R420-1.8/PL

Low Current Regulator

Description

The R420 has been designed for auxiliary power from 4-20mA loops and other low power budget applications that require a maximum input current <3.6mA. This low profile SMD converter delivers a regulated, short-circuit protected output that can be adjusted between 1.8V and 5V with a single external resistor and delivers three times the output current of equivalent linear regulators to power microprocessors, data-loggers and HART digital modems without affecting the analog 4-20mA signal. The R420 will also find many applications in energy scavenging and indoor solar powered circuits.

Selection Guide

Part Number	Input Voltage Range [VDC]	Adjustable Output Voltage Range [VDC]	Output Current [mA]	Efficiency typ. (1) [%]	Max. Capacitive Load (2) [µF]
R420-1.8/PL	10-36	1.8-5.0	10	76	1000

Notes:

- Note1: Efficiency is tested at 10-36VDC, full load and +25°C ambient
 Note2: Max cap load is tested at nominal input and full resistive load

EN60950-1 certified
 EN55032 certified
