## DATWYLER

Datwyler Cabling Solutions is a leading provider of high-quality system solutions, products and services for electrical and IT infrastructures in public and commercial buildings and data centres as well as for Fibre to the X (FTTx) networks. We enable organizations around the world to run their IT infrastructures seamlessly and scale their business with ease.

## MILESTONES

1915 Adolf Dätwyler founded the company and began producing electrical conductors using aluminium.

1926 The production of telephone cables began.

1944 The production of high-frequency cables began.

1973 Kaved Ltd. was acquired. The value chain was extended by adding cable harnessing. Datwyler produced the first flat cable for lifts with up to 400 metre shaft height.

1986 The production of fibre optic cables began.

1987 "Uninet" (today: "Datwyler CU") data cables and the future-proof concept for structured building cabling were introduced.

1991 Datwyler Safety cable became the first fire safety cable in the world to successfully pass E90 circuit integrity testing as per DIN 4102-12.

1998 International expansion: Datwyler entered the Chinese market.

2002 Optofil Safety (today: "Datwyler FO Universal ... Safety") became the first metal-free fibre optic cable with E30 circuit integrity as per DIN 4102-12.

2005 Datwyler significantly expanded its international distribution network.

2008 Datwyler introduced pre-assembled trunk (multiple) cables and high-density systems that specifically address the demand for efficient data centre cabling.

2009 Datwyler offered complete turnkey solutions for data networks, data centres and FTTx networks.

2010 Datwyler became full service main contractor for several FTTx projects in Switzerland. Introduction of FTTH special cables and wall outlets.

2011 Datwyler opened a branch in Dubai.

2012 Renaming to "Datwyler Cabling Solutions AG" in Switzerland (1 Nov 2012).

2013 Acquisition by Pema Holding AG. The first Cat. 8 data cable "CU 8203 4P" was introduced.

2015 Datwyler introduced "FO Outdoor wbKT Micro Combi", the first mini hybrid cable for NGN and NGA networks.

2016 The Cat.7 data cable "CU 7000 4P Home" with a diameter of only 5.8 mm and the "FO Outdoor wbKT S-Micro 12x24" with a diameter of only 10.4 mm were introduced.

# QUALITY

## QUALITY ASSURANCE

Of course, our management system is ISO 9001, ISO 14001 and BS 18001 certified.

## QUALITY SERVICE

At Datwyler, we keep all the major components for our system solutions in stock at all times, and can therefore guarantee fast delivery. We can answer any query promptly and efficiently, with careful consideration towards the current and future requirements of our clients. Our engineering teams deliver projects on time and within budget, and to the correct specification.

## STATE OF THE ART TECHNOLOGY

Datwyler invests year-on-year in improved material and process technologies, production equipment and test methods. This is why our system solutions regularly exceed industry expectations. We set new standards.

## QUALITY AS A CONSTANT MISSION - WITHOUT COMPROMISE

In practice, the important functions that our system solutions provide demand the highest levels of safety and reliability. We therefore test and validate every product and system solution using most stringent quality-control. Quality without compromise is a constant expectation for all of our employees. It is also our guarantee to our customers.

## WE SURPASS ALL INDUSTRY STANDARDS

Within the development phase of every product, Datwyler defines quality specifications that go beyond the usual industry standards. In addition to general quality-control inspections, our products undergo application-specific testing. With the help of qualified specialists, Datwyler has developed a series of sophisticated test machines specifically for this purpose. We use these to measure every type of cable and every system component against our own rigorous quality specifications. Such extreme testing procedures ensure that all Datwyler's systems will maintain their integrity, even under the most demanding conditions.

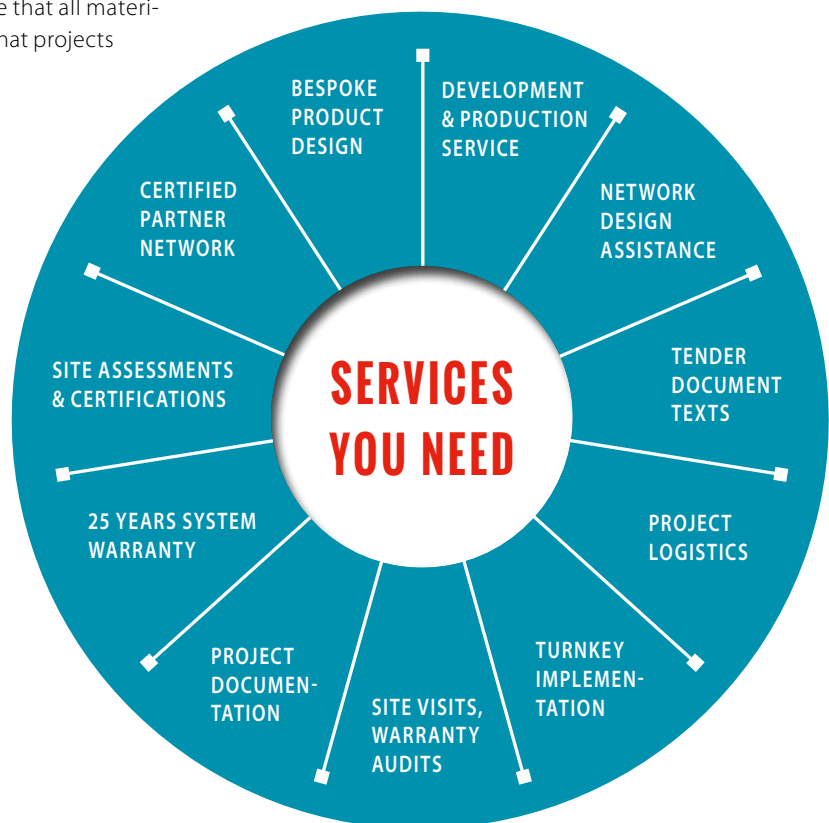

## TURN-KEY PROJECTS

Datwyler serves as your single global contact for cabling and electrical infrastructure projects. We will ensure quality standards adhered to, and that projects are delivered on time and on budget. Through our certified partner network we are able to efficiently roll-out complete solutions and multi-site projects all over the world. Our transparent project reporting provides our clients with the ability to know the exact status of the project at any time. Comprehensive documentation further ensures the quality of the work.

Material logistics plays an important part in multi-site projects. Together with our logistics partners we ensure that all materials are on-site precisely on schedule, in order that projects can be delivered on time.

## SERVICES

Datwyler offers a comprehensive range of services that cover the whole life-cycle of your cabling and electrical infrastructure. These services that we offer in close co-operation with our certified partners include consulting, engineering, implementation and maintenance:

# THE EUROPEAN CONSTRUCTION PRODUCTS REGULATION (CPR) EU 305/2011

Since 1st July 2017 cable manufacturers have been obliged to test power cables and lines as well as control and communication cables permanently incorporated in construction works (fixed installation) for reaction to fire performance requirements in accordance with the new harmonised Standard EN 50575, and to classify and market them with a Declaration of Performances (DoP). The import of products from countries outside Europe makes the importer - according to the CPR - a manufacturer who is responsible for the correct product certification and for putting it on the market.

The EU Commission has approved European test laboratories as notified bodies to test and evaluate the reaction to fire performance of cables for this additional task. The product characteristics of a "construction product" cable must be determined and confirmed by a notified body. By the same token the manufacturer's production facility must be subject to ongoing production control by the notified body.

Following product assessment and production monitoring the notified body authorises the manufacturer to deliver his products with the CE mark and to issue a DoP.

#### The following criteria are evaluated when testing is carried out in compliance with EN 50575:

- Heat of combustion
- Thermal release
- Vertical flame propagation
- Smoke generation
- Flaming droplets/particles of plastics materials which can contribute to fire propagation
- Acidity

#### The results of this test should be assigned to the following seven cable classes (Euroclasses):

Main class	Description
A <sub>ca</sub>	Non-flammable, no contribution to fire; products such as mineral-insulated cables and lines
B1 <sub>ca</sub>	Low flammability, very limited contribution to fire
B2 <sub>ca</sub> , C <sub>ca</sub>	Very limited or limited contribution to fire; cables/ lines without continuous flame propagation; limited fire development and thermal release rate
D <sub>ca</sub>	Acceptable contribution to fire; products with continuous fire propagation; moderate fire development and thermal release rate
E <sub>ca</sub>	Normally flammable; cables and lines with acceptable fire behaviour which have flame-retardant characteristics when exposed to a small pilot flame
F <sub>ca</sub>	Easily flammable; this cable can ignite when exposed to a small flame

**Additional classifications** are to be determined for classes B1<sub>ca</sub> to D<sub>ca</sub>. The fire-critical parameters have been identified as smoke generation, flaming droplets of cable material and the acidity of the combustion gases:

**Additional classes for smoke generation in cables:**

<b>s1</b>	slight smoke generation
<b>s2</b>	moderate smoke generation
<b>s3</b>	severe smoke generation

**Additional classes for flaming droplets/particles in cables:**

<b>d0</b>	no flaming droplets
<b>d1</b>	short-lived flaming droplets
<b>d2</b>	persistent flaming droplets

**Additional classes for acidity in cables:**

<b>a1</b>	slightly corrosive flue gases
<b>a2</b>	moderately corrosive flue gases
<b>a3</b>	severely corrosive flue gases

**You will find up-to-date information** on the classification of our relevant cables and lines in the product data sheets. Declarations of Performance have been provided with the delivery documentation since 1st July 2017. If a copy of the Declaration of Performances is needed it can be requested via the Datwyler contact address of the relevant country. Declarations of Performance are also available for downloading on the Datwyler website.

