Application: Huge assortment of insulated tools, compiled for work on electrical vehicles.

Working on automobiles with an electric drive requires special qualifications of the employees as well as safe, certified equipment. With the Tool case set XL eMobility, the user always has the right tool for the assembly and repair of hybrid and electric vehicles at hand. The tool case is compactly accommodated and thanks to a convincing selection of high-quality, insulated hand tools, the right tool is always available for every application. The majority of the tools offer safety when working on live parts thanks to the VDE-certified insulation. The tool inserts of the case have been designed with an eye to efficient operation so that all tools can be removed quickly and easily. The contents of the case can be secured against theft with padlocks on the integrated eyelets (these are not included in the scope of delivery). Additional storage space is provided by free lugs and extra space in the bottom tray of the case. In addition, the ergonomic two-component handle guarantees a comfortable carrying experience. The case is made of robust polypropylene and is equipped with gas pressure shock absorbers which hold the lid in various positions, prevent uncontrolled closing of the lid and thus prevent injuries to the user. From voltage testers to torque wrenches, from protective gloves to warning signs: with the fully equipped tool case, you always have the right Wiha tool at hand.

Work on electric vehicles may only be carried out by qualified and authorised specialist personnel.
