

Wireless HDMI Transmitter | 1080p | 5 GHz | 30 m

General information

Wireless HDTV solution to enjoy HDTV image and sound quality without any cables being required. This kit is very convenient if there are no long HDMI Cables available, if you would like to watch TV in your garden or if the room is not suitable for a cable connection, such as in home cinemas, (rented) meeting rooms and game rooms.

Another big advantage is that this kit is equipped with an IR extender function. It enables satellite receivers, Blu-ray players and other source players to be controlled with a remote for maximum operating convenience.

Features

- Supports HDMI™ (with 3D) and 1080p wireless transmission
- Operating transmission of up to 30 m (LOS) for a wireless long distance connection
- IR extender function to control source players with a remote for maximum operating convenience
- HDCP-compliant for high image quality
