

Take a deep breath - the new Zero Smog 4V[®]

Weller cares about Your employees.

Developed from the well established WFE 2S extraction unit, the new Zero Smog 4V[®]

Order-number T005 36 606 99 gives you even more value!

Energy saving.

With all extraction arms closed, the turbine speed is reduced by 70%. Then after a further user defined preset time the extraction unit will be switched Off by the Auto-Off function.

Save Energy

Automatic speed control.

The Zero Smog 4V[®] will maintain a constant volume of extraction through each of the extraction arms are closed, the turbine speed will automatically slow down, reducing both the energy consumption and noise level of the unit.

Health and Safety.

The operation of the Zero Smog 4V[®] is logged on an internal memory and can be read via a USB output to a computer terminal and saved to maintain an operating record.

Flexibility.

In its delivered form, the unit is fitted with 1 easy click connector for an extraction hose to connect to a bench mounted arm. 3 blanked ports are provided for additional connectors to extend the use of the unit.

Casters are fitted for ease of movement.

Always fresh air

A filter condition indicator and an audible alarm will signal when a filter change is needed.
