

# 12 OSOLON® Square MiniFlood Colours

**IHR-OG 12-xxxx-SC2x1-WIR200.**

## Product Overview

The MiniFlood from IHS was designed to work exclusively with the Petunia lens from LEDiL. Each MiniFlood contains 12 OSOLON Square LEDs. OSOLON Square can be driven from 100mA-1000mA depending on the colour temperature while OSRAM's latest power chip technology remains efficient even at the highest drive currents. A low thermal resistance of 7 K/W ensures cool running and a highly efficient product. MiniFloods are compact, powerful LED light sources built on aluminium substrates for optimal thermal management.

Available with 200mm wires as standard.

## Applications

- Horticultural lighting
- General Lighting
- Decorative Lighting
- Task Lighting
- Retail and Entertainment Lighting
- Flood Lighting

## Technical Features

- MiniFloods contain OSRAM Opto Semi OSOLON® Square LEDs with high efficacy
- Up to 50,000 Hour lifetime to 70% of original brightness
- Mounting holes using M3 screws allows easy installation
- Size (L x W x H): 46.5x30x4mm
- Secondary lens can be fitted
- MiniFloods can be linked together to produce longer chains.
- Current range 100mA to 2000mA depending on colour
- A secondary Lens can be fitted – check options in Lens and Reflector section
- Suitable Heasinks available – check options in Heatsink section
- Matching Power Supplies available - check options in Power Supply section
- Suitable Thermal Interface Material available – check options in Thermal Interface Material section

\*This datasheet should be read in conjunction with the relevant OSRAM Opto Semiconductors data on the LEDs used

## Important Information and Precautions

- The MiniFlood's LEDs, when powered up, is very bright. Thus it is advised that you do not look directly at it. Turn the MiniFlood away from you and do not shine into the eyes of others.
- Do not operate MiniFlood's with a Power Supply with unlimited current. Connection to constant voltage Power Supplies that are not current limited may cause the MiniFlood to consume current above the specified maximum and cause failure or irreparable damage.
- MiniFlood's, when operated, can reach high temperatures thus there is risk of injury if they are touched.
- DO NOT HOT PLUG ON LED SIDE OF POWER SUPPLY.
- DO NOT TOUCH or PUSH on the LED as this can cause irreparable damage.

## Product Options

IHS Part Number	Dominant Wavelength *	Typical Wattage at § 700mA	Forward Voltage	Flux † at 700mA	Radiance Angle	Relevant OSRAM LED Data
IHR-OG 12-DEBL-SC221-WIR200.	Deep Blue (455nm)	23.10 W	32.4 to 42 V	>15600mW	120° (±40°)	GDCSSRM2.14
IHR-OG 12-HYRE-SC231-WIR200.	Hyper Red (656nm)	17.64 W	22 to 31.2 V	>11100mW	120° (±40°)	GHCSSRMx.24

\* Due to the special conditions of the manufacturing processes of LEDs, the typical data of technical parameters can only reflect statistical figures and do not necessarily correspond to the actual parameters of each single product which could differ from the typical data.

§ Tolerance +/- 10%

† Measured with 20mS 700mA pulse at 85 °c

## Micromoles

IHS PART NUMBER	Par* (φp) [μmol/s]	PPF/W* [μmol/J]	BPF/W** (φp,b)[μmol/s]		BPF/W**
	Typ	Typ	Min	Max	Typ
IHR-OG 12-DEBL-SC221-WIR200.	60.60	62.88	60.96	63.24	42.24
IHR-OG 12-HYRE-SC231-WIR200.	58.56	63.00	30.00	58.80	30.12

