

raaco ToolCase

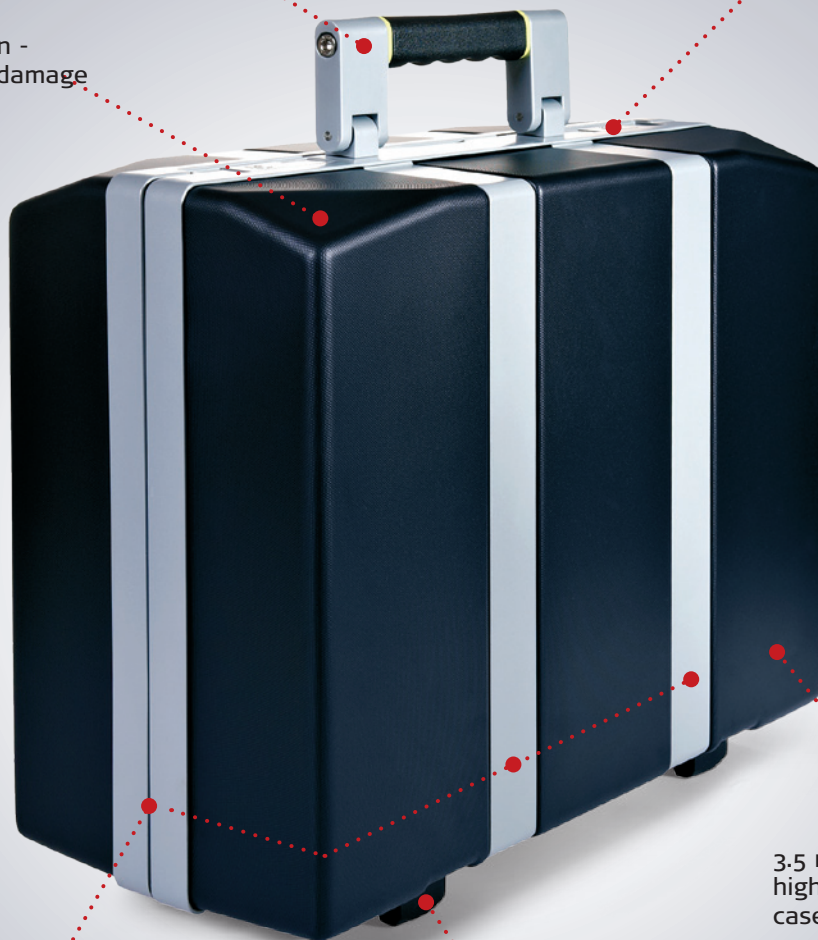

PRODUCT GUIDE

Tool cases

X-large handle - comfortable handle even when fully loaded

2 cylinder key-locks integrated in frame provides enhanced security

Enhanced corner design - reduces risk of corner damage

3.5 mm ABS shell - high impact strength protects case and content

Thoughtful, robust and stylish design with triple-frame construction for maximum rigidity and durability of tool case

Elevated feet mounted on the frame protects both the work surface and the tool case

raaco ToolCase

A sustainable solution that's ahead of the pack

raaco's brand-new ToolCase is more than just a tool case – it's an entirely new concept in organised tool storage. With raaco ToolCase you get outstanding quality from top to bottom. The combination of new principles in design and construction, high-quality materials, end-to-end functionality and streamlined design ensures a sustainable solution that's ahead of the pack.

Packed and ready to go in an instant

The raaco ToolCase is a flexible tool case that gives you the freedom to design exactly the storage solution that's right for you – every day. With the raaco ToolCase your tools are always packed and ready to go so you can do your job quickly and effectively every time.

Just what you need in easy reach

In addition to its infinite combination possibilities, the raaco ToolCase also offers an extremely rugged storage solution with an array of practical functions. The raaco ToolCase is built to last and can be updated and modified with our large selection of accessories to meet your changing needs. This allows you to create functional solutions that always put the right tools and the right accessories within easy reach.

Danish design at its best

The raaco ToolCase is Danish design at its best. All raaco materials are selected to support functionality and make the ToolCase a practical companion in your daily work – both indoors and outdoors. The raaco ToolCase is hand-made in Denmark and constructed from durable, environmentally-friendly materials that are easy to take apart and recycle. What's more, all parts can be replaced so if something does wear out, you simply buy a new part and your raaco ToolCase is as good as new again. And that extends its lifetime, which is good for both your budget and for the environment.

Solid, stable and safe

The exterior of the raaco ToolCase is equipped with a 3.5 mm thick scratch-resistant ABS shell that gives heavy-duty reinforcement and protection both inside and out. Solid aluframes stabilise and reinforce the tool case, providing extreme durability. The aluframes feature integrated hinges and double key locks for safe storage and transportation. The extra large padded handle makes the ToolCase easy to pick up and comfortable to hold, while the slanted corners offer extra resistance against hard knocks and damage. The extra high moulded-in feet made from polyethylene materials protect the underside of the raaco ToolCase when it is standing upright and serve to prevent hinge damage.

