ACTUATOR LA36

Features:

- 12, 24 or 36 V DC Permanent magnetic motor (IC only 12/24 V DC, IECEX/ATEX only 24 V DC)
- Thrust from 500 N 10,000 N depending on gear ratio and spindle pitch
- Max. speed up to 160 mm/sec. depending on load and spindle pitch
- Non rotating piston rod eye
- Protection class: IP66 (dynamic) and IP69K (static)

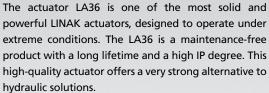

Options in general:

- Built in endstop switches
- · Hall effect sensor
- iFLEX options including:
 - IC Integrated Controller (H-bridge),
 - Integrated Parallel Controller
 - Modbus and LINbus communication
 - Analogue or digital feedback for precise positioning
 - Endstop signals
 - PC configuration tool
- Mechanical potentiometer (not with IC)
- Exchangeable cables in different lengths
- IECEX/ATEX certified for Zone 21

Usage:

 Duty cycle at max. load from 5 -20% depending on load and stroke length. Ambient operating temperature -30°C to +65°C, full performance from +5°C to +40°C

Chapter 1

Specifications

Motor: Permanent magnet motor 12, 24, or 36V *

Cable: Motor: 2 x 14 AWG PVC cable

Control: 6 x 20 AWG PVC cable **

Gear ratio: 6 different gear ratios available in steel

(500 N, 1,700/2,600 N, 4,500 N, and 6,800/10,000 N)

Slip clutch: Mechanical overload protection through an integrated slip clutch

Brake: Integrated brake ensures a high self-locking ability.

The brake is deactivated when the actuator is powered in

order to obtain a high efficiency

Hand crank: As a standard feature the actuator can be operated manually

Housing: The housing is made of casted aluminium, coated for

outdoor use and in harsh conditions

Spindle part: Outer tube: Extruded aluminium anodised

Inner tube: Stainless steel AISi304/SS2333

Acme spindle: Trapezoidal spindle with high efficiency

Temperature range: - 30° C to +65° C

- 22°F to +149°F

Full performance +5°C to +40°C

End play: 2 mm maximum

Weather protection: Rated IP66 for outdoor use. Furthermore, the actuator can

be washed down with a high-pressure cleaner (IP69K).

Noise level: 73dB (A) measuring method DS/EN ISO 8746 actuator not loaded.

* Modbus actuators only 24V - please see the

Modbus installation guide http://www.linak.com/techline/?id3=2363.

** Special control cabels for the Modbus actuator - please see the

Modbus installation guide http://www.linak.com/techline/?id3=2363

Be aware of the following two symbols throughout this product data sheet:

Recommendations

Failing to follow these instructions can result in the actuator suffering damage or being ruined.

Additional information

Usage tips or additional information that is important in connection with the use of the actuator.

^{*} There are limitations on the stroke length if you need full load, please see " LA36 Load v. Stroke Length"

^{**} Note: Fully loaded actuators need a softstart in order to prevent the clutch from slipping when starting (see curves).

LA36 Load versus Stroke Length

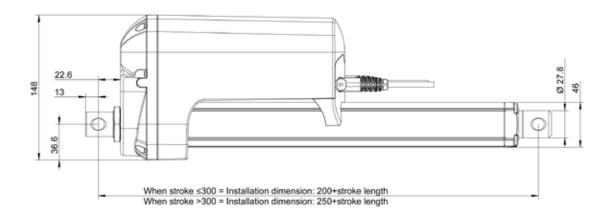

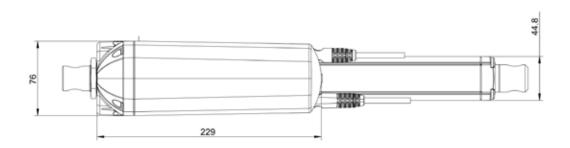

- For applications that only operate in pull the limitations are 999 mm stroke and 10,000 N load
- The Piston Rod Eye is only allowed to turn 0-90 degrees
- Safety factor 2