The European Construction Products Regulation (CPR) regulates the placing of construction products on the European market – but not their use in construction work. The selection and use of construction products are the responsibility of the European Member States. The requirements governing which fire protection class is specified for which location therefore differ from country to country. Installers and specialist planners must check and comply with the relevant local regulations.

In many countries there were still no mandatory requirements governing the use of fire classes in buildings at 1st July 2017. Where there are still no minimum mandatory legal requirements, there are generally recommendations by the CPR professional associations for application in the relevant countries.

Cables without “CPR classification” may still be installed and used providing there are no national requirements relating to the use of classified cables under Construction Products Regulation. If there already are national requirements relating to application, the use of such cables should be clarified with the authorities responsible.

Cables covered by the CPR but placed on the European market before 1st July 2017 and bearing the CE mark in accordance with the Low Voltage Directive (LVD) may continue to be sold on for an indefinite period.

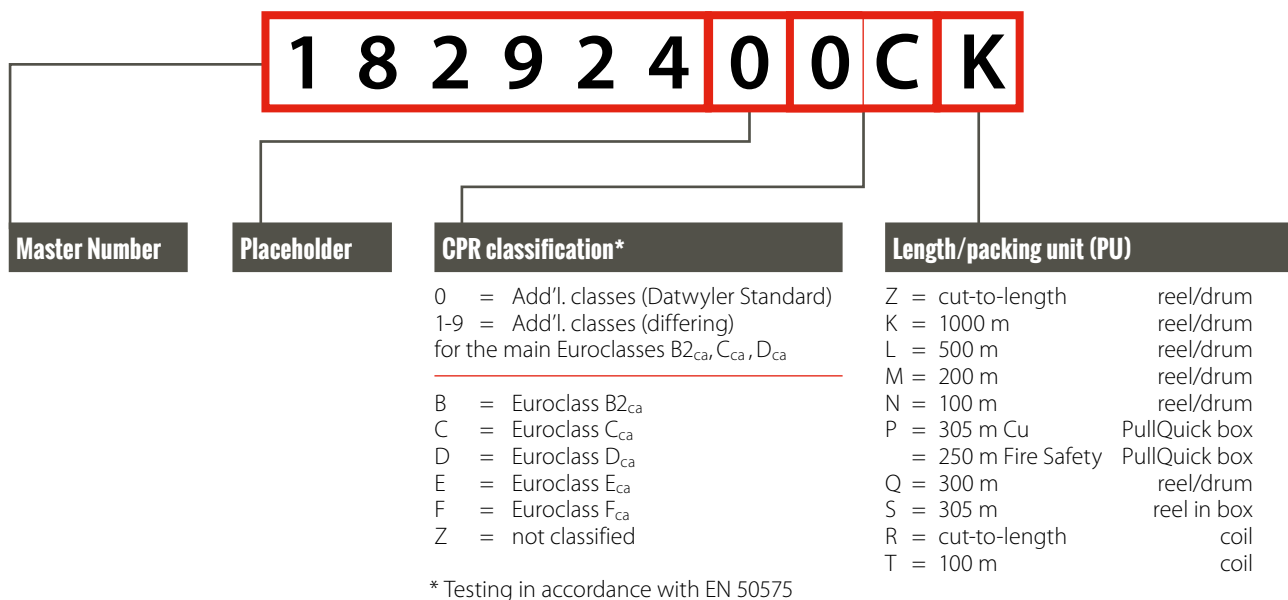

## EXTENDED ARTICLE NUMBERS

In 2017, Datwyler began to gradually extend the article numbers of its cables and other products from 6 to 10 digits. This extension provides our customers with important additional information. The first 6 digits show the “master number” of the articles.

The 9th letter indicates the main Euroclass (“reaction to fire” according to the CPR, European Construction Products Regulation No. 305/2011). The 8th digit stands for the additional classes. The 10th letter shows the packaging (cable length or packing unit).

### The key to the 10-digit article number:

As a result of this extension some article numbers have been integrated into the new ones and some totally replaced.

#### Note:

Our cables are not available in any CPR classification and any length or packing unit (PU) mentioned above. Please refer to our website for the different versions on offer. Here you can also find the Declarations of Performance (DoP) as PDF files for download.

## STATEMENT FROM DATWYLER

As an environmentally conscious manufacturer and supplier of cabling solutions it is our concern not to use any environmentally harmful substances in our products.

Based on current information, the hereinmentioned regulations and directives for substances are fully complied with wherever applicable.

### ROHS

DIRECTIVE 2011/65/EU  
OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 8 June 2011  
on the restriction of the use of certain hazardous substances  
in electrical and electronic equipment

### WEEE

DIRECTIVE 2012/19/EU

# COPPER SOLUTIONS

## High-grade copper system solutions

Datwyler develops, manufactures and distributes high-grade and futureproof network infrastructure solutions based on copper cabling technology - from analogue telephony to 10- and 40-gigabit Ethernet. These system solutions set standards for quality, reliability and performance and meet all media coverage needs.

With Datwyler copper cabling systems you can always keep up with the constantly increasing transfer rates and exploit the full potential of networks. Thus, they offer high investment security for the future.

The comprehensive product range extends from single cables and components to complete end-to-end systems. The modular solutions of Datwyler are suitable for all sizes and types of Local Area Networks (LANs), comms rooms and data centres.

## COPPER CABLING SYSTEM

The Datwyler product portfolio includes shielded and unshielded copper technology system solutions for the transmission of analog and digital voice, image, multimedia and data signals as well as control signals and remote power (PoE to 4PPoE).

On the following pages you will find our recommendations for copper data networks with transmission speeds of 1 Gbit/s, 10 Gbit/s and more – i.e. for all your applications in office environments and data centres. Here you can also basically choose between especially future-proof “high-end” and “premium” solutions as well as cables and components which are very popular with our customers due to their cost-effectiveness or optimum price-performance ratio.

The demands on cabling systems continue to grow at a rapid pace. A shielded 10 Gbit/s copper solution from Datwyler brings such high performance to your office environment that it also equips your network infrastructure for future technologies (page 14f). These days it is vital to plan well ahead in a data centre environment as well, in order to be prepared for further technological advances (page 22f).

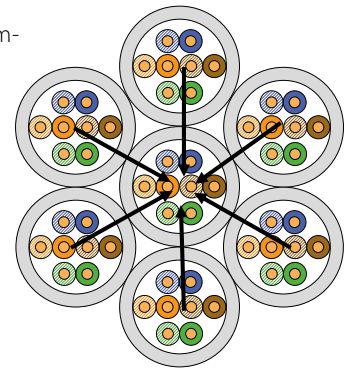

## SHIELDED VS. UNSHIELDED

The higher the demands on data infrastructure, the greater the influence will be from the surrounding systems. As part of the ISO 11801:2017-11 standard, new parameters have been set against Coupling Attenuation and Alien Cross Talk. These parameters demand an error-free 1GBase-T and 10GBase-T application.

An independent analysis within a third party laboratory has highlighted the problem from outside influence. A mobile phone within the area of a 1GBase-T application can create interference on a 1GBase-T unshielded application.

Datwyler therefore recommends shielded Channel solutions for guaranteed performance on a secure network.

- DATWYLER CABLES**
- + DATWYLER COMPONENTS**
- + QUALITY ENGINEERING**
- = 25-YEAR SYSTEM WARRANTY**

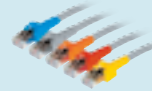

The sophisticated Datwyler training and certification programme for installation partners guarantees the optimal installation quality of our products. Certified installers can offer a Datwyler warranty for the installed systems: normally for 25 years, but this can be extended depending on project criteria.

# DATWYLER LINK RECOMMENDATIONS

## High-End Link: greatest headroom, PoE++/4PPoE, future-proof

Highest bandwidth reserve capacities and power transmission to the workplace over the LAN cabling system - up to 96 W for end devices such as computers, monitors, cameras and telephones.

## Premium Link: good headroom, PoE++/4PPoE, future-proof

High bandwidth reserve capacities and power transmission to the workplace over the LAN cabling system - up to 96 W for end devices such as computers, monitors, cameras and telephones.

## Most Economical Link

The solution which is most commonly used by Datwyler customers for the transmission of voice, video, multimedia and data signals.

### CU 7702

4P / 2x4P, Cat.7<sub>A</sub>, AWG22

### CU 7080

4P / 2x4P, Cat.7, AWG23

### CU 6502

4P / 2x4P, Cat.6<sub>A</sub>, AWG23

The colours indicate which cables and components are correlated.

Please find the product data sheets and link performance certificates on the Datwyler website. Besides the article numbers you will also find the respective Declarations of Performances (DoPs according to CPR) as PDF files for downloading.

