Amphenol-Tuchel Electronics GmbH

## Series C 16-3<sup>®</sup> Circular Connectors

## The Company

Amphenol-Tuchel Electronics GmbH is a member of the USA based Amphenol Corporation. With our own global presence we offer our customers exceptional technical support and worldwide service in the areas of development, production and distribution. Amphenol-Tuchel Electronics GmbH has a successful history as a partner to our customers and sets standards for connector technology.

## Quality

From the beginning of the development process, Amphenol-Tuchel Electronics GmbH gives quality considerations the top priority. Meeting customer requirements is

the main focus of the product development process.

Interdisciplinary project teams with diverse backgrounds from marketing, product engineering and production guarantee the development and production of robust and reliable connector solutions.

Our quality assessment begins with the initial contact to the customer and extends through the life of the product. A satisfied customer is the measure of our success.

We strive to use environmentally friendly processes that minimize the waste of natural resources and introduction of toxins into the environment.

Certifications:      TS 16949  
                              ISO 14001  
                              ISO 9000:2000

## General information

We reserve the right to change the design due to improvement in quality, development or production requirements.

This catalogue must not be used in any form or manner without our prior approval in writing (Copyright Law, Fair Trading Law, Civil Code).

This release replaces all former releases.

## Product description

The circular connector series C 16-3 has two housing sizes. The connectors are designed to meet the high requirements of industrial applications under harsh environmental conditions. The range includes versions with screw and crimp terminations. A selection of crimp contacts for hand crimp tools and crimp machines enables a reliable termination relating in qualitative, technical and economical advantages. A board selection of housing styles are available.

On choosing the housing style and shell size please take both the cable diameter and wire gauge into consideration. If necessary one should use the long housing versions.

## Main features and advantages:

- Circular connectors for power and signal applications with following contact arrangements:  
Shell size 1: 8 + PE, 14 + PE, 17 + PE, 12 + 3 + PE  
Shell size 2: 5 + PE, 12 + PE, 14 + PE, 19 + PE
- For applications in machine tools, measurement and control, process technology and medical equipment
- Housing are made from high grade plastic material.
- Vibration safe connection by solid bayonet coupling with lock in position.
- Cable housing straight or right-angled with various cable outlets
- Protection degree IP 65 in mated position.
- Internal cable clamp or clamping ring provides a safe cable restrain.

## C 16-3

Product description  
Order information  
Approvals

### Order information

#### Colour coding

Upon request the coupling ring of the plugs and the housing of the receptacles can be delivered in the colour red, green, blue, yellow and grey.

#### Polarization

Depending on the contact arrangements the polarization of this connector series can be varied. The contact inserts can be mounted in alternate positions. The order number in the catalogue refers always to position 1. The position of the contact inserts can also be changed by the customer using a disassembly tool ( see page 14 and 17) to remove the insert and remount it in the required position ( see page 6)

#### Crimp version

Order numbers do not include crimp contacts. Please order separately (page 21 / 22)

#### Crimp tooling

Ask for our catalogue "Tools".

### Testhouse

### Approvals

### Approval No.

VDE

3964

UL <sup>1)</sup>

E 63093

CSA

49932-9

In general approvals refer to representative versions of the connector series. Test report upon request.

<sup>1)</sup> Please refer to the „Conditions of Acceptability“.

# C 16-3

## Coding system

### Polarization

Depending on the contact arrangements the polarization of this connector series can be varied. Please take care of the housing and contact insert characteristics.

Disassembly tool for pin-and socket inserts		FH 0002-016	

# C 16-3 EMV

## Product description

The C 16-3 EMI connectors excel by versatile fields of application, especially high mechanical requirements, industrial environments and demands for safe contact.

### Main features:

- high attenuation of shielding
- contact inserts suitable for standard and EMI versions
- completely compatible with standard C 16-3, size 1
- same technical characteristics as standard C 16-3, see page 7
- mechanical lifetime: 100 mating cycles
- we recommend the usage of the versions with two-part metal housing in very harsh environmental conditions

### Two versions available:

1. Version with metalized plastic housing accord. VDE 0610.  
PE wire is connected to cable shield and housing. In case of error the current will be lead directly to the PE wire
2. Combined version with metalized plastic and two-part metal housing accord. VDE 0113. PE wire is securely and firmly connected with the metal housing.

### Crimp version

Order numbers do not include crimp contacts. Please order separately (see page 21/22).