Stroke tolerance:

End stop options E.g. 36XXXX+?XXXXXX	Descriptions	Stroke tolerance	Example for 200mm stroke
? = 0	Without endstop switches Mechanical endstop	+/- 2mm	198 to 202mm
? = 1 to 4	With built-in limit switches	+0/-4mm	196mm
? = 7, 8, 9, A, B	Integrated controller Modbus Linbus	+0/-6mm	194mm

LA36 Back fixture orientation

NB. All with tolerance of ±4°

Manual hand crank:

The manual hand crank can be used in the case of power failure.

The cover over the Allen Key socket must be unscrewed before the Allen Key can be inserted and the Hand Crank operated.

Hand Crank Torque: 6-8 Nm

Piston Rod movement per turn

	8 mm	12 mm	20 mm
Gear A	-	11 mm	18 mm
Gear B	-	6 mm	10 mm
Gear C	3 mm	4 mm	7 mm
Gear F	-	-	27 mm

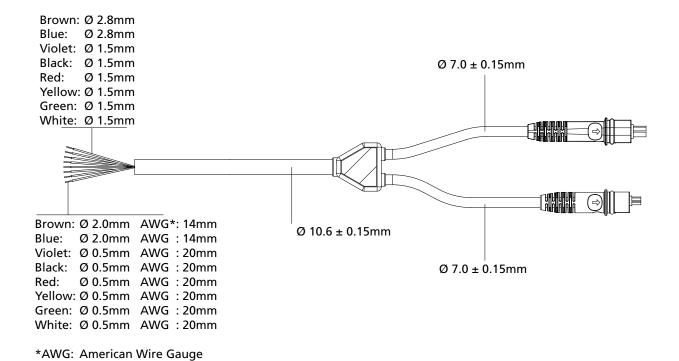

Note:

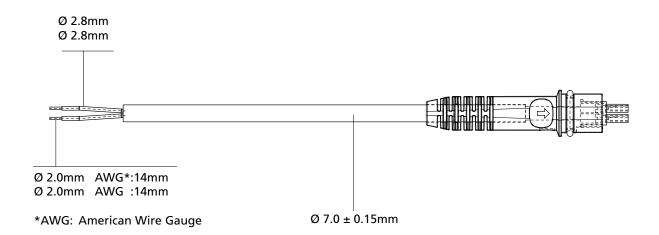

- The power supply has to be disconnected during manual operation.
- If the actuator is operated as a Hand crank, it must <u>only</u> be operated by hand, otherwise there is a potential risk of overloading and hereby damaging the actuator.

Speed and current curves - 12V motor

The values below are typical values and made with a stable power supply and an ambient temperature of 20°C.

LA36 12V motor current vs. load

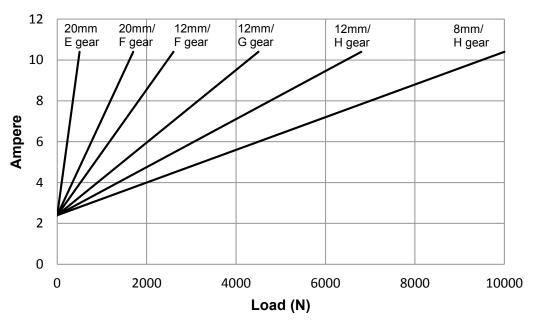

All measurements above describe the spindle pitch (e.g. 20mm) and the gear type (e.g. E gear) of the actuator.

Speed and current are based on a nominal power supply of 12, 24, 36VDC.

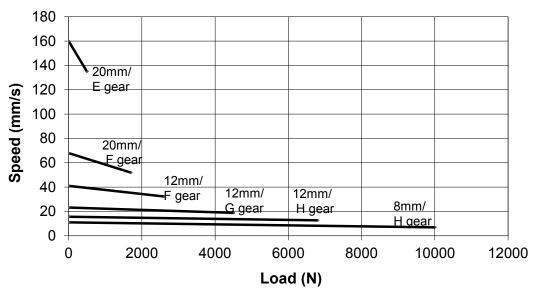

Speed and current curves - 24V motor

The values below are typical values and made with a stable power supply and an ambient temperature of 20°C.