This overview provides recommended cables and components which are the best fit to your current and future requirements.

**Please note the recommended links on the following pages which are highlighted in different colours.**

### Most Popular Link

which offers the best price-performance ratio for the transmission of digital and analogue voice, video, multimedia and data signals.

#### CU 7060

4P / 2x4P, Cat.6<sub>A</sub>, AWG23

#### KS-T Plus 1/8

tool-less, Cat.6<sub>A</sub>

#### RJ45 patch cord\*

Cat.6<sub>A</sub> (IEC)

### Unshielded Link, 10GB UTP with high capacity reserves

for the transmission of digital and analogue voice, video, multimedia and data signals.

#### CU 692

4P, Cat.6<sub>A</sub>, AWG23

#### KU Plus 1/8

Cat.6<sub>A</sub>

\* to complete the Channel use.

# COPPER SOLUTIONS - 10 Gbit/s STP

## DATA CABLES CATEGORY 7<sub>A</sub>, 7 AND 6<sub>A</sub>

- Copper data cables, up to 1000 MHz, 4 x 2 x AWG23, for structured premises cabling
- Applicable up to 10GBase-T
- Applicable standards: EN 50173-1:2002, ISO/IEC 11801:2002/A2:2010

# COPPER SOLUTIONS - 25/40 Gbit/s STP

## DATA CABLE - CATEGORY 8

- Copper data cables, up to 2000 MHz, 4 x 2 x AWG23, for structured premises cabling
- Applicable standards: EN 50173-1:2002, ISO/IEC 11801:2002/A2:2010
- Application up to 40GBase-T, reserves for future applications
- Optimized for broadband video signals, e.g. analogue and digital TV signals
- PoE+ and PoE++/4PPoE-ready
- Particularly suitable for Class I and Class II networks

### CU 8203 4P, S/FTP, AWG 23, shielded

### GG45™ Connecting System

Measurement / Patch cord GG45 7<sub>A</sub>, 1000 MHz, 4P, shielded  
Adapter patch cord PS-GG45 / RJ45, 4P, shielded

- The measurement cords PS-GG45 7<sub>A</sub>, 1000 MHz, 4P, are primarily needed for acceptance measurements.
- The PS-GG45 plugs are not backward compatible with RJ45 jacks.
- The combination of a high-performance PS-GG45 cabling system with RJ45 active devices can only be achieved with adapter patch cords (PS-GG45 to RJ45).

### PS-TERA 4P/2P to RJ45 with flex cable CU 7702 flex

- Recommended especially for multimedia cabling.
- Cable type: CU 7702 flex 4P (PiMF), FRNC/LSOH, up to 1000 MHz, shielded.
- Applicable standards: ISO/IEC 11801 2nd Ed. Amd.2 EN 50173: 2007.
- For Class F<sub>A</sub>/ Cat. 7<sub>A</sub> both ends of the patchcord are wired up with a PS-TERA 4P plug.

# COPPER SOLUTIONS

## Pre-assembled trunk cables

### COPPER TRUNKS

#### Connectors & cable types

Pre-assembled trunk cables are fabricated using high-performance cable products which are supplied in combination with different performance levels of modules and connectors.

The products are delivered in the lengths requested by the customer and have already been tested and certified in accordance with the latest standards.

This provides installers and operators, particularly in data centers, with products which make it possible to install even extensive copper-based systems to the highest quality in a very short time.

**Tailor-made pre-terminated copper trunk assemblies, in the requested lengths, with customized imprints on the single cables, with the requested modules or plugs, 100% pre-tested, with measurement reports!**

#### Modules and plugs for trunks

type	application	construction	compatible with cable
<b>Category 7<sub>A</sub> modules / Class 7<sub>A</sub></b>			
 PS-GG45 7 <sub>A</sub> 4P (Cat. 7 <sub>A</sub> )	min. 10Gbase-T	shielded	flex / solid
 PS TERA 4P Cat. 7 <sub>A</sub>	min. 10GBase-T	shielded	solid
<b>Category 6<sub>A</sub> modules / Class E<sub>A</sub></b>			
 RJ45 module KS-T Plus 1/8 Cat. 6 <sub>A</sub> (IEC)	up to 10GBase-T	shielded	flex / solid
<b>Category 6/6<sub>A</sub> plugs / Class E<sub>A</sub></b>			
 RJ45 plug 4P Cat. 6 <sub>A</sub>	up to 10GBase-T	shielded	flex / solid
 RJ45 plug 4P Cat. 6	up to 10GBase-T	shielded	flex / solid

#### Cable types for trunks

type	max. Class	application	Ø [mm]	max. length [m]
<b>Solid BOL (Breakout light) cables</b>				
6-fold CU 7002 6x4P	F	min. 10GBase-T	21.2	85
<b>Flexible BOL (Breakout light) cables</b>				
6-fold CU 7702 6x4P flex	F	min. 10GBase-T	17.6	60
12-fold CU 7702 12x4P flex	F	min. 10GBase-T	22.2	60
<b>Flexible tube cables</b>				
3-fold CU 7702 3x4P flex	F	min. 10GBase-T	12	60
6-fold CU 7702 6x4P flex	F	min. 10GBase-T	20	60
8-fold CU 7702 8x4P flex	F	min. 10GBase-T	22	60
12-fold CU 7702 12x4P flex	F	min. 10GBase-T	27	60
16-fold CU 7702 16x4P flex	F	min. 10GBase-T	32	60

### Length determination & design of pre-assembled copper trunks

### Dimensions

**Flexible BOL cable** 12-fold  
CU 7702 12x4P flex

**Solid BOL cable** 6-fold  
CU 7002 6x4P

**Flexible BOL cable** 6-fold  
CU 7702 6x4P flex

### Length definition

The following criteria are decisive for all pre-assembled Datwyler copper trunks:

- L** = Length between dividers / fixing points (= purchase order length)
- A** = Type of assembly side A:  
as required / depending on application, legs graded in length or of equal length
- B** = Type of assembly side B:  
as required / depending on application, legs graded in length or of equal length

### CONSOLIDATION POINT BOXES

#### for one 24-port front plate

##### Dimensions

W x H x D: 480 x 55 x 190 mm (with lock: H = 57 mm)

#### for one 12-port front plate

##### Dimensions

W x H x D: 260 x 55 x 190 mm (with lock: H = 57 mm)

#### for one 6-port front plate

##### Dimensions

W x H x D: 156 x 55 x 190 mm (with lock: H = 57 mm)

#### Application

For the termination of data cables in a Consolidation Point (CP), typically installed in raised floors.

#### Front plate 24x, 12x and 6x MGK, suitable for the following Datwyler modules:

- PS-GG45 7<sub>A</sub> 4P Cat. 7<sub>A</sub> shielded
- RJ45 module KS-T Plus 1/8 Cat. 6<sub>A</sub> shielded
- RJ45 module KS-TS 1/8 Cat. 6/E<sub>A</sub> shielded
- RJ45 module KS-T 5 1/8 Cat. 5e shielded
- RJ45 module KU-T 1/8 Cat. 6 / Cat. 5e unshielded

Article No.	Description	Material	PU
417489	Consolidation Point box, 24 ports (delivery without front plate)	steel sheet, galvanized	1 pc.
417490	Front plate FP 24x MGK for 24-port CP box	steel sheet, galvanized	1 pc.
417483	Consolidation Point box, 12-port (delivery without front plate)	steel sheet, galvanized	1 pc.
417484	Front plate FP 12x MGK for CP box 12-port	steel sheet, galvanized	1 pc.
417487	Consolidation Point box 6-port (delivery without front plate)	steel sheet, galvanized	1 pc.
417488	Front plate FP 6x MGK for CP box 6-port	steel sheet, galvanized	1 pc.
417485	Lock for Consolidation Point box, keyed alike	steel sheet, galvanized	1 pc.

### ACCESSORIES

#### RJ45 coupler, shielded

##### Application

Suitable for setting up Consolidation Points and Cross-Connect wirings. For the transmission of all digital and analogue applications up to Cat. 6 (Link) / Class E

RJ45 feed-trough coupler  
Cat. 6 Link/Class E, 90°, angled

RJ45 Keystone coupler,  
Cat. 6 Link/Class E, 180°, straight

#### Field assembly plug

RJ45 plug IP20, Cat. 6<sub>A</sub>,  
shielded, field assembly

Article No.	Description	Colour/Material	PU
417445	RJ45 feed-trough coupler Cat. 6 Link/Class E, 90°, angled	metal	1 pc.
418056	RJ45 Keystone coupler, Cat. 6 Link/Class E, 180°, straight	metal	1 pc.
417523	RJ45 plug IP20, Cat. 6 <sub>A</sub> , shielded, for field assembly	black	1 pc.

#### Rail adapters

Rail adapter Keystone  
IP20

Rail adapter Keystone

Article No.	Description	Colour/Material	PU
418026	Rail adapter Keystone IP20 for 1 module with Keystone fitting (delivery without module)	grey	1 pc.
418025	Rail adapter Keystone for 1x KS-T/KU-T (delivery without module)	metal	1 pc.