Crimp contact for higher currents are available upon request.

### Crimp tooling

Ask for our catalogue "Tools".

Single contact in plastic bag; stamped contact on reel – HN = feeding right side / TN = feeding left side

## Part No. system for crimp contacts

**VN   01   016   0001   (1)**  
**1)   2)   3)   4)   5)**

- 1) supplied as:      VN = single contact 100 pcs.  
  
                            ZN = contacts on reel 100 resp. 200 pcs.  
  
                            HN = contacts on reel with 2000 contacts (contact feeding right hand side)  
  
                            TN = contacts on reel with 2000 contacts (contact feeding left hand side)
- 2) Type of contact:    01 = male contact  
                            02 = female contact
- 3) Contact Ø: e.g.     016 = 1,6 mm
- 4) Connection and wire gauge, e.g. 0052: 0,09 - 0,25 mm<sup>2</sup>  
  0046: 0,35 - 0,5 mm<sup>2</sup>  
  0047: 0,75 - 1,0 mm<sup>2</sup>
- 5) Plating:            (1) = silver plated  
                            (2) = gold plated  
                            (4) = gold plated for high performance

**Termination methods**

• **Screw connection**

Screw clamps are designed acc. to EN 60999-1 / VDE 609-1.

Chart 1 below shows the screw size depending on wire size and the required clamping and testing torque..

**Chart 1**

Wire size (mm <sup>2</sup> )	max. 4
Screw size	M 3
Test torque (Ncm)	50

Diagram 1 below shows the range of tensile strength for a screw connection with a clamp screw M3, fastened with a torque of 50 Ncm, depending on the wire size.

**Diagram 1**

This comparison chart allows a cross reference between American Wire Gauge (AWG) and metric wire sizes (mm<sup>2</sup>).

**Chart 2**

AWG	Wire composition	Wire diameter	Wire size
30	1 x 0,25	0,25 mm	0,05 mm <sup>2</sup>
	7 x 0,10	0,36 mm	0,06 mm <sup>2</sup>
28	1 x 0,32	0,32 mm	0,08 mm <sup>2</sup>
	7 x 0,13	0,38 mm	0,09 mm <sup>2</sup>
26	1 x 0,40	0,40 mm	0,13 mm <sup>2</sup>
	7 x 0,16	0,48 mm	0,14 mm <sup>2</sup>
	19 x 0,10	0,51 mm	0,15 mm <sup>2</sup>
24	1 x 0,51	0,51 mm	0,21 mm <sup>2</sup>
	7 x 0,20	0,61 mm	0,23 mm <sup>2</sup>
	19 x 0,13	0,64 mm	0,24 mm <sup>2</sup>
22	1 x 0,64	0,64 mm	0,33 mm <sup>2</sup>
	7 x 0,25	0,76 mm	0,36 mm <sup>2</sup>
	19 x 0,16	0,81 mm	0,38 mm <sup>2</sup>
20	1 x 0,81	0,81 mm	0,52 mm <sup>2</sup>
	7 x 0,32	0,97 mm	0,56 mm <sup>2</sup>
	19 x 0,20	1,02 mm	0,62 mm <sup>2</sup>
18	1 x 1,02	1,02 mm	0,79 mm <sup>2</sup>
	19 x 0,25	1,27 mm	0,96 mm <sup>2</sup>
16	19 x 0,29	1,44 mm	1,23 mm <sup>2</sup>
14	19 x 0,36	1,80 mm	1,95 mm <sup>2</sup>
12	19 x 0,46	2,29 mm	3,09 mm <sup>2</sup>
10	37 x 0,40	3,10 mm	4,60 mm <sup>2</sup>
8	133 x 0,29	4,0 mm	8,80 mm <sup>2</sup>
6	133 x 0,36	5,5 mm	13,5 mm <sup>2</sup>

It has to be noted that wires of the same AWG number but with different composition have slightly different mm<sup>2</sup>.

