

## Description

RND floor markers and safety signs are durable, self-adhesive signs constructed from an industrial grade plastic, intended for use in factory warehouses and buildings where restrictions and safety notifications need to be highlighted

RND signs have their designs printed onto the surface, and then a top laminate applied over that to protect the print, preventing its important messages from being worn off and therefore resulting in them lasting a long time

With quick application, RND floor markers and safety signs require no downtime to apply. Clean the surface area, and then you can peel off the backing liner, and stick it down. Once applied, they are ready for use immediately

## Intended Application Environments

RND floor markers can be applied in any area of your choosing. Areas for application generally include entrance ways into specific areas to notify people of certain restrictions or hazards to look out for. They can also be applied in areas to warn of potential hazards that occur once inside an area such as wet floors or steps. Not just restricted to floor application, RND floor markers can also be applied on walls and doors. Anywhere to ensure the message they are displaying is best seen by employees and guests

## Features

- Easy to apply
- Vibrant surface print
- Top laminate for durability
- Apply to floors or walls
- Diameter - 430 mm
