Notes: (1) Inductance values are rated at -40°C to +130°C operating temperature range with rated DC current flowing and the operating  $ET_{op}$  across the inductor.

(2)  $ET_{op}$  is rated at 500 kHz except where designated otherwise.

(3) The control values of inductance are measured at the operating flux density equal or less than 10 gauss and without DC current.

(4)  $ET_{op}$  is rated at 250 kHz.

(5)  $ET_{op}$  is rated at 150 kHz.
