

USB Power Only Cable with Switch for charging your Raspberry Pi – either Model B, A+, B+, or Pi 2. Just hook up the standard USB end to a 5V 1A USB port power supply or 5V 2A USB port power supply and the Micro B end to a Raspberry Pi and you have a Pi with a switch.

This cable will also work with anything that has a MicroUSB port. This cable does not transfer data – so it's mostly just good for powering and charging devices – but adding an on/off switch to your power supply is a nice addition.

- Cable Length: 5 feet / 1.5m
- 22 AWG wire
- Switch is 43mm x 15mm x 12mm
