

# Module BUS

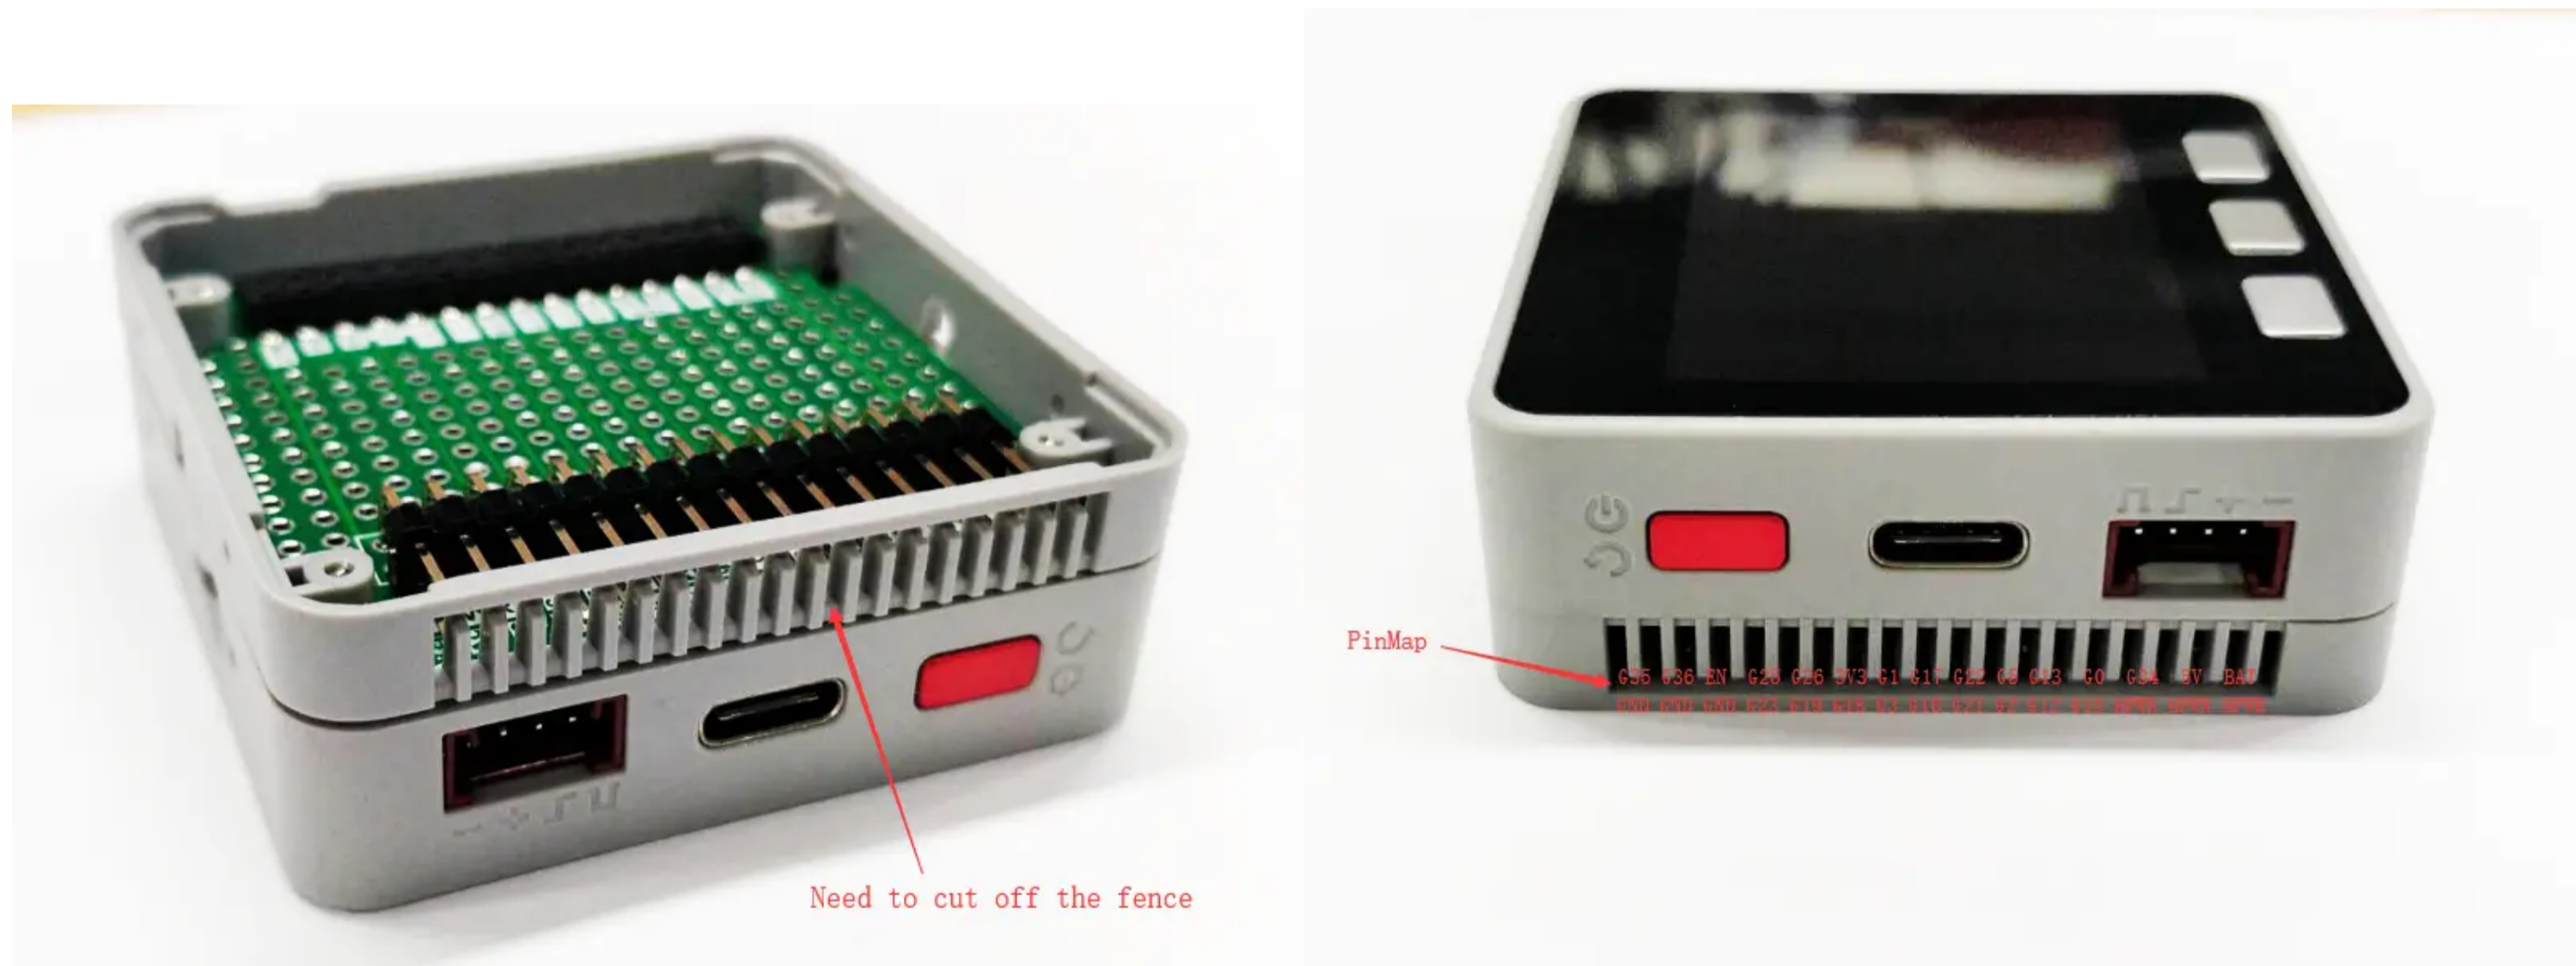

SKU:M024

## Description

**BUS** allows you add your own custom circuit design to the universal prototype perboard so it could interact with the M5Core via M-BUS.

Just like other M5modules, BUS can connect with other layer through M-BUS, while in this module, we've extended the M\_BUS pin to pin to the other side of the board. You might need to cut off the fence on the side to be able to expose the pins. We've included a 2\*15 90 degree pin set in the package.