# FIBRE OPTIC SOLUTIONS

## Conclusive fibre optic systems

Datwyler, as an experienced and innovative cable manufacturer, supplies complete fibre optic cabling solutions - including services and support in the areas of consultation, planning, engineering, design, development, training, installation and documentation, if requested.

Datwyler has a comprehensive offering of fibre optic cables and components for high-density, high-speed data network solutions.

Our solutions are designed, overall and in detail, to fully meet the demands of the future. They are adapted to meet customer's needs and ensure a network infrastructure that will support future applications for a long time to come.

## PREMISES NETWORKS

Horizontal (Desk)	Riser	Data Centre	Backbone (Campus)
The horizontal serves the desk or application workspace	The riser joins together equipment in a floor-level telecommunications closet and upper floor closets or zones.	The data centre is a facility dedicated to data-intensive applications, where racks of interconnected equipment manage large amounts of information.	The backbone is typically the longest run in a premises network, often interbuilding.

### Application spaces

From a communications pathway perspective, premises networks consist of four primary spaces:

<b>Backbone (Campus)</b>	OS2, OM3, OM4
<b>Data Centre</b>	OS2, OM3, OM4
<b>Riser</b>	OS2, OM3, OM4
<b>Horizontal (Desk)</b>	OM2, OM3

The premises network outlined on the right side, or portions thereof, may also be called a local area network (LAN) or enterprise network.

### Top 5 design considerations

- Link length
- Application
- Future performance
- Power budget
- Environmental requirements

### Two major fibre classifications

The two major classifications of optical fibre are single-mode and multimode.

## SINGLE-MODE FIBRE

Single-mode fibres are best suited for longer distance applications (>1 km). Single-mode fibre is designed to carry only one mode of light, and thus does not experience modal dispersion like multimode fibre. For this reason, single-mode fibre is not limited by modal bandwidth, but rather by attenuation, chromatic dispersion and higher overall system cost (driven by the higher cost of single-mode transceivers).

Single-mode E9/125

### Optical single-mode fibre cable transmission performance parameters

Classification	Optical fibre and cable type	Application	Wavelength [nm]	Maximum attenuation [dB/km]	Maximum attenuation Datwyler G.652.D (OS2) [dB/km]	Maximum attenuation Datwyler G.652.D (BOL) (OS2 bend optimized) [dB/km]
ITU-T G.652.D	Single-mode	Backbone (Campus)	1310	0.4	0.34	n/a
OS2	Universal / Outdoor		1550	0.3	0.21	n/a
ITU-T G.652.D (BLO)	Single-mode	Backbone (Campus)	1310	0.4	n/a	0.34
OS2 bend optimized	Universal / Outdoor		1550	0.3	n/a	0.21
ITU-T G.652.D	Single-mode	Backbone (Riser)	1310	0.4	0.36 (0.34 typical)	n/a
OS2	Indoor / Universal		1550	0.3	0.24 (0.22 typical)	n/a
ITU-T G.652.D (BLO)	Single-mode	Backbone (Riser)	1310	0.4	n/a	0.36
OS2 bend optimized	Indoor / Universal		1550	0.3	n/a	0.23
ITU-T G.652.D	Single-mode	Data Centre	1310	0.4	0.36 (0.34 typical)	n/a
OS2	Indoor / Mini Breakout		1550	0.3	0.24 (0.22 typical)	n/a
ITU-T G.652.D (BLO)	Single-mode	Data Centre	1310	0.4	n/a	0.36
OS2 bend optimized	Indoor / Mini Breakout		1550	0.3	n/a	0.23

The fibre designation (OS2) corresponds to the designation of ISO/IEC 11801 or EN 50173. OS2 is commonly referred to as "low water peak" single-mode fibre and is characterized by having a low attenuation coefficient in the vicinity of 1383 nm.

# FIBRE OPTIC SOLUTIONS

## Overview

### MULTIMODE FIBRE

Multimode fibres are best suited for premises applications where links are less than 1 kilometre and there are many connectors. The larger core diameter of multimode fibre allows the use of inexpensive light emitting diode (LED) and vertical cavity surface emitting laser (VCSEL) transmitters as well as low-cost connectors. Multimode fibre uses a graded index profile to minimize modal dispersion. This design maximizes bandwidth while maintaining large cores for simplified system assembly and lower network costs. For multimode fibres, bandwidth can be the major limiting factor in network design. This has led the industry to exploit the higher intrinsic bandwidth of 50/125 µm fibre when developing higher-performance multimode fibre systems.

Multimode G50/125 or G62.5/125

#### Optical multimode fibre cable transmission performance parameters

Classification	Optical fibre and cable type	Application	Speed	Wavelength [nm]	Maximum attenuation [dB/km]	OFL bandwidth per TIA/EIA 455-204 and IEC 60793-1-41 [MHz x km]	High-performance EMB bandwidth per TIA/EIA 455-220A and IEC 60793-1-49 [MHz x km]
TIA 492AAAB OM2 bend optimized	Multimode 50/125 µm	Horizontal Link Riser	≤ 1 Gb/s	850 1300	2.7 (2.5 typical) 0.7 (0.5 typical)	700 500	≥ 850 n/a
TIA 492AAAC OM3 bend optimized 850 nm Laser- optimized	Multimode 50/125 µm	Horizontal Link Riser Backbone Data Centre	≥ 10 Gb/s	850 1300	2.7 (2.5 typical) 0.7 (0.5 typical)	1500 500	≥ 2000 n/a
TIA 492AAD OM4 bend optimized 850 nm Laser- optimized	Multimode 50/125 µm	Backbone Data Centre	≥ 10 Gb/s	850 1300	2.7 (2.5 typical) 0.7 (0.5 typical)	3500 500	≥ 4700 n/a

The fibre designation (OM1, OM2, OM3 and OM4) corresponds to the designation of ISO/IEC 11801 or EN 50173.

OM3 and OM4 can be realized only with 50/125 µm fibres.

OFL means Overfilled Launch (LED).

EMB means Effective Modal Bandwidth (850 nm VCSEL Laser).

#### Multimode fibre link lengths and data rates

Although fibre bandwidth is a critical factor in determining link length and data rate, it is not the only one. Transmitter and receiver characteristics are equally as important as fibre bandwidth in determining supportable link lengths at specified data rates.

#### Bend optimized multimode fibres (G50/125)

With higher bit-rate transmissions (≥ 10 Gbit/s) the attenuation budgets are constantly decreasing.

Thus, one has to focus on high-grade products when selecting the fibre optic components.

The optical fibres should provide an enhanced transmission reliability and reduce the risks of additional losses that may arise as a result of typical faulty use and of mechanical stress.

This is the reason why Datwyler use the bend optimized G50/125 fibre for OM2, OM3 and OM4 fibre categories:

In case that the minimum bending radius is undercut, this leads not necessarily to failure of a connection.

However, too small bending radii should be avoided to extend the lifetime of fibre optic cables (and optical fibres).

The bend optimized G50/125 fibres are fully compatible with "traditional" G50/125 fibres as described in the standard.

With selected items from our wide range of fibre optic products.

# FIBRE OPTIC SOLUTIONS

## Patch panels

With selected items from our wide range of fibre optic products.  
For more information and products please visit [www.cabling.datwyler.com](http://www.cabling.datwyler.com)

### 19"/1U, unloaded

For the termination of fibre optic cables (breakout, loose tube) - maximum of 96 fibres.  
Applicable with a wide range of front plates / connector systems (see accessories).

#### Description

Housing:	OV-T: metallic, with telescopic slides and locking mechanism OV-S: metallic, extractable drawer with locking mechanism
Rack mounting:	Depth-adjustable mounting of box (5 steps, maximum 50 mm) due to the adjustable 19" mounting brackets
Colour of mounting brackets (variants):	Similar to RAL 7035, similar to RAL 9005 or stainless steel
Capacity:	Up to 96 fibres
Strain relief:	With cable tie and screwed cable gland or cable distributor
Dimensions:	OV-T: 19"/1U, depth 254 mm OV-S: 19"/1U, depth 300 mm

Fibre optic patch panel OV-T, 19"/1U

Fibre optic patch panel OV-S, 19"/1U

#### Connection systems

ST, FC, SCD, SC, LSH, LCD (dependent on front plate)

Article No.	Description	Mounting brackets colour (similar to)	Note
416964	OV-T telescopic 1U	RAL 7035	without front plate
(on request)	OV-T telescopic 1U	RAL 9005	without front plate
415201	OV-S extractable 1U	RAL 7035	without front plate
415203	OV-S extractable 1U	RAL 9005	without front plate

Please order the front plate separately.

