# Radeon Pro W5700X MPX Module

 apple.com/shop/product/MW662AM/A/radeon-pro-w5700x-mpx-module

- **Overview**

  Upgrade or expand the graphics in your Mac Pro with the AMD Radeon Pro W5700X MPX Module. With up to 9.4 teraflops of compute performance, 16GB of memory, and 448GB/s of memory bandwidth, the Radeon Pro W5700X graphics processor can deliver incredible performance. And Mac Pro can support up to two MPX Modules.

  This full-size MPX Module is based on AMD's new RDNA GPU architecture, and it features four Thunderbolt 3 ports and an HDMI 2.0 port. It supports up to six 4K displays, three 5K displays, or three Pro Display XDRs.
