

FEATURES

- **Compact flat type**
We successfully developed a high carrying current type that is the same size as our CP relay (14 mm (L) x 13 mm (W) x 9.5 mm (H) .551 inch (L) x .512 inch (W) x .374 inch (H)).
- **35A maximum carrying current**
Current carrying of 35 A/1h and 45 A/2 min. at 20°C (450 W type, 16 V applied) is possible due to use of N.O. double pin terminals and COM terminal width expansion.
- **Supports capacitor loads required for power supply applications**
Inrush current: 60A, steady-state current: 1A and 10⁵ switching times possible.
- **Plastic sealed type**
This plastic sealed type can be automatically cleaned.

Notes:

*1. This value can change due to the switching frequency, environmental conditions, and desired reliability level, therefore it is recommended to check this with the actual load.

*2. The upper operation ambient temperature limit is the maximum temperature that can satisfy the coil temperature rise value. Refer to "6. Usage, Storage and Transport Conditions" in [AMBIENT ENVIRONMENT section in Relay Technical Information](#).

Please inquire if you will be using the relay in a high temperature atmosphere (110°C 230°F).

*3. Depends on connection conditions. Also, this does not guarantee repeated switching. We recommend that you confirm operation under actual conditions.