Note: [\*] Includes wavelengths between 400 and 700 nm

Note: [\*\*] Includes wavelengths between 280 and 800 nm

## Minimum and Maximum Ratings

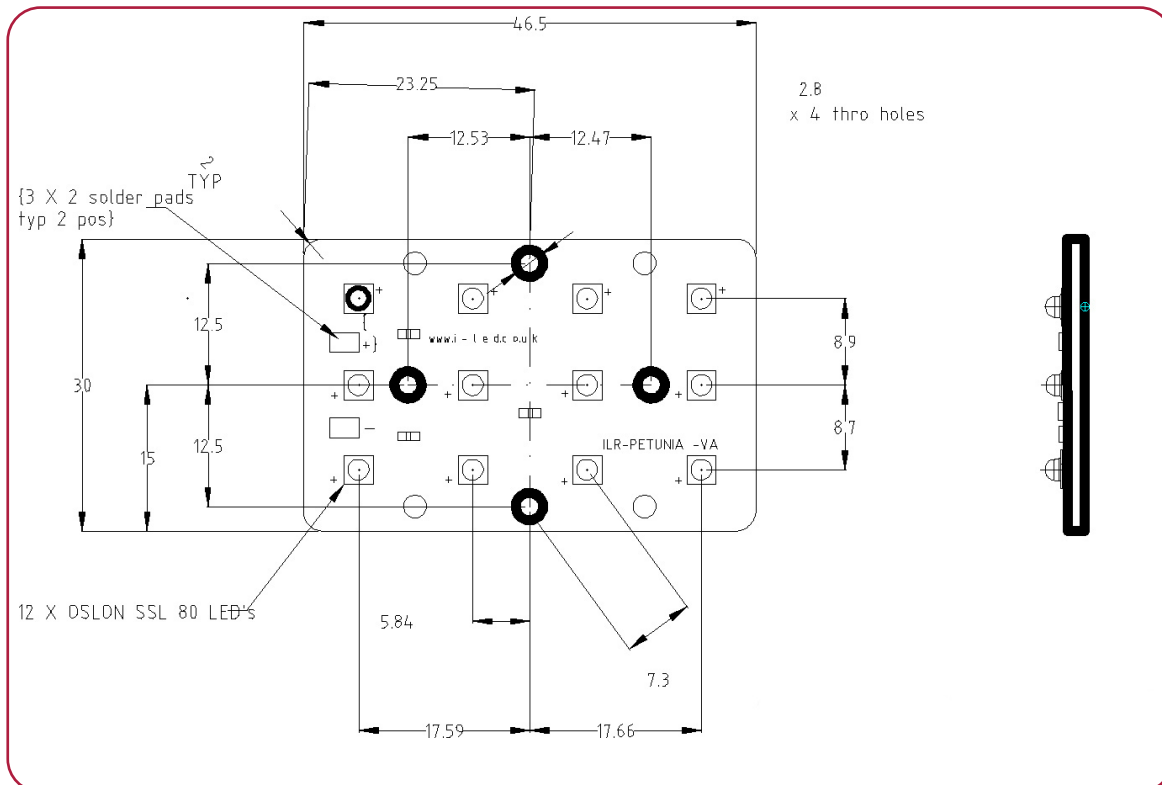

ILS Part Number	Operating Temperature at Tc-Point [°C]*	Storage Temperature [°C]*	Maximum Forward Current per chip [mA]*	Reverse Voltage [Vdc]*
IHR-OG 12-DEBL-SC221-WIR200.	70°C max	- 40 to 110°C	2000mA max	not designed for reverse voltage
IHR-OG 12-HYRE-SC231-WIR200.	70°C max	- 40 to 110°C	2000mA max	not designed for reverse voltage

\* Exceeding maximum ratings for operating and storage temperature will reduce expected life time or destroy the LED module. Exceeding maximum ratings for operating voltage will cause hazardous overload and will likely destroy the LED module. The temperature of the LED module must be measured at the Tc-Point according to EN60598-1 in a thermally constant status with a temperature sensor or a temperature sensitive label.

**Radiation of single LED**

**Technical Drawing with cables (mm)**

**3D drawing files are available on request from IHS. Please call or email**

## 12 Oslon Square MiniFlood Lens and Reflector Options

LEDiL precision-engineered Lenses and Reflectors allow for rapid deployment of all types of light fixtures, including street lights, wall-wash, high-bay, sconces, emergency beacons, parking garage/low-bay, MR and AR down lights, and dock lights. Precision engineered for maximum efficiency and durability, LEDiL Lenses and Reflectors are released alongside the latest product releases from our LED suppliers. You select the best LED for the application; choose LEDiL and you're selecting the best optical solution as well.

Ordering Code	Beam	Dimensions	Height	Family	FWHM	Material	Colour	Fastening
C12528_PETUNIA	Medium	30 x 47 mm	7.4mm	Petunia	30	PC	Clear	Pin + Glue
C16520_PETUNIA2	Medium	30 x 47 mm	7.4mm	Petunia	25	PC	Clear	Pin + Glue

## 12 Oslon Square MiniFlood Heatsink Options

IHS has recently introduced a series of Aluminium Alloy Heatsinks to be used with our standard range of PowerStars and PowerClusters. These Heatsinks are supplied with fixing screws for the light engine and for fixing to a base plate. They also come with Thermal Interface Material (TIM) attached to the top surface. More versions will be introduced over the coming months and we are also happy to manufacture custom Heatsinks to your request.

