Wiha TORX® MagicSpring®.

Holds TORX® and TORX PLUS® screws securely in place.

Wiha MagicSpring®:
a stainless steel spring securely holds TORX® and TORX PLUS® screws.

No more annoying and time-consuming hunting around for TORX® or TORX PLUS® screws that have apparently vanished into thin air. With Wiha's ingenious new tool, the MagicSpring®, TORX® or TORX PLUS® screws* are kept firmly where you want them. The highlight of the "MagicSpring®" tools is the stainless steel "magical" retaining spring that, together with a thin cover disc, is laser-welded to the tip of the blade.

This completely new innovation acts as a clamp between tool and TORX® or TORX PLUS® screw, so that the latter is firmly gripped by the tip of the blade. The new tools are especially beneficial when turning particularly small screws or when turning screws in areas that are difficult to access. Simply place the screw on the tip of the blade and start to turn. No more screws will fall to the ground or disappear between components.

Insertion and removal of TORX® and TORX PLUS® screws is safe and comfortable thanks to MagicSpring® from Wiha.

** TORX® and TORX PLUS® screws manufactured according to Camcar Textron specifications.*

As the clamping action is purely mechanical, MagicSpring® also gets a firm grip on TORX® or TORX PLUS® screws made of aluminium, stainless steel, plastic and titanium.

The retaining spring is a completely new technical solution that, together with a thin cover disc, is laser-welded to the tip of the blade.

Wiha TORX® MagicSpring®.

- MagicSpring® retaining spring made of stainless steel gets a firm hold on every TORX® or TORX PLUS® screw
- No more annoying searching for dropped screws
- Ideal for areas that are difficult to access
- Made of high-quality materials in the renowned Wiha quality
- Also suitable for TORX® or TORX PLUS® screws made of aluminium, stainless steel, plastic and titanium

For TORX® screws.

366R **TORX® MagicSpring® L-key, long.**
Retaining spring holds TORX® screws in place.

Blade: Chrome-vanadium steel, through-hardened, black finish.
Application: For setting and tightening TORX® screws in difficult to access areas.