## Product Features

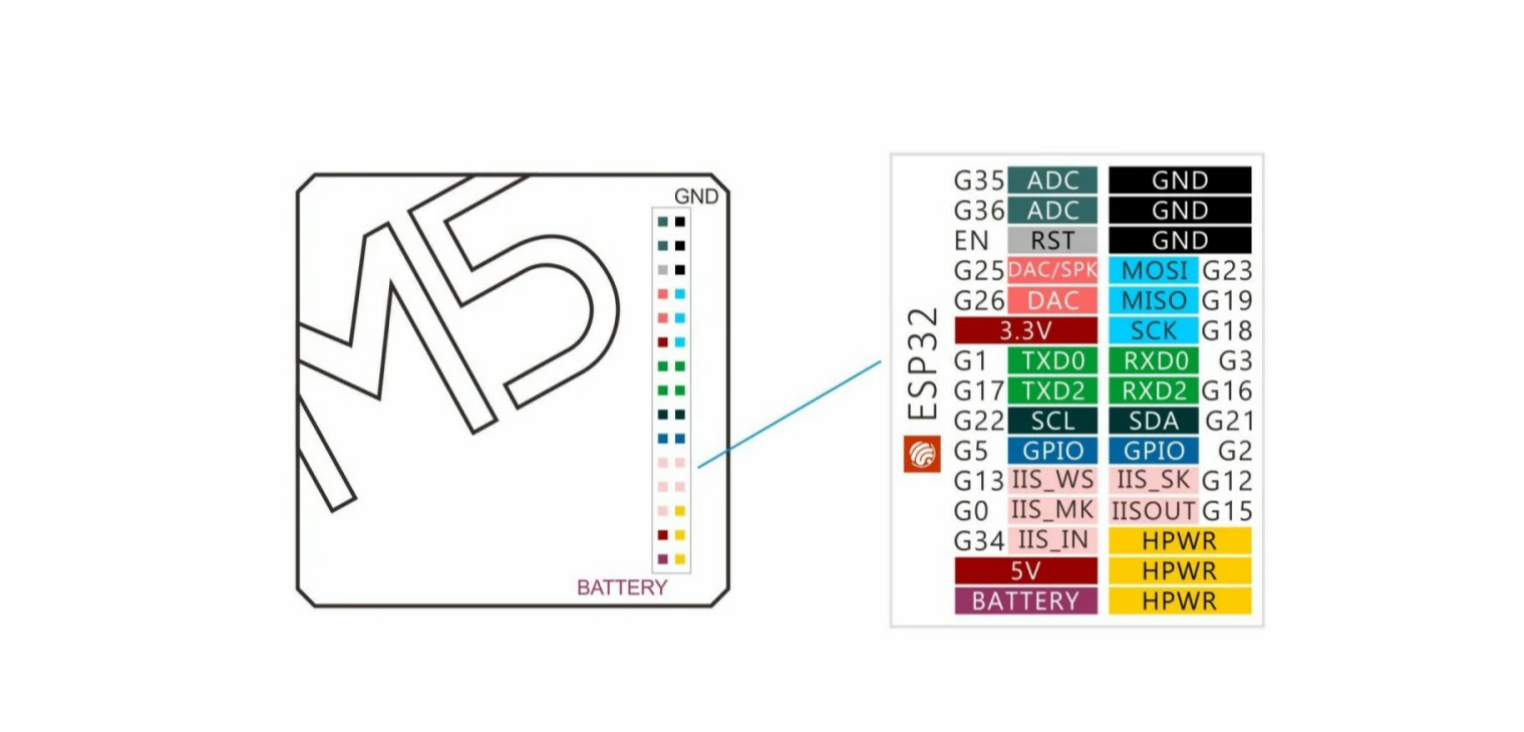

- Hole Size: 0.039" 1mm (CNC Drilled)
- Hole Pitch: 0.1 in - (2.54 mm)
- Entire Hole Quantity: 200 Holes

## Include

- 1x BUS Module

Resources	Parameter
Net weight	13g
Gross weight	23g
Product Size	54*54*13mm
Package Size	60*57*17mm
