

# Crucial Easy Desktop Install Kit for SSD

## Install a Crucial SSD in a desktop PC with ease

Installing an SSD in a desktop PC is easy, but it sometimes requires a few special supplies, which is why we created this kit. Included is a SATA-to-USB cable that you'll use to transfer data from your old storage drive to your new SSD, a SATA-to-SATA cable that you'll use to physically install the drive, plus a bracket you'll use to install a Crucial SSD to your desktop's storage bay. If you're installing an SSD into a standard OEM desktop (HP, Dell, Lenovo, etc.) you'll also need a 2.5-inch to 3.5-inch converter, which allows you to secure the SSD to these particular systems' larger storage bays.

## PRODUCT HIGHLIGHTS

- Designed for first-time SSD installers with desktop PC systems
- Includes a USB-to-SATA data transfer cable, SATA data transfer cable, 3.5-inch adapter bracket, and mounting screws
- Ideal for use with Crucial 2.5-inch SSDs

## WHAT'S INCLUDED

- SATA data transfer cable
- USB-to-SATA data transfer cable
- 3.5-inch adapter bracket
- Mounting screws
- SSD sold separately
- Cable could be black or white
