Wiha TORX® titanium silver.

- Designed for ideal corrosion protection
- No more annoying oil or wax on the L-keys
- Especially long service life
- Ensures an accurate perfect fit in the screw

The new titanium silver surface for TORX® L-keys is a special process of surface refinement. This surface is ideally suited for all applications indoors and outdoors and fulfils maximum quality requirements. Titanium silver provides significantly more corrosion protection compared to the conventional, oiled, black TORX® L-keys. This makes oily fingers or re-oiling of the L-keys to maintain the corrosion protection a thing of the past. The new functional coating guarantees TORX® L-keys fit in the screw accurately, in contrast to conventional chrome coating.

NEW

366 SZ13 TS TORX® L-key set in ProStar holder. Titanium silver, 13-pcs.

Blade: Chrome-vanadium steel, through-hardened, titanium silver.
Application: For all TORX® screw applications.
Extra: Space saving ProStar allows the easy removal of each key without moving any others.
All keys from T5 to T45 in one set.