**Chart 3**

Composition and Dimensions of Copper Wires

Wire Size	Wire Composition	Wire diameter
0,09 mm <sup>2</sup>	12 x 0,10	0,48 mm
0,14 mm <sup>2</sup>	18 x 0,10	0,50 mm
0,25 mm <sup>2</sup>	14 x 0,15	0,70 mm
0,34 mm <sup>2</sup>	7 x 0,25	0,78 mm
0,5 mm <sup>2</sup>	16 x 0,20	1,0 mm
0,75 mm <sup>2</sup>	24 x 0,20	1,2 mm
1,0 mm <sup>2</sup>	32 x 0,20	1,4 mm
1,5 mm <sup>2</sup>	30 x 0,25	1,6 mm
2,5 mm <sup>2</sup>	35 x 0,30	2,2 mm
4,0 mm <sup>2</sup>	56 x 0,30	2,8 mm
6,0 mm <sup>2</sup>	19 x 0,64	3,4 mm
10 mm <sup>2</sup>	19 x 0,80	4,3 mm

• **Crimp connection**

A crimp connection is a non-detachable electrical connection between a wire and a crimp contact produced with the crimp technology. Precise crimping dies which are matched to the crimp barrel and the wire size and a defined deformation result in a reliable electrical connection.

There are open crimp barrels (stamped contacts) and closed crimp barrels (turned contacts).

The main advantages of crimp connections are:

- Efficient termination of contacts.
- Reproducible termination achieve consistent electrical and mechanical results

The requirements for crimp connections are defined in DIN EN 60352-2, IEC 60352-2.

An important point of the quality of a crimp connection is the achieved tensile strength of the termination.

Easily measured, the tensile strength is a practicable means for quality control purposes.

Diagram 2 below shows the required minimum tensile strength for open and closed barrels depending on the wire size.

**Assembly instructions**

For crimp contacts use the released crimp tool.

The insertion and extraction of crimp contacts shall only be approved with the corresponding insertion / extraction tool.

**A detailed description of the crimp technology can be found in our crimp tooling catalogues.**

Crimp contacts are in this catalogues on page 21 and 22.

Diagram 2

**Degree of protection**

Electrical devices to which connectors belong to have to be protected for safety reasons from outside influences like dust, foreign objects, direct contact, moisture and water. This protection is provided on industrial connectors by its housings with their latching devices and sealed cable entries. The degree of protection can be selected depending on the type of intended use. The standard IEC 60529 and/or DIN EN 60529 has specified the degree of protection and divided into several classes.

The degree of protection is indicated in the following way:

The following charts 4 and 5 give an overview about all protection degrees.

**Chart 4**

1st charact. numeral	Brief description	Definition
0	Non-protected	–
1	Protected against access to hazardous parts with the back of a hand. Protected against solid foreign objects of $\geq 50\text{mm } \varnothing$ .	The probe, sphere of $50\text{mm } \varnothing$ , shall not fully penetrate and shall have adequate clearance from hazardous parts.
2	Protected against access to hazardous parts with a finger. Protected against solid foreign objects of $\geq 12,5\text{mm } \varnothing$ .	The jointed test finger of $12\text{mm } \varnothing$ , $80\text{mm}$ length, shall have adequate clearance from hazardous parts. The probe, sphere of $12,5\text{mm } \varnothing$ , shall not fully penetrate.
3	Protected against access to hazardous parts with a tool. Protected against solid foreign objects of $\geq 2,5\text{mm } \varnothing$ .	The probe of $2,5\text{mm } \varnothing$ shall not penetrate at all.
4	Protected against access to hazardous parts with a wire. Protected against solid foreign objects of $\geq 1\text{mm } \varnothing$ .	The probe of $1\text{mm } \varnothing$ shall not penetrate at all.
5	Protected against access to hazardous parts with a wire. Dust-protected.	The probe of $1\text{mm } \varnothing$ shall not penetrate. Intrusion of dust is not totally prevented, but dust shall not penetrate in a quantity to interfere with satisfactory operation of the device or to impair safety.
6	Protected against access to hazardous parts with a wire. Dust-tight.	The probe of $1\text{mm } \varnothing$ shall not penetrate. No intrusion of dust.

