

Heat Sink Kit for Raspberry Pi - Copper/Aluminum SKU 110070016

This is a heat sink kit including one Copper heat sink and two Aluminum heat sinks to cool the chips on the Raspberry Pi.

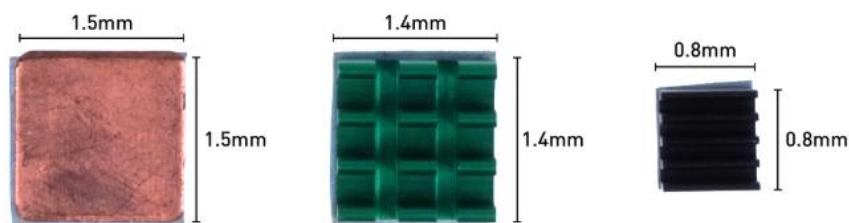

Features

- Easy to Install
- Better Heat Dissipation
- Copper Heat Sink for the Main Chip for Efficient Heat Removal

Description

This is a heat sink kit including one Copper heat sink and two Aluminum heat sinks to cool down the chips on the Raspberry Pi. It has been attached with thermal conductive adhesive tape, allowing the Raspberry Pi to cool down more efficiently. Also, these heat sinks have better heat dissipation. The installation is simple. What you need to do is to remove the heatsink protection and stick it on the Raspberry Pi. This kit is compatible with Raspberry Pi 3B/B+.

Dimensions

Parts List

- 1 x Copper Heat Sink
- 2 x Aluminium Heat Sink
