

FSBxxx-0x

EMC SCREEN PLATE

Excellent and cost-favourable shielding can be achieved with the EMC baffle for fan sizes 30x30mm to 120x120mm. Connection to the metal housing must conduct well. This is realized in particular by employing elastic links (e.g. fan sleeve Type LMxxx) that press the EMC baffle onto the housing. The use of a conductive adhesive is of advantage and also prevents the filter medium (Type Fxx-45) from being suctioned into the fan if it is equipped with dust filters and the housing only has one large opening.

Material: V2A (Stainless steel) Nr. 1.4310
