# Miniature Relays Series M

## Type MZ 2 poles 10A

### Monostable

- Miniature size
- PCB mounting
- Reinforced insulation 4 kV / 8 mm
- Switching capacity 10 A
- DC coils 1.87 to 160 VDC
- AC coils 4.8 to 264 VAC
- General purpose, industrial electronics
- Types: Standard, flux-free or sealed
- Switching AC/DC load

## Product Description

### Sealing

**P:** Standard, suitable for soldering and manual washing.  
**F:** Flux-free, suitable for automatic soldering and partial immersion or spray washing.

**H:** Sealed with inert gas according to IP 67, suitable for automatic soldering and/or partial immersion or spray washing.

For **General data**, notes and special versions see page 48

## Ordering Key

**MZ P A 200 47 10**

Type \_\_\_\_\_

Contacts/frame IGR	<b>C/660</b>
Open/contacts IGR	<b>C/250</b>
Impulse test volt. 1.2µs-50µs (CEI 41-1) <sup>5)</sup>	<b>10 kV</b>
Air and surface gap between Coil-frame contacts	<b>&gt; 8 mm</b>
<b>Insulation resist. at 500 VDC</b>	<b>10<sup>6</sup> MΩ</b>

- <sup>2)</sup> If required, they may be supplied with 0.5µ flash gilded silver contacts for med./low switching levels, with 3 µ gold plated silver contacts also very low switching levels around 10 mV and 10 mA well as Ag Sn O<sub>2</sub> contacts for high inrush currents.
- <sup>3)</sup> Intended with opened knob for sealed version MZH... .
- <sup>4)</sup> IGR insulation groups shown in the table are valid only if also PCB tracks are kept at minimum distances from each other and from accessible metal parts of the relays

## Temperature Influence

Operating voltages for step excitation. Minimum operating voltage is referred to +20 °C/ +68 °F ambient temperature; maximum operating voltage is referred to +40 °C/+104 °F ambient temperature.

t °C	t °F	K1	K2
0	32	0.92	1.15
10	50	0.96	1.12
20	68	1.00	1.09
30	86	1.04	1.05
40	104	1.08	1.00
50	122	1.12	0.94
60	140	1.16	0.88
70	158	1.20	0.81

Values of minimum and maximum operating voltage in respect to ambient temperature (t) may be obtained applying following formulas:

$$V_{\min t} = K1 \cdot V_{\min 20}$$

$$V_{\max t} = K2 \cdot V_{\max 40}$$

## Approvals

ITALY

U.S.A.

CANADA

GERMANY

SWITZERLAND

SWEDEN

DENMARK

NORWAY

FINLAND

The approvals stated are not generally applicable to all relay versions of a particular type. For further information please apply for relevant data sheets ref. **3.84.00.10.X**

## General Data

<b>Operating time</b> at rated voltage(excl. bounces)	<b>10 ms max.</b>
<b>Release time</b> (excl. bounces)	<b>5 ms max.</b>
<b>Vibration resistance</b>	<b>2.5 mm p.p. 5 to 45 Hz 10 g, 45 to 200 Hz</b>
<b>Ambient temp.</b> <sup>5)</sup> operating storage	<b>-40 °C to +70 °C -40 °C to +80 °C</b>
<b>Shock resistance</b>	<b>10 G, 11 ms</b>
<b>Inside protection</b> according to IEC 144	<b>IP 67 sealed IP 40 not sealed</b>
<b>Climatic category</b> (IEC 68-1)	<b>40/070/21</b>
<b>Weight</b>	<b>15 to 18 g</b>
<b>Working class / type of serv.</b>	<b>C / continuous</b>

magnetic circuit, as prescribed by VDE 0110. Therefore, within the marked zone on the printed circuit board (see sketch at side), there must be no conducting strips.

- <sup>5)</sup> Supplying the relay coil at the maximum voltage given in the table "Temperature Influence", the maximum ambient temperature value decreases from 70° to 40°C.

## Application Hints

### Use of sealed relays

The MZH relay types are in sealed version, IEC 68 Part 2-17 (DIN 40046) QC2-test, suitable for automatic process of soldering and for either total immersion washing or pressure spraying. If maximum utilization is made of full switching capacity, it is recommended that the relay be opened after the washing process, at the point provided for this purpose.

### Product safety

Operations outside the stated ratings shown in this catalogue may result in a possible failure or unsafe operating conditions.