### Accessories

	Article No.	Description	Colour (similar to) / Material
	416951	Front plate for 12x SCD/LCQ	RAL 7035
	416952	Front plate for 24x SCD/LCQ	RAL 7035
	416953	Front plate for 24x SC, LSH or LCD*	RAL 7035
	416954	Front plate for 24x ST or FC/PC	RAL 7035
	417279	Front plate for 24x LCD (offset design)	RAL 7035
	417378	Front plate for 12x SCD/LCQ	RAL 9005
	417379	Front plate for 24x SCD/LCQ	RAL 9005
	417374	Front plate for 24x LSH or LCD*	RAL 9005
	417377	Front plate for 24x ST or FC/PC	RAL 9005
	415310	Front plate for 24x LCD (offset design)	RAL 9005
	417550	Angled cable entry M25**	Steel
	417559	Angled cable entry M20**	Steel
	416994	Straight cable entry M20 + M25	Steel
	415308	Straight cable entry M20 + M25**	Steel
	418650	Straight cable entry 1x 20 mm + 2x 15 mm**	Steel
	418652	Angled cable entry 2x 15 mm**	Steel
	415208	Angled cable entry 2x M20**	Steel
	417857	Strain relief M20	Steel
	417858	Strain relief M25	Steel

\* For the LCD Couplers we recommend rather the offset version (Article No. 417279 or 415310) due to the limited accessibility to the connectors for unplugging the patch cords.

\*\* Pre-stamped cables entries can be opened as necessary.

### OV-S, 19"/1U, loaded

#### Splice box with adapters and pigtails

- For the termination of fibre optic cables - maximum of 96 fibres
- Loaded with FO adapters, ready for splicing, with prepared pigtails (per 2 m, colour code: IEC 60304)
- Available with grey (RAL 7035), black (RAL 9005) or stainless steel front plate

**Splice box OV-S, 19"/1U, extractable,**  
Example with 24 SCD adapters / 48 pigtails

Article No.	Description	Loaded with	Colour of front plate
415210	Splice box OV-S, extractable, 1U	6x LCD adapter, blue polymer housing with ceramic sleeve and 12 LC pigtails 2m E09/125µm OS2	RAL 7035
415211	Splice box OV-S, extractable, 1U	6x LCD adapter, beige polymer housing with ceramic sleeve and 12 LC pigtails 2m G50/125µm OM2	RAL 7035
415212	Splice box OV-S, extractable, 1U	6x LCD adapter, turquoise polymer housing with ceramic sleeve and 12 LC pigtails 2m G50/125µm OM3	RAL 7035
415213	Splice box OV-S, extractable, 1U	6x LCD adapter, violet polymer housing with ceramic sleeve and 12 LC pigtails 2m G50/125µm OM4	RAL 7035
415214	Splice box OV-S, extractable, 1U	12x LCD adapter, blue polymer housing with ceramic sleeve and 24 LC pigtails 2m E09/125µm OS2	RAL 7035
415215	Splice box OV-S, extractable, 1U	12x LCD adapter, beige polymer housing with ceramic sleeve and 24 LC pigtails 2m G50/125µm OM2	RAL 7035
415216	Splice box OV-S, extractable, 1U	12x LCD adapter, turquoise polymer housing with ceramic sleeve and 24 LC pigtails 2m G50/125µm OM3	RAL 7035
415217	Splice box OV-S, extractable, 1U	12x LCD adapter, violet polymer housing with ceramic sleeve and 24 LC pigtails 2m G50/125µm OM4	RAL 7035
415218	Splice box OV-S, extractable, 1U	24x LCD adapter, blue polymer housing with ceramic sleeve and 48 LC pigtails 2m E09/125µm OS2	RAL 7035
415219	Splice box OV-S, extractable, 1U	24x LCD adapter, beige polymer housing with ceramic sleeve and 48 LC pigtails 2m G50/125µm OM2	RAL 7035
415220	Splice box OV-S, extractable, 1U	24x LCD adapter, turquoise polymer housing with ceramic sleeve and 48 LC pigtails 2m G50/125µm OM3	RAL 7035
415221	Splice box OV-S, extractable, 1U	24x LCD adapter, violet polymer housing with ceramic sleeve and 48 LC pigtails 2m G50/125µm OM4	RAL 7035
415275	Splice box OV-S, extractable, 1U	24x LCQ adapter, blue polymer housing with ceramic sleeve and 96 LC pigtails 2m E09/125µm OS2	RAL 7035
415299	Splice box OV-S, extractable, 1U	24x LCQ adapter, beige polymer housing with ceramic sleeve and 96 LC pigtails 2m G50/125µm OM2	RAL 7035
415298	Splice box OV-S, extractable, 1U	24x LCQ adapter, turquoise polymer housing with ceramic sleeve and 96 LC pigtails 2m G50/125µm OM3	RAL 7035
415295	Splice box OV-S, extractable, 1U	24x LCQ adapter, violet polymer housing with ceramic sleeve and 96 LC pigtails 2m G50/125µm OM4	RAL 7035

All pigtails are coloured (in accordance with IEC 60304), stripped and stored in splice tray.  
Black or stainless steel front plates as well as other couplers are available on request.

### OV-S, 19"/1U, loaded

#### Breakout box with adapters

- For the termination of pre-assembled fibre optic cables - maximum of 96 fibres
- Loaded with a maximum of 12/24 FO adapters.

**Breakout box OV-S, 19"/1U, extractable,**  
configuration example with 6 SCD adapters

Article No.	Description	Loaded with	Colour of front plate
415250	Breakout box OV-S, extractable, 1U	6x LCD SM adapter, blue polymer housing with ceramic sleeve	RAL 7035
415251	Breakout box OV-S, extractable, 1U	6x LCD MM adapter, beige polymer housing with ceramic sleeve	RAL 7035
415252	Breakout box OV-S, extractable, 1U	6x LCD MM adapter, turquoise polymer housing with ceramic sleeve	RAL 7035
415253	Breakout box OV-S, extractable, 1U	6x LCD MM adapter, violet polymer housing with ceramic sleeve	RAL 7035
415254	Breakout box OV-S, extractable, 1U	12x LCD SM adapter, blue polymer housing with ceramic sleeve	RAL 7035
415255	Breakout box OV-S, extractable, 1U	12x LCD MM adapter, beige polymer housing with ceramic sleeve	RAL 7035
415256	Breakout box OV-S, extractable, 1U	12x LCD MM adapter, turquoise polymer housing with ceramic sleeve	RAL 7035
415257	Breakout box OV-S, extractable, 1U	12x LCD MM adapter, violet polymer housing with ceramic sleeve	RAL 7035
415258	Breakout box OV-S, extractable, 1U	24x LCD SM adapter, blue polymer housing with ceramic sleeve	RAL 7035
415259	Breakout box OV-S, extractable, 1U	24x LCD MM adapter, beige polymer housing with ceramic sleeve	RAL 7035
415260	Breakout box OV-S, extractable, 1U	24x LCD OM3, turquoise polymer housing with ceramic sleeve	RAL 7035
415261	Breakout box OV-S, extractable, 1U	24x LCD OM4, violet polymer housing with ceramic sleeve	RAL 7035
415207	Breakout box OV-S, extractable, 1U	24x LCQ SM adapter, blue polymer housing with ceramic sleeve	RAL 7035
415278	Breakout box OV-S, extractable, 1U	24x LCQ MM adapter, beige polymer housing with ceramic sleeve	RAL 7035
415280	Breakout box OV-S, extractable, 1U	24x LCQ MM adapter, turquoise polymer housing with ceramic sleeve	RAL 7035
415296	Breakout box OV-S, extractable, 1U	24x LCQ MM adapter, violet polymer housing with ceramic sleeve	RAL 7035

Black or stainless steel front plates as well as other couplers are available on request.

## Connector termination

### Connector termination: Optical performance values

Datwyler offers a broad range of terminated connectors for individual customer needs. These can be supplied in Simplex as well as in Duplex variants. Most types are available as APC/HRL variants, too. We are also able to deliver terminations for higher optical performance requirements.

Ferrule material: Zirconia  
 MT-RJ and MPO: Polymer  
 Lifetime: 1000 connections with stable attenuation values  
 Test conditions IL: IEC 61300-3-4  
 Test conditions RL: IEC 61300-3-6  
 Reproducibility of the IL value: During the whole lifetime a maximum of +/- 0.1 dB  
 Operating temperature: -10° C up to +60° C

Connector	IL [dB] typical	IL [dB] maximum	RL [dB] typical	RL [dB] minimum	Grade (IEC 61755)
MM	0.15	0.3	35	30	better than Bm2m
SM	0.15	0.3	55	50	better than B2
SM/APC	0.15	0.3	70	65	better than B1
MTP®/MPO MM	0.1	0.35	25	20	better than Bm2m
MTP®/MPO SM	0.1	0.35	65	60	better than C1

All connectors are tested with our Simplex, Duplex and Mini Zipcord cables as well as our pigtailed.

#### Please note

Our single fibre cables and the connectors of our Duplex patch cables are marked with cable clips "A" and "B".

There is a single Duplex clip enclosed to enable a change of polarity.

Wiring of a FO Duplex patch cable A to B

MTP® is a registered brand name of US Conec.