LA36 24V motor current vs. load

LA36 24V motor speed vs. load

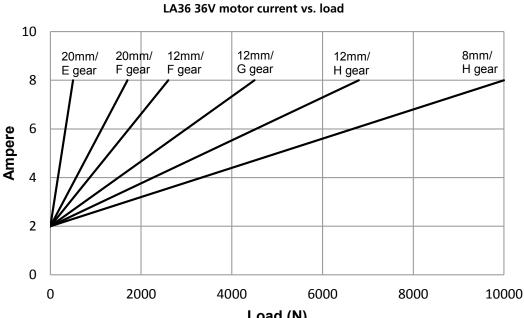

All measurements above describe the spindle pitch (e.g. 20mm) and the gear type (e.g. E gear) of the actuator.

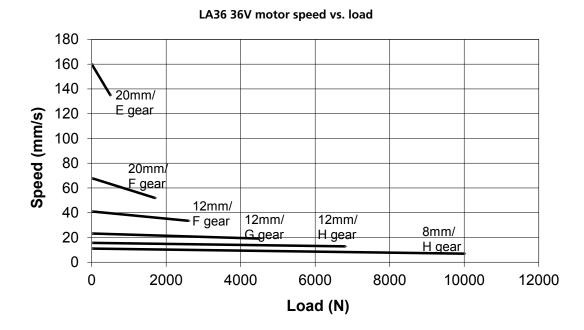

Speed and current are based on a nominal power supply of 12, 24, 36VDC.

Speed and current curves - 36V motor

The values below are typical values and made with a stable power supply and an ambient temperature of 20°C.

Load (N)

All measurements above describe the spindle pitch (e.g. 20mm) and the gear type (e.g. E gear) of the actuator.

Speed and current are based on a nominal power supply of 12, 24, 36VDC.

Chapter 2

I/O specifications: Actuator without feedback

Input/Output	Specification	Comments

Red	Extends the actuator	On/off voltages:
Dii-	Data de the extraction	$> 67\% \text{ of } V_{IN} = ON$ < 33% of $V_{IN} = OFF$
Black	Retracts the actuator	Input current: 10mA
Green	Endstop signal out	Output voltage min. V _{IN} - 2V Source current max. 100mA
		Endstop signals are NOT potential free. Endstop signals can be configured with BusLink software
Yellow	Endstop signal in	according to any position needed. Only use one virtual endstop - keep one end open for initialisation. (See I/O specifications for endstop on page 18).

I/O specifications: Actuator with IC Advanced - with BusLink

Input/Output	Specification	Comments
Violet	Analogue feedback (0-10V): Configure any high/low combination between 0-10V	Ripple max. 200mV Transaction delay 20ms Linear feedback 0.5% Max. current output. 1mA
	Single Hall output (PNP)	Output voltage min. V _{IN} - 2V Max. current output: 12mA
		Please be aware that when choosing single hall, feedback position readout and virtual endstops are not available in BusLink.
		For more information, see fig. 2, page 20
	Digital output feedback PWM: Configure any high/low combination between 0-100%	Output voltage min. V _{IN} - 2V Frequency: 75Hz ± 10Hz as standard, but this can be customised. Duty cycle: Any low/high combination between 0 and 100 percent. Open drain source current max. 12mA
	Analogue feedback (4-20mA): Configure any high/low combination between 4-20mA	Tolerances ± 0.2mA Transaction delay 20ms Linear feedback 0.5% Output: Source Serial resistance: 12V max. 300 ohm 24V max. 900 ohm
	All absolute value feedbacks (0-10V, PWM and 4-20mA)	Standby power consumption: 12V, 60mA 24V, 45mA
		It is recommendable to have the actuator to activate its limit switches on a regular basis, to ensure more precise positioning
White	Signal GND	

BusLink is available for IC Advanced and can be used for:

Diagnostics, manual run and configuration

Please note that the BusLink cables must be purchased separately from the actuator!

