

PCB Holder with LED Magnifying Glass

FEATURES:

The "helping hand" for all manner of tasks. With six ball joints, the gripper arms can be moved as required in all planes. A great help for delicate soldering work, tin-coating, bonding and holding - for any jobs where you need both hands. Heavy cast-iron base with ball joints and two movable clamps. Secure grip in any position.

The large 85 mm \varnothing magnifying glass with two dioptries and LED lighting (3 x AAA batteries not included in delivery, please add to your order) facilitates accurate precision work.
