Article No.: 33738

GTIN: 4010995337384

Unit: Set

The Stubby magazine bit holder contains bits in its handle. If you remove the cap on the end of the SoftFinish® multi-component handle, six 25 mm bits appear, designed for all standard screw fastenings. The magazine bit holder is thus flexible in its use and an attractive alternative to screwdriver sets, especially for portable use. The magnetic holding feature in the integrated bit holder ensures easy handling and an optimum grip. The practical, compact size sets the Stubby bit magazine apart as a specialized tool for working in highly confined spaces. Suitable for: DIN 3126, ISO 1173, style D 6.3.

Application: Eminently suitable for working in confined, hard-to-reach spaces.