Item numbers for BusLink cables: USB2LIN: USB2LIN05, USB2LIN06 and onwards Adaptor cable: 0964826-A

I/O specifications: Actuator with Parallel

Input/Output	Specification	Comments
Description	Parallel drive of up to 8 actuators. A master actuator with an integrated H-bridge controller controls up to 7 slaves. The version with "IC option" cannot be operated with PWM (power supply).	H- side H-Bridge
Brown	12-24VDC + (VCC) Connect Brown to positive 12V ± 20% 24V ± 10% 12V, current limit 25A 24V, current limit 13A	Note: Do not change the power supply polarity on the brown and blue wires! The parallel actuators can run on one OR separate power supplies Power supply GND (-) is electrically connected to the housing
Blue	12-24VDC - (GND) Connect Blue to negative 12V ± 20% 24V ± 10% 12V, current limit 25A 24V, current limit 13A	Current limit levels can be adjusted through BusLink (only one actuator at a time for parallel) If the temperature drops below 0°C, all current limits will automatically increase to 30A
Red	Extends the actuator	On/off voltages: > 67% of $V_{IN} = ON$ < 33% of $V_{IN} = OFF$ Input current: 10mA
Black	Retracts the actuator	It does not matter where the in/out signals are applied. You can either choose to connect the signal cable to one actuator OR you can choose to connect the signal cable to each actuator on the line. Either way this will ensure parallel drive
Green	Endstop signal out	Output voltage min. V _{IN} - 2V
Yellow	Endstop signal in	Source current max. 100mA NOT potential free
Violet	Parallel communication: Violet cords must be connected together	Standby power consumption: 12V, 60mA 24V, 45mA No feedback available during parallel drive
White	Signal GND: White cords must be connected together	

BusLink is available for Parallel and can be used for:

- Diagnostics
- Service counter is available with Parallel
- Parallel actuator configurations can be changed through BusLink, but all actuators need the same configurations!

Please note that the BusLink cables must be purchased separately from the actuator! Item numbers for BusLink cables: USB2LIN: USB2LIN05, USB2LIN06 and onwards Adaptor cable: 0964826-A

Chapter 3

Environmental tests - Climatic

Test	Specification	Comment	TRD number
Cold test	EN60068-2-1 (Ab)	Storage at low temperature: Temperature: -40°C Duration: 72h Not connected Tested at room temperature.	TRD0509
	EN60068-2-1 (Ad)	Storage at low temperature: Temperature: -30°C Duration: 2h Actuator is not activated/connected Tested at low temperature.	TRD0509
Dry Heat	EN60068-2-2 (Bb)	Storage at high temperature: Temperature: +90°C Duration: 72h Actuator is not activated/connected. Tested at room temperature	TRD0510
		Storage at high temperature: Temperature: +70°C Duration: 1000h Actuator is not activated/connected Tested at high temperature.	TRD0507
	EN60068-2-2 (Bd)	Operating at high temperature: Temperature: +60°C Int. max. 17% Duration:700h Actuator is activated Tested at high temperature.	
Change of temperature	EN60068-2-14 (Na)	Rapid change of temperature: High temperature: +100°C in 60 minutes. Low temperature: -30°C in 60 minutes. Transition time:<10 seconds Duration: 100 cycles Actuator is not activated/connected. Tested at room temperature.	TRD0501
	EN60068-2-14 (Nb)	Controlled change of temperature: Temperature change 5°C pr. minute High temperature: +70°C in 60 minutes. Low temperature: -30°C in 30 minutes. 130 minutes pr. Cycle. Duration: 1.000 cycles (90days) Actuator is not activated/connected.	TRD0508
		Tested at 250, 500 and 1,000 cycles at low and high temperatures.	
Damp heat	EN60068-2-30 (Db)	Damp heat, Cyclic: Relative humidity: 93-98% High temperature: +55°C in 12 hours Low temperature: +25°C in 12 hours Duration: 21cycles * 24hours Actuator is not activated/connected Tested within 1 hour after condensation, That means after upper temperature has been reached.	TRD0505
	EN60068-2-3 (Ca)	Damp heat, Steady state: Relative humidity: 93-95% Temperature: +40 ±2°C Duration: 56 days Actuator is not activated/connected. Tested within one hour after exposure.	TRD0518
Salt mist.	EN60068-2-52 (Kb)	Salt spray test: Salt solution: 5% sodium chloride (NaCl) 4 spraying periods, each of 2 hours. Humidity storage 7 days after each. Actuator not activated/connected. Exposure time: 500 hours	TRD0506

