TOUGHER THAN TOUGH

Portable Fortress

The A85 is a tough one. Thanks to its internal suspension system, seamless rubber covering, and robust aluminum casing, the triple-level safety construction is 500kg pressure-resistant, IP68 water- and dustproof, and 3m military-grade shockproof. Preventing damage caused by accidental drops, falls, liquids, dirt, or pressure is a walk in the park for the A85.

Even More Protection

SP's HDD Lock Utility software offers full password-protected disk encryption to prevent intrusions and data theft. Just make sure to remember your password! Fortunately, forgetting the cable is nothing to worry about as the A85/A85M has a handy built-in cable-carry band.