Please visit our website for more information and products

## FIBRE-OPTIC TRUNKS

### Pre-assembly of loose-tube cables with all current FO connector types

#### Trunk termination

- Up to 144 fibres, with all current FO connectors
- After the divider (screwable) each single fibre is protected by aramide yarn and has its own sheath
- More than 48 fibres: comes with 3-step (cascaded) fibre distribution
- Single fibre termination graded in length (max. 2 m after divider)
- Comes in crush-resistant hose (IP67), optional with braided sleeving only
- Delivery with optical attenuation measurement report (with OTDR: optional at an extra charge)

**Trunk termination** (Article numbers are valid for FO connector termination on one side only)

Number of fibres	Multimode connector types				Single-mode connector types

### Pre-assembly of breakout cables with all current FO connector types

#### Breakout assembly

- Termination of up to 24 single-fibre cables, with all current FO connectors
- Single fibre termination optionally graded in length
- Delivery with optical attenuation measurement report
- Comes in braided sleeving (optional at an extra charge: with cable gland and/or crush-resistant hose protection)

#### Breakout assembly

Breakout assembly	Connector type	Number of connectors	Multimode fibre Article No.	Single-mode fibre Article No.
on one cable end	SC	4	1410596	415023
on one cable end	SC	8	1410597	415024
on one cable end	SC	12	1410598	415025
on one cable end	SC	24	415083	415081
on one cable end	LC	4	415085	415090
on one cable end	LC	8	415086	415091
on one cable end	LC	12	415087	415092
on one cable end	LC	24	415088	415093

**Attention: Please order the breakout cable separately - according to your individual needs!**

**When ordering a trunk cable please ensure that the specified length of the trunk cable is defined by the length of the longest single-fibre cable! This means: The total length of the trunk cable is the length of the cable between the two splits plus the additional lengths of the longest single-fibre cable on both sides. You can find the lengths of the single-fibre elements in the installation manual on the Datwyler website.**

# FIBRE OPTIC SOLUTIONS

## Pre-assembled trunk cables

### FLEXIBLE TRUNKS

#### Length determination & design of pre-assembled FO trunks

#### Description

A Datwyler FO flexible trunk consists of up to 24 single fibre cables (per 2.0 mm) that are combined in a sturdy HDPE braided hose and have pre-assembled connectors on both ends. FO flexible trunks come in customized lengths and gradations. This solution is suitable especially for data centre cabling, rack-to-rack connections and multiple patch links. Delivery with optical attenuation measurement report.

#### Length definition

The following criteria are decisive for all pre-assembled Datwyler FO trunks:

- L** = Length between dividers / fixing points (= purchase order length)
- A** = Type of assembly side A: as required / depending on application, legs graded in length or of equal length
- B** = Type of assembly side B: as required / depending on application, legs graded in length or of equal length

# HIGH DENSITY PATCH SOLUTION

## **Datwyler's modular High Density Patch Solution is characterised by its port density and flexibility**

The modular High Density Patch Solution (HDPS) is the ideal solution for fibre optic data networks of all kinds and sizes, in particular in data centres. Thanks to its high-quality construction and great flexibility, it can meet practically any challenge that the market can throw at it.

The HDPS modular panel can be equipped with up to 144 fibres per rack unit using preassembled HDPS MTP cassettes. It offers the highest port density currently available for space-saving installations. The solution can also be scaled to match the user's needs (pay-as-you-grow). The modular design minimises disruption in the rack as the HDPS panel can be separated into three horizontal patch segments, from which each individual segment can be pulled out independently and maintained.

Furthermore HDPS MTP cassettes can be taken out, maintained and reinserted very easily from the front as well as from the back of the rack.

It is a solution that allows provision for future growth. Each panel has up to 12 cassettes, so it is possible to reserve sufficient slots for future expansions.

# HIGH DENSITY PATCH SOLUTION

## Patch panels and cassettes

### PATCH PANEL

#### HDPS modular panel, 19"/1U to take 12 HDPS MTP cassettes

- Sturdy metal housing with base, upper cover and front 19"/1U mounting brackets
- Pre-assembled with 6 sliding support frames – each of which can take 2 pre-terminated HDPS MTP cassettes
- The hinged front plate can be dropped down. It allows for port labelling on the reverse
- The panel can be used as a high-density solution for up to 72 duplex ports (144 fibres) in a single rack unit (1U)
- It will accept up to 12 pre-terminated HDPS MTP cassettes which are used to connect to pre-assembled LCD or MTP® trunk or breakout cables or fibre optic cables which are spliced in-situ
- Dimensions (W x H x D): 483 x 44.4 x 500 mm
- Can be combined with various blanking panels and management panels from the Datwyler range

Article No.	Description	Colour	PU
240691	HDPS modular panel, 19"/1U (delivery without cassettes)	black	1 pc.

### CASSETTES

#### HDPS MTP cassettes, 1x MTP to 6x LCD for HDPS modular panel, for OM3, OM4, OS2 fibre

- Polycarbonate (PC) housing with aluminium cover
- Front panel equipped with 6 LC duplex adapters (ceramic sleeves)
- At the rear each HDPS cassette has 1 MTP Elite® coupler (12F) which is routed to the front adapters by way of an internal fanout (High P) and integrated fibre management
- Can be easily inserted into one of the panel's sliding support frames
- The sliding hardware with guide handle (at the rear) allow for easy installation and maintenance
- Suitable for all high-performance applications with duplex signals particularly in the data centre environment
- Used to accept pre-assembled MTP trunk cables – for quick and simple installations
- Packing densities of up to 144 fibres on 1U are achieved
- Assembled to a very high quality – guarantees optimum values for optical performance (IL/RL)
- Delivery inclusive of test reports for fanout
- Dimensions (W x H x D): 91 x 12 x 163 mm

Article No.	Description	Colour	PU

# DATWYLER DATA CENTRE SOLUTION

## The future-proof solution for your data centre cabling

High-performance system solutions in copper, but chiefly in fibre optic technology constitute the backbone of high-speed data transfer in data centres. The ever higher transmission rates not only call for high-quality optical fibres, they also make increasing demands on the connecting components. Both system components are crucial to the efficient performance of transmission channels.

Flexibility is a core requirement for a cabling solution in today's data centre environment. New systems need to be planned, assembled and installed within a very short time. New technologies (like BiDi), new generations of devices (like 25G servers) and new network designs (fabrics) mean that the demands on link performance are continually rising.

Datwyler's Data Centre Solution surpasses all the requirements for modern, powerful cabling solutions, its high quality and excellent optical and geometric connector assembly values being of particular note here.

# DATWYLER DATA CENTRE SOLUTION

## FUTURE-PROOF CABLING SOLUTIONS

### for data centres

#### Benefits of the Datwyler Data Centre Solution:

- Top quality guarantees top performance
- High packing densities hand in hand with good clear layout
- Fast and easy assembly (plug-and-go)
- Modifications/installations possible during ongoing operation, no need for outside companies (reduced OPEX)
- Preassembly: no in-situ stripping, splicing or connector termination work necessary
- Slimline cable design, so no disruption to cooling air flow and no redundant lengths of cable in rack
- Scalable thanks to modular design
- Investment protection and future viability as migratable to future applications
- High spare capacity due to extremely low optical losses
- Power budget protection thanks to bend-optimised fibres (multimode)

#### The most important system components:

- Preassembled fibre optic mini trunks
- Preassembled fibre optic plug-in modules (MTP, Breakout or Splice version)
- Fibre optic fanout cables (100G on 4x 25G, for example)
- Fibre optic patch cables (LCD and MTP)
- Modularly equipped 19-inch 1U panels and 3U/4U subracks
- Patch management trays and cable management accessories

These system components provide high-performance modular solutions for server room and data centre cabling tailored to customer requirements, the outstanding features of which are clear layout, flexibility, high packing density and good handling during operation.

#### Optical values of the Datwyler Data Centre Solution:

Criterion	Assembly Class	Insertion Loss IL [dB]		Return Loss RL [dB]	
Connector type	IEC 61755-3-2	mean	maximum	mean	minimum
Multifibre MTP Elite® 0° PC (multimode)	Grade B	0.15	0.3	≥ 40	≥ 35
Multifibre MTP Elite 8° APC (single-mode)	Grade B	0.1	0.3	≥ 70	≥ 65
Single-fibre LCD Uniboot 0° PC (multimode)	Grade B	0.1	0.25	≥ 40	≥ 35
Single-fibre LCD Uniboot 8° APC (single-mode)	Grade B	0.1	0.25	≥ 75	≥ 65

## FIBRE OPTIC CHANNEL CONFIGURATION OPTIONS

The high-performance carefully coordinated cables and components of the Datwyler Data Centre Solution can be combined as required and make it possible to implement an open infrastructure design decoupled from the user's equipment pool. The system also allows simple migration to future applications. The graphics below show some typical configurations. Please see our website for more.

### Module-to-module configuration

Two FO-DCS plug-in modules are interconnected by a thin mini breakout cable MTP-MTP. For all known Duplex applications up to 25G Ethernet or up to 32G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	Mini breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Plug-in module, 3U/7HP, 24F, 2x MTP on 6x LCQ	24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

MTP® and MTP Elite® are registered brand names of US Conec

## Module-to-module configuration (without MTP)

Two FO-DCS splice plug-in modules are interconnected by a thin FO Universal cable with LCD connectors.  
For all known Duplex applications up to 25G Ethernet or 16G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	FO Universal cable U-DQ(ZN)BH (e.g. with LCD)	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Breakout plug-in module, 3U/7HP, 6x LCO	Capacity: 24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

## Module-to-fanout configuration

One FO-DCS plug-in module is connected to two FO-DCS fanout cables (MTP® on LCD Uniboot) by a thin FO-DCS mini breakout cable MTP-MTP for a direct link between the active ports (e.g. ports of a SAN switch). For all well-known Duplex applications such as 10G and 25G Ethernet or 16G and 32G Fiber Channel.

