

Hand taps HELICOIL® plus and HELICOIL®

Type 0140.0

HELICOIL® cutting taps

- for coarse threads up to P = 2 mm
- for fine threads up to P = 3 mm
- For cutting operations of materials with strengths up 700 N/mm²
- For through holes
- For blind holes only if there is sufficient tapping space. The core holes to be cut at least 1 d deeper than the fully cut thread length.

① Standard HELICOIL® hand taps produce a holding thread of tolerance class 5H (6H mod). The HELICOIL® installation results in an ISO thread of tolerance class 6H. For HELICOIL® holding threads of tolerance class 4H (5H mod) the ninth digit of the product code changes from 1 to 2. The HELICOIL® installation results in an ISO thread of tolerance class 5H.

② The prices of HELICOIL® hand taps depend on the price of the relevant alloy on the supply date.

TiN coated taps can be supplied on request.

The cutting taps can also be supplied as machine taps.

Taps for special requirements, such as hard or tough materials, can be supplied on request.

For more detailed information, please ask for our catalogue 0100.

Combined drilling and tapping tools for HELICOIL® plus and HELICOIL®

For tapping HELICOIL® holding threads in damaged metric standard and fine threads.

Pre-drilling of the HELICOIL® holding thread is not necessary. For blind holes the tool is only usable under certain conditions due to the guiding unit d 3 x L 5.

We also provide TiN-coated thread former.

① For tolerance class 4H the ninth digit in the ordering ref. no. changes from 5 to 4.
Details refer to catalogue 0100.

Non-cutting forming of inner threads for through hole and blind holes

With lubrication grooves

Perfect lubrication even at larger depths

Speeds corresponding to thread tap

Lubrication:

Lubricant containing oils or emulsions containing grease

Material range:

Mouldable materials such as aluminium, copper and zinc alloys, steel up to 700 N/mm², stainless steels.
