 PATENTED

Wire cutter for multiple stranded wire cables up to 10 mm²

Steel clamping jaws avoid skidding of the cable

Patented mechanics

The incision depth of the stripping blade adjusts fully automatically to the diameter of the wire and accordingly also to the thickness of all standard insulating materials. There is no need for any manual adjustment which is still necessary when other conventional pliers with a wide wire-stripping range are used.

Precise stripping from 0.03 to 10 mm² without re-adjustment

Mode of operation of straight cutters

An incision is made in the red area only.

Not suitable for highly-flexible or armoured insulation materials or for multi-layered insulation.
