## Secvest 2WAY Wireless Emergency Transmitter

The Secvest 2WAY wireless emergency transmitter is a handheld transmitter for the Secvest 2WAY. You can use it to send an emergency call via your wireless alarm panel with a press of a button. The wireless emergency transmitter makes your Secvest a home emergency call center.

With a weight of 14 grams and dimensions of 44 x 32 x 13 mm, the sender fits in any pocket. Pressing a button is enough to send a medical emergency call to a predefined number or control center via the integrated analog telephone dialling unit of the Secvest. The wireless emergency transmitter, in combination with the alarm system, allows senior citizens to live a worry-free life in their own homes. The wireless emergency transmitter can be fastened onto an arm band or belt or you can wear it around your neck. The transmitter is protected against spraying water (protection class IP65) and can even be worn in the shower. With corresponding batteries (3 V lithium) the wireless emergency transmitter has a service life of approx. 5 years.

### Product highlights:

- Protected from spraying water (IP65)
- Small and handy
- For quick notification during a medical emergency
- Can be fastened on arm bands, belts or worn around your neck