Part	Level	Description	Remarks
1	High-performance	Mini Breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Plug-in module, 3U/7HP, 24F, 2x MTP on 6x LCD	24 fibres
3	High-performance	Patch cable LCD-LCD (Uniboot)	Polarity: A to A or A to B
4	High-performance	Front plate, 3U/7HP, 2x MTP adapter, type A	also available with 4x or 8x MTP adapter
5	High-performance	Fanout cable, 1x MTP on 6x LCD Uniboot	Polarity: type A or type C

These system components are available in multimode (OM3 or OM4) and single-mode (G.652.D) versions.

## Converter plug-in module configuration

Two FO-DCS converter plug-in modules are interconnected by a FO-DCS mini breakout cable MTP-MTP.  
For three 40G, NG100G, PSM4, PLR4 or 64GFC links.

Part	Level	Description	Remarks
1	High-performance	Mini Breakout cable MTP-MTP, type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Converter plug-in module, 3U/7HP, 24F, 2x MTP on 3x MTP	24 fibres (2x 12 on 3x 8 fibres)
3	High-performance	Patch cable MTP-MTP	Polarity: type A, B or C, 12 fibres

These system components are available in multimode (OM4) and single-mode (G.652.D) versions.

## Migration to 40G/100G (parallel optics)

The FO-DCS plug-in modules in subracks are replaced by FO-DCS front plates with MTP adapters.  
The high-performance FO-DCS mini-breakout cables MTP-MTP can continue to be used.

Part	Level	Description	Remarks
1	High-performance	Mini Breakout cable MTP-MTP type A or type C	12, 24, 48, 72, 96 or 144 fibres
2	High-performance	Front plate 3U/7HP 4x MTP adapter, type A	also available with 2x or 8x MTP adapter
3	High-performance	Patch cable MTP-MTP	Polarity: type A, B or C, 12 fibres
4	High-performance	Y patch cable (1x MTP 24F on 2x MTP 12F)	Polarity: type A, B or C, 24 fibres

MTP® is registered brand name of US Conec

## Subracks and patch panels

### SUBRACKS & PATCH PANELS

#### FO-DCS modular subracks, 19"

- Pre-assembled with horizontal guide rails - can be modularly fitted
- Takes a maximum of twelve 3U/7HP FO-DCS plug-in modules or front plates
- Capacity: up to 144 Duplex ports (288 fibres) or up to 144 MTP® ports (1728 fibres)
- Any mixture of modules / front plates can be installed in the same subrack
- Extractable excess cable length tray (1U) - can be inserted on the fourth rack unit in two ways, so that optionally the slots or holes can be used as cable entry openings

Article No.	Description	Material / Colour	PU
470540	FO-DCS modular subrack, 19"/3U, 84HP (without excess cable length tray)	Aluminium, anodised	1 pc.
470542	FO-DCS modular subrack, 19"/4U, 84HP	Aluminium, anodised	1 pc.
470642	FO-DCS modular subrack, 19"/4U, 84HP	Aluminium, black	1 pc.

#### FO-DCS modular panels, 19"

- Takes a maximum of three 3U/7HP FO-DCS plug-in modules or front plates
- Capacity: up to 36 Duplex ports (72 fibres) or up to 36 MTP ports (432 fibres)
- Any mixture of modules / front plates can be installed in the same panel

Article No.	Description	Material / Colour	PU
470543	FO-DCS modular panel, 19"/1U	Aluminium, anodised	1 pc.
470643	FO-DCS modular panel, 19"/1U	Aluminium, black	1 pc.

#### FO-DCS compact breakout panels, 19"/1U

- Pre-assembled with 12 or 24 LC Quad adapters
- Capacity: up to 24 or 48 Duplex ports (48 or 96 fibres)
- Sturdy aluminium housing

Article No.	Description	Material / Colour	PU
470618	FO-DCS compact breakout panel, 19"/1U, 12x LCQ, OM3 turquoise	Aluminium, anodised	1 pc.
470619	FO-DCS compact breakout panel, 19"/1U, 12x LCQ, OM4 heather violet	Aluminium, anodised	1 pc.
470620	FO-DCS compact breakout panel, 19"/1U, 12x LCQ, OS2 blue	Aluminium, anodised	1 pc.
470621	FO-DCS compact breakout panel, 19"/1U, 12x LCQ, OS2 green	Aluminium, anodised	1 pc.
470622	FO-DCS compact breakout panel, 19"/1U, 24x LCQ, OM3 turquoise	Aluminium, anodised	1 pc.
470623	FO-DCS compact breakout panel, 19"/1U, 24x LCQ, OM4 heather violet	Aluminium, anodised	1 pc.
470624	FO-DCS compact breakout panel, 19"/1U, 24x LCQ, OS2 blue	Aluminium, anodised	1 pc.
470625	FO-DCS compact breakout panel, 19"/1U, 24x LCQ, OS2 green	Aluminium, anodised	1 pc.

Variants in Aluminium black available on request.

## Subracks and patch panels

### FO-DCS compact panels, 19"/1U, with MTP-LCD pre-assembly

- Pre-assembled with 4 or 8 MTP couplers (Type A: key-up/key-down) at rear side, MTP-on-LC fanouts, and 12 or 24 LC Quad adapters at front side
- Capacity: 24 or 48 Duplex ports (48 or 96 fibres)
- Top-quality assembly ensures optimum values for optical performance.
- Sturdy aluminium housing

Article No.	Description	Material / Colour	PU
470610	FO-DCS compact panel, 19"/1U, 4x MTP on 24x LCD, OS2 blue	Aluminium, anodised	1 pc.
470611	FO-DCS compact panel, 19"/1U, 4x MTP on 24x LCD-APC, OS2 green	Aluminium, anodised	1 pc.
470612	FO-DCS compact panel, 19"/1U, 4x MTP on 24x LCD, OM3 turquoise	Aluminium, anodised	1 pc.
470613	FO-DCS compact panel, 19"/1U, 4x MTP on 24x LCD, OM4 heather violet	Aluminium, anodised	1 pc.
470614	FO-DCS compact panel, 19"/1U, 8x MTP on 48x LCD, OS2 blue	Aluminium, anodised	1 pc.
470615	FO-DCS compact panel, 19"/1U, 8x MTP on 48x LCD-APC, OS2 green	Aluminium, anodised	1 pc.
470616	FO-DCS compact panel, 19"/1U, 8x MTP on 48x LCD, OM3 turquoise	Aluminium, anodised	1 pc.
470617	FO-DCS compact panel, 19"/1U, 8x MTP on 48x LCD, OM4 heather violet	Aluminium, anodised	1 pc.

Variants in Aluminium black available on request.

### FO-DCS management panel, 19"/1U

- For the proper routing of fibre optic patch cables in all 19" IT racks and cabinets
- Equipped with 6 cable routing elements and detachable front plate

Article No.	Description	Material / Colour	PU
470544	FO-DCS management panel, 19"/1U, left-side routing	Aluminium, anodised	1 pc.
470545	FO-DCS management panel, 19"/1U, right-side routing	Aluminium, anodised	1 pc.
470546	FO-DCS management panel, 19"/1U, left / right-side routing	Aluminium, anodised	1 pc.
470644	FO-DCS management panel, 19"/1U, left-side routing	Aluminium, black	1 pc.
470645	FO-DCS management panel, 19"/1U, right-side routing	Aluminium, black	1 pc.
470646	FO-DCS management panel, 19"/1U, left / right-side routing	Aluminium, black	1 pc.
470554	Labelling strip for FO-DCS management panel, 420 x 12 mm		1 pc.
4000140	Hook-and-loop tape, 19 mm (1 pc. = 10 m roll)		1 pc.

### FO-DCS splice plug-in modules, 3U/7HP

- Polycarbonate (PC) housing, press-fit side panels (sealed)
- Black PC or aluminium 3U/7HP front panel with 6x LCQ or 6x LCD
- Ready-to-splice pigtails (1.3 m) are neatly inserted
- Cassette has splice reserve on both sides (cable/pigtail), splice comb and strain relief
- Black PC front panels provide labelling strips

There is a separate distribution box available for multi-fibre loose tube cables or for storing the excess tube lengths (see our website for more information)

## Patch and fanout cables

### PATCH AND FANOUT CABLES

#### FO-DCS Indoor cable MTP-MTP, 12-144 fibres

- Sturdy, metal-free indoor cables - provide enhanced crush resistance and rodent protection
- Compact, metal-free cable construction with FR/LSOH cable sheath
- 12 up to 144 fibres, OM4 or OS2 (G.652.D BLO)
- For Duplex and parallel optic signals
- Sticker labelling at both cable ends
- Leg lengths defined on the basis of a specific project (maximum: 4.0 m),  
in protective sleeves, breakout separation is effected with a divider housing
- Assembled using MTP12 connectors (12-fibre Elite ferrules) MTP8 / MTP24 on request
- Connectivity method: Type A or Type C (other versions on request)
- Comes with test reports on all MTP connectors

## Patch and fanout cables

### Pre-assembled fibre optic cable variants

Datwyler also supplies its ready-to-install FO cables in pre-assembled variants such as MTP-on-LCD, LCD-on-LCD, LCD-on-SCD or tailor-made versions for all projects.

