

Rivets - 0.4mm

voltera.io/store/consumables/rivets-0-4mm

Do you need a way to connect the top and bottom layers? Rivets are the key!

Rivets are little copper tubes that make a mechanical connection between the top and bottom layer. We found rivets to be the easiest way to create vias. Be sure to pick up the corresponding **rivet tool** if you don't have one!

- Pack of 200
- Inner Diameter - 0.4mm
- Head Diameter - 0.9mm
- Drill Size: 0.7mm

SKU: 1000283