IHS Product		no heatsink in free air	ILA-HSINK-STAR-50X20MM	ILA-HSINK-STAR-50X40MM	ILA-HSINK-STAR-50X60MM	ILA-HSINKSTAR-50X80MM	ILA-HSINK-CLUSTER-70X70X55MM	ILA-HSINK-CLUSTER-78X46X25MM
OSLON Square 12 MiniFlood	350mA		N/A	N/A	N/A	N/A		
	700mA		N/A	N/A	N/A	N/A		
	1000mA		N/A	N/A	N/A	N/A		

### KEY

- Operates under the recommended IHS junction temperature
- Operates under the recommended LED maximum junction temperature
- Not suitable for use
- Heatsink not designed for use with this product

## 12 Oslon 80 MiniFlood Power Supply Options

IHS has a comprehensive range of standard Power Supplies. The table below shows the total number of ILS products each Power Supply can drive. Additional Power Supplies are being introduced so please call us or check our website for the latest offering.

IHS Driver Part No.	Rating Watts	Current	PowerStar per LED Driver	
IZC035-008F-5065C-SA	8W	350mA	3-36V	
IZC035-017F-0067A-SA	17W	350mA	6-48V	
IZC035-018T-9500A-SX	18W	350mA	15-52V	
IZC050-018T-9500A-SX	18W	500mA	9-36V	
IZC045-040A-9266C-SA	40W	450mA	30-89V	
IZC095-040M-9067C-SAL	40W	950mA	25.2-42V	
IZCVAR-040M-9020C-SAL	40W	350mA, 500mA, 600mA, 700mA, 900mA, 1050mA	350mA 2-100V, 500mA 2-80V, 600mA 2-67V, 700mA 2-57V, 900mA 2-45V, 1050mA 2-40V	
IZC070-050A-9267C-SA	50W	700mA	24-72V	
IZC050-060F-9067C-QA	60W	500mA	40-100V	
IZC070-075A-9267C-SA	75W	700mA	54-108V	
IZC140-120M-9065C-SAL	120W	1400mA	54-108V	

\* Please take notice of the colour temperature, warmer Minifloods perform can not be driven at 1000mA please look at Minimum and Maximum tables (page 2)

## Thermal Interface Material Options

IHS have produced a range of High-performance, cost effective Thermal Interface Materials to match perfectly their standard products.

Our product fills the air pockets between the two surfaces, forming a continuous layer to conduct heat away from the LED to the Heatsink.

IHS offer our TIM in three options – double sided adhesive, single sided adhesive and non adhesive.

Product	Non Adhesive	Single Sided Adhesive	Double Sided Adhesive
<b>OSLON Square 12 MiniFlood</b>	ILA-TIM-PETUNIA-0A	ILA-TIM-PETUNIA-1A	ILA-TIM-PETUNIA-2A

Other sizes are available, including customised parts

## Assembly Information

- In order to optimise the thermal management, the metal surface needs to be clean (dirt and oil free) and planar for the best contact with the LED module. A thermal grease or heat transfer material is highly recommended.

## Safety Information

- The LED module itself and all its components must not be mechanically stressed.
- Assembly must not damage or destroy conducting paths on the circuit board.
- The mounting of the module is carried out by attaching it at the mounting holes. Metal mounting screws must be insulated with synthetic washers to prevent circuit board damage and possible short circuiting.
- To avoid mechanical damage to the connecting cables, the boards should be attached securely to the intended substrate. Heavy vibration should be avoided.
- Observe correct polarity!
- Depending on the product, incorrect polarity will lead to emission of red or no light. The module can be destroyed! Pay attention to standard ESD precautions when installing the MiniFlood.
- The MiniFlood, as manufactured, have no conformal coating and therefore offer no inherent protection against corrosion.
- Damage by corrosion will not be accepted as a materials defect claim. It is the user's responsibility to provide suitable protection against corrosive agents such as moisture and condensation and other harmful elements.
- For outdoor usage, housing is definitely required to protect the board against environmental influences. The design of the housing must correspond to the IP standards in the application. It is also the responsibility of the user to ensure any housing or modifications keep the Tc junction temperature to within stated ranges.
- To also ease the luminaire/installation approval, electronic control gear for LED or LED modules should carry the CE mark and be ENEC certified. In Europe the declarations of conformity must include the following standards: CE: EC 61374-2-13, EN 55015, IEC 61547 and IEC 61000-3-2 - ENEC: 61374-2-13 and IEC/EN 62384.
- The evaluation of eye safety occurs according to the standard IEC 62471:2006 ("photobiological safety of lamps and lamp systems"). Within the risk grouping system of this CIE standard, the LED specified in this data sheet falls into the class moderate risk" (exposure time 0.25s). Under real circumstances (for exposure time, eye pupils, observation distance), it is assumed that no endangerment to the eye exists from these devices. As a matter of principle, however, it should be mentioned that intense light sources have a high secondary exposure potential due to their blinding effect. As is also true when viewing other bright light sources (e.g. headlights), temporary reduction in visual acuity and afterimages can occur, leading to irritation, annoyance, visual impairment and even accidents, depending on the situation.