- more than just a tool case

Practical design equals great overview

Inside, the raaco ToolCase is equipped with gas struts that make it both safe and easy to open and close. The raaco ToolCase also features tool panels – one or two detachable panels and one permanent panel. The detachable tool panels mounted in the lid open at a 30 degree angle for excellent visibility of tools and ease of access. The bottom tool panel stays horizontal when the ToolCase is opened, closing off the lowest compartment to keep contents in place. The tool panel features a twist lock to keep contents secure during transit. For access to the lowest tool panel, just twist the lock, lift the panel and fasten with the Velcro strap for easy access to the contents.

Mix and match tool panels to suit your needs

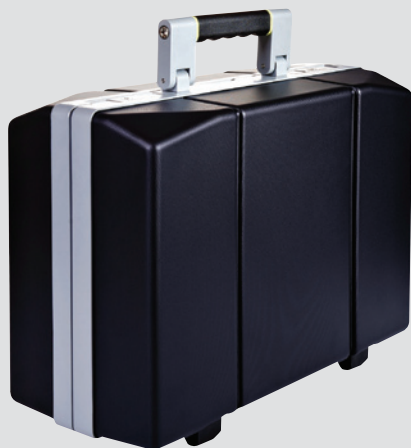

raaco's tool panels are available in both single and double options and can be mixed and matched across the various product types: The tool panels with flexible Open ToolFix tool holders with bottom opening for easy access, while the tool panels with open, elasticised tool holders ensure durable elasticity and stretchability. Both types of tool panel offer an entirely new level of flexibility and overview that makes it possible to store many different types of tools safely and securely.

Keep small items organised

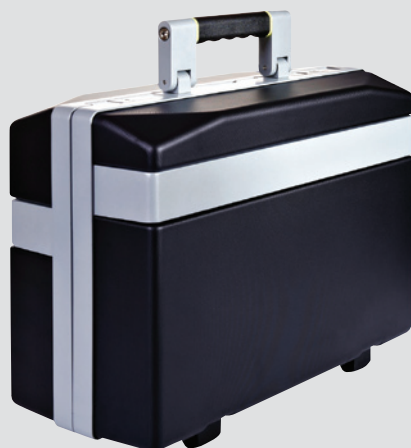

The base of the raaco ToolCase contains a practical tray for storing small items and accessories. The tray can be divided into several small compartments as needed with the help of raaco's replaceable inserts and dividers. This offers easy sorting and retrieval for fast access to all contents. The trays also have grids in the base to keep inserts safe during transit.

Wide range of models

The raaco ToolCase is available in sizes L and XL. Choose between a wide range of models in three different qualities: Basic, Premium and Superior. The Basic models are equipped with a solid aluframe while the Premium models feature double-frame construction for increased reinforcement and durability. The Superior model boasts a triple-frame construction for maximum reinforcement and durability. The Premium and Superior models are also available with Open ToolFix. The Premium XL and Superior XL models come in a practical trolley version with noise-reducing rubber wheels and 4-way telescoping handle (105 cm), for quiet, comfortable and secure transport. The Basic models offer maximum carrying capacity of 25 kg while the Premium models offer maximum carrying capacity of 35 kg and the Superior models offer maximum 45 kg carrying capacity.

PRODUCT FEATURES	USER BENEFITS
Thoughtful, robust and stylish design	Sturdy construction and durable materials
Single-frame construction (Basic)	The strength and rigidity of a heavy duty die casted aluminium frame
Double-frame construction (Premium)	Added rigidity and durability of tool case
Triple-frame construction (Superior)	Maximum rigidity and durability of tool case
Hinges integrated in frame	Added strength
3.5 mm ABS shell	High impact strength protects case and content
Enhanced corner design	Reduces risk of corner damage
Opening system features gas struts	Easy and safe opening and closing
Replaceable tool panels in lid	For individual configuration of tool case
Tool panel opens to a max. 30 degrees	Excellent visibility of tools and ease of access
Tool guard on tool panels	Protects the tools and the casing
Open ToolFix tool holder	Flexible and efficient tool storage - suits all sizes between 1-25 mm Ø
Elasticated tool holders	Flexible and efficient tool storage - suits all sizes between 10-40 mm Ø
X-large handle	Comfortable handle even when fully loaded
Elevated feet mounted on the frame	Protects both the work surface and the tool case
2 cylinder key-locks integrated in frame	Enhanced security
Versatile tray in bottom part of tool case	Can be subdivided using raaco inserts or dividers
Uses raaco inserts and dividers	Variable configuration of tray for easy retrieval of contents
Extensive list of accessories	Allows for individual configuration and variance, at any time
Integrated trolley system mounted to frames	Safe and easy transportation
4-step trolley system	105 cm high - sufficient clearance to protect heels while walking
Rubber wheels and suspension	Quiet and smooth when being pulled
DFD (Design for Disassembly)	Spare parts replacement and recyclable materials
Made in Denmark/EU	Danish Quality & Design

Rubber wheels and suspension ensures quiet and smooth transport of the tool case.

Gas struts makes it easy and safe to open and close the tool case.

Slanted corners reduces the risk of corner damage.

The bottom tray can be subdivided using raaco inserts or dividers.

The flexible Open ToolFix tool holder suits all sizes of tools between 1-25 mm Ø.

The flexible elasticated tool holders in three different sizes suits all types of tools between 10-40 mm Ø.