**Chart 5**

2nd charact. numeral	Brief description	Definition
0	Non-protected	–
1	Protected against vertically falling water drops	Vertically falling drops shall have no harmful effects.
2	Protected against vertically falling water drops when enclosure tilted up to $15^\circ$	Vertically falling drops shall have no harmful effects when the enclosure is tilted at any angle up to $15^\circ$ on either side of the vertical.
3	Protected against spraying water	Water sprayed at an angle up to $60^\circ$ on either side of the vertical shall have no harmful effects.
4	Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effects.
5	Protected against water jets	Water projected in jets against the enclosure from any direction shall have no harmful effects.
6	Protected against powerful water jets	Water projected in powerful jets against the enclosure from any direction shall have no harmful effects.
7	Protected against the effects of temporary immersion in water	Intrusion of water in quantities causing harmful effects shall not be possible when the enclosure is temporarily immersed in water for 30 min. in 1m depth.
8	Protected against the effects of continuous immersion in water	Intrusion of water in quantities causing harmful effects shall not be possible when the enclosure is continuously immersed in water under conditions which shall be agreed between manufacturer and user but which are more severe than for numeral 7.
9 K <sup>1)</sup>	Protected against water during high pressure/steam jet cleaning	Water projected in powerful jets with high pressure against the enclosure from any direction shall have no harmful effects.

1) Remark: Numeral acc. to DIN 40050 part 9, vehicles IP code

# C16-3

Remarks  
Safety classification

## 1. General Remarks

These connectors are designed and produced in conformity with the low voltage directive (73/23/EWG) respectively Gerätesicherheitsgesetz (German law) and are especially in according with the standards DIN EN 61984 / IEC 61984 (VDE 0627); IEC 60664-1 (VSE 0110-1) and IEC 60529. The connectors may be used only within the technical ratings. These connectors with / without breaking capacity are designed and produced according to DIN EN 61984/VDE0627.

All technical data refers to mated connectors under live conditions.

The safety of the connector system depends on the correct selection of products, proper assembly of the connector device, and a precise fit of the connectors.

## 2. Application Remarks

Connectors with / without breaking capacity must be used according to specified technical ratings.

The technical data represents the initial value of mated parts under predetermined conditions and length of time. These values could change with different test parameters or product requirements.

The 16-3 Series connectors are used in a wide variety of industries and equipment. Some of these include industrial machines and controls, data processing, instrumentation and test equipment, medical devices, telecommunication's network and equipment, plus outdoor and marine applications.

All rated data for the connectors listed in this catalogues are based on over-voltage category III <sup>1)</sup> and pollution degree 3 <sup>2)</sup> for electronic applications.

Connectors were completely mated according to their respective safety locking mechanism. Selection and testing of connectors with / without breaking capacity to meet specific product or industrial requirements such as rated voltage and the related clearances and creepage distances are the responsibility of the user.

## 3. Assembling Remarks

Protection against electrical shock of the termination of the connectors shall be secured by correct mounting. Connectors of the same or different series being mounted side by side may be protected against incorrect mating by the use of coding options. Care must be taken to ensure the parts are correctly mated and screws are tightened with the proper torque.

## 4. Termination Remarks

Cable connectors are effectively secured when using the internal cable clamp. When the connector contains a simple gland bushing for retention without clamping ring the cable should have a strain relief close behind the connector. All cable properties or specifications must be compatible with the connector design and materials.

Designated wire conductors must be terminated to the correct poles in the connector.

Crimp contacts must be fully inserted into the plastic housing and retention assured with a slight tug on the wire.

Wire should be stripped correctly according to printed specifications to insure no electrical contact can be made between the conductors. There should be no nicked or cut strains during the stripping action.

## 5. Safety Classification acc. to DIN EN 61984 / VDE 0627 / IEC 61984

Style	enclosed mated	enclosed unmated	protective earthing contact	finger safety mated	finger safety unmated	hand back safety mated	connector with breaking capacity	rewirable	Cable clamp	
									with	without
Male cable connector	X	X	X	X		X	X	X	X	X
Female cable connector	X		X	X	X	X	X	X	X	X
Male receptacle screw / crimp	X <sup>3)</sup>	X	X	X <sup>3)</sup>		X	X	X		X
Female receptacle screw / crimp	X <sup>3)</sup>		X	X <sup>3)</sup>	X <sup>3)</sup>	X	X	X		X

<sup>1)</sup> Overvoltage category III: Equipment intended for the use in installations or parts of it in which lightning overvoltages do not need to be considered, however switching overvoltages generated by the equipment, and for cases where the reliability and the availability of the equipment or its dependent circuits are subject to special requirements. Examples are protecting means, switches and sockets.

<sup>2)</sup> Pollution degree 3: Conductive pollution occurs or dry non-conductive pollution occurs which becomes conductive due to condensation which is to be expected.

<sup>3)</sup> Protection against electrical shock on the termination side has to be secured by proper mounting.
