Truly plug and play.

On top of that, you will be provided with detailed instructions on the use of Arduino and the use of each module, which including 8 lessons for module and 2 Arduino projects.

All in all, whether you are a student, teacher, artist, hardware enthusiast, and so on, with the help of the Grove Beginner Kit for Arduino, you will get to know Arduino quickly and comprehensively.

Part List

- Seeeduino Lotus v1.1
- Grove - Tilt Switch
- Grove - Buzzer
- Grove - Temperature & Humidity Sensor (DHT11)
- Grove - 3-Axis Digital Accelerometer
- Grove - Light Sensor
- Grove - Line Finder
- Grove – Chainable RGB LED
- Grove - 16 x 2 LCD (White on Blue)