L = Length between dividers / fixing points (= purchase order length)  
 A = Type of assembly side A: as required / depending on application;  
 legs: graded in length (see example image) or of equal length  
 B = Type of assembly side B: as required / depending on application;  
 legs: graded in length (see example image) or of equal length

Length of shortest leg:  
 Length of longest leg:  
 Maximum leg length:

0.45 m minimum for 1U panel,  
 0.75 m minimum for 4U subrack  
 $d = c + n \times 8 \text{ cm}$   
 4.0 m

### FO-DCS fanout cables MTP-LCD, 8 fibres

For the conversion of 100G to 4x 25G or 40G to 4x 10G

- Assembled using 1 MTP connector and 4 LCD Uniboot connectors
- 8 fibres, OM4 or OS2
- For the quick and space-saving connection of active devices such as switches, servers, storage, etc.
- Legs: can be ordered graded in length or of equal length
- Project-specific assemblies are available on request
- Comes with test reports on all connectors

Article No. type A	Article No. type C	Description	Sheath colour	Length [m]
571243	571253	FO-DCS fanout cable MTP/f-LCDU, 8F, OM4, graded	heather violet	2.5

# DATWYLER DATA CENTRE SOLUTION

## Patch and fanout cables

### FO-DCS patch cables MTP-MTP, 12 fibres

- Thin and flexible patch cable (round cable: 3.0 mm Ø) with 12 fibres, OM3 or OM4
- Low fire load due to its halogen-free flame-retardant LSOH sheath
- Available with up to 5 m standard lengths (other lengths on request)
- Sticker labelling at both cable ends
- Assembled using MTP connectors (female) at both cable ends
- Polarisation modes can be type A, B or C
- Comes with test reports on all connectors

# DATWYLER DATA CENTRE SOLUTION

## Copper cassettes / Cleaning tools

### CU-DCS plug-in module for 6 RJ45 Keystone modules

#### Description

- For the insertion of up to 6 RJ45 modules
- Delivery without modules

Plug-in module for 6 RJ45 Keystone modules

Article No.	Description	Colour (similar to)	PU
440046	Plug-in module for 6x RJ45 module Keystone (without modules)	stainless steel, blank	1 pc.
440055	Plug-in module for 6x RJ45 module Keystone (without modules)	black	1 pc.

## FO CLEANING TOOLS

The cleanliness of high-quality FO connectors is critical for satisfactory optical performance and long-term trouble-free transmission. Connectors that are dirty, worn or scratched due to improper use will have a negative effect on optical performance because the Insertion Loss (IL) increases whilst the Return Loss (RL) falls.

All FO-related cabling standards point out that professional cleaning tools are necessary to ensure successful acceptance tests and trouble-free patching.

For professional cleaning of FO connectors (e.g. MPO/MTP) the equipment as featured in Datwyler's FO accessories portfolio is particularly suitable.

Article No.	Fig.	Description	Items cleaned / method	PU
1411400	1	Reel Cleaner	FO connector	1 pc.
1411401	-	Replacement reels for Reel Cleaner		6 pcs.
415627	2	FO connector cleaning device for MPO/MTP	FO connector and through adapter	1 pc.
415628	3	FO connector cleaning device for 2.5 mm	FO connector and through adapter	1 pc.
415629	-	FO connector cleaning device for 1.25 mm	FO connector and through adapter	1 pc.
1411404	4	Cleaning rod for 2.5 mm	Sleeve in connector	10 pcs.
1411405	-	Cleaning rod for 1.25 mm	Sleeve in connector	10 pcs.

# IT RACKS AND ACCESSORIES

## Solutions for every requirement

A well-chosen rack or cabinet will not only look good, but will add security, increase the lifespan of your devices and also make it easier to maintain the equipment inside, so saving you money and time.

The Datwyler IT racks are as varied as the requirements of our customers. The range includes Standard and Premium racks as well as wall-mounted racks of various sizes, dimensions and configurations. The racks can be adapted to the intended configuration, the relevant cooling concepts, the cabling and/or your safety requirements.

Our wide range of rack accessories includes fans, lighting, earthing and equipotential bonding sets, PDU's, cable management kits, shelves, faceplates and individual doors to coordinate with the cabinets, as well as a lot more besides.

# IT RACKS AND ACCESSORIES

Datwyler offer a wide range of racks and cabinets. Below is a selection from our product range. In order to find the ideal solution for your installations, please contact us. Our local sales office will be pleased to assist you.

## SERVER RACKS

### Server Racks Standard DSRS 19"/ 42U

with perforated front and rear doors

#### Application

The Datwyler Server Racks Standard DSRS are designed to provide good-quality cabinets that offer an unrivaled cost-performance ratio.

#### Features

Size:	Height: 42U Width: 600 or 800 mm; Depth: 1000 or 1200 mm
Construction:	Welded sheet steel frame (1.5 mm)
Load capacity:	1000 kg, balanced on 19-inch vertical profiles
19 inch profiles:	2 pairs of 19-inch vertical profiles (front / rear), with U label, stepless depth adjustment from inside. Cabinets of 800 mm width offer 3 additional vertical 19"/2U positions per 19-inch extrusion
IP rating:	IP20
Colour:	RAL 9005 (black). RAL 7035 (light grey): on request
Front / rear doors:	One-piece perforated doors, 86% perforation, with swivel handle lock, DIN profile, universal key 333, 3-point locking, up to 180° aperture angle. Front door can be hinged right or left (easy to change)
Side panels:	Removable, locks with universal key
Delivery:	Fully assembled and packed, including installation instructions. Comes with pre-installed flat earthing kit and 28 mounting kits. Plinths, fan ventilation units, castors, rack baying kits, etc: optional (see rack accessories).

## WALL-MOUNTED RACKS

### Wall-Mount Racks Premium DWMR 19"/ 9U, 12U, 15U and 18U

with glass front door & steel rear door

Wall-Mount Rack Premium DWMR,  
9U, 600 x 500 mm

#### Application

The Datwyler Wall-Mount Racks DWMR are designed to accept patch panels, active components and other data network equipment. They offer an extended access level from all sides thanks to removable (and lockable) side panels.

#### Features

Sizes:	Height: 9U (491 mm), 12U (624 mm), 15U (758 mm), 18U (891 mm) Width: 600 mm Depth (usable depth): 500 mm (480 mm) and 600 mm (580 mm)
Construction:	Welded sheet steel frame (1.25 mm)
Load capacities:	40 kg (D: 500 mm), 30 kg (D: 600 mm)
IP rating:	IP30
Colours:	RAL 7035 (light grey); RAL 9005 (black): available on request
Front door:	With tinted security glass and round lock, universal key 333, up to 180° aperture angle, door can be hinged right or left (easy to change)
Rear panel:	Removable, with 150 x 56 mm knock-out panel and pre-punched holes for wall-mount installation (cabinet can also be installed without rear panel)
Standard configuration:	1 pair of adjustable 19-inch vertical profiles with U label, 2 removable side panels, each with universal lock, tinted security glass door with universal round lock, pre-installed flat earthing kit, 16 mounting sets: screws, cage nuts and washers
Delivery:	Fully assembled and packed, including 2 keys and drilling template
Optionally available:	1 additional pair of adjustable 19-inch profiles (rear), spare key, cable entry panel with brush

More configurations are available on request.

# LONG-TERM SECURITY

Even the best matched systems can only show their optimal potential when the installation is optimised. With the increased technical demands of class E/E<sub>A</sub> and class F/F<sub>A</sub> links, for example, the demands on the installer are constantly growing.

We train network installers in the Datwyler system solutions in order to be able to guarantee an optimal quality of installation. Our seminars provide participants with the knowledge of the right application for products, combinations and dependencies of different parameters in the cabling system, and the resulting high quality of installation in copper and fibre optic networking.

## DATWYLER SYSTEM WARRANTY

Certified installers can offer a Datwyler warranty for the installed copper and fibre optic cabling systems:  
normally for 25 years, but this can be extended depending on project criteria.  
An acceptance test for each link documents that all required electrical values are maintained.

- . Native speaker as contact person
- . Representatives in 70 countries
- . Excellent market knowledge and understanding of market conditions
- . Familiar with the local variances

## ANYWHERE IN THE WORLD: **WE REALIZE YOUR PROJECT**

WE SPEAK  
**YOUR LANGUAGE**  
– ALSO FROM A  
**CULTURAL POINT OF VIEW**

You will find us wherever electrical and ICT networks are involved.

Not only are we fluent speakers of all the major languages, but we're also well versed in the special cultural and application-specific features of each particular country. We are familiar with the rules and requirements and know what is important. This saves our international customers time and money. For they know that Datwyler's development, production and quality control, geared to the specific criteria of the domestic market, give them significant competitive advantages. And they are sure to feel "at home" if they are then given advice and support in their native language into the bargain.