Degrees of protection	EN60529 – IP66	IP6X - Dust: Dust-tight, No ingress of dust. Actuator is not activated.	TRD0514
		IPX6 – Water: Ingress of water in quantities causing harmful effects is not allowed. Duration: 100 litres pr. minute in 3 minutes Actuator is not activated.	TRD0513
		IPX6 –Connected actuator: Actuator is driving out and in for 3 min. 100(I/min) jet of water is placed at the wiper ring for 3 (min).	TRD0513
	DIN40050 – IP69K	IPX6 –Connected actuator and push 6800 (N) Actuator is driving out and in for 3 min. and Push 6800(N) at the end-pos. 100 (I/min.) jet of water is placed at the wiper ring for 3 min.	TRD0513
		High pressure cleaner: Water temperature: +80°C Water pressure: 80 bar Spray angle: 45° Spray distance: 100mm Duration: From any direction 10 seconds of spraying followed by 10 seconds rest. Actuator is not activated. Ingress of water in quantities causing harmful effects is not allowed.	TRD0512
	DUNK test	The actuator has been warmed up to 115°C for 20 hours. After this it is cooled down in 20°C saltwater. Cooling time: 5 minutes Opened for checking salt deposit and water.	TRD0515
Chemicals	BS7691 / 96hours	Diesel 100% Hydraulic oil 100% Ethylene Glucol 50% Urea Nitrogen saturated solution Liquid lime 10% (Super- Cal) NPK Fertilizer (NPK 16-4-12) saturated Tested for corrosion.	TRD0525

Environmental tests - Mechanical:

Test	Specification	Comment	TRD number
Free fall		Free fall from all sides: Height of fall: 0.4 meter onto steel. Actuator not activated/connected.	TRD0511
Vibration	EN60068-2-36 (Fdb) EN 60068-2-6 (Fc)	Random vibration: Short time test:6.29g RMS Actuator is not connected Long time test: 7.21g RMS Actuator is not connected Duration: 2 hours in each direction Sinus vibration: Frequency 5-25Hz: Amplitude = 3.3mm pp Frequency 25-200Hz: Acceleration 4g Number of directions: 3 (X-Z-Y) Duration: 2 hours in each direction. Actuator is not activated	TRD0502 TRD0517
Bump	EN60068-2-29 (Eb)	Bump test: Level: 40g Duration: 6 milliseconds Number of bumps: 500 shocks in each of 6 directions. Actuator is not connected.	TRD0503
Shock	EN60068-2-27 (Ea)	Shock test: Level: 100g Duration: 6 milliseconds Number of bumps: 3 shocks in each of 6 directions. Actuator is not connected.	TRD0504

Environmental tests - Electrical:

Test	Specification	Comment	TRD number
Power supply	ASAE EP455 (1990)	Operating voltages +10V - +16V Over voltage +26(V) / 5min. Reverse polarity -26(V) / 5min. Short circuit to ground 16 (V) / 5 min. Short circuit to supply 16(V) / 5 min.	TRD0522
HF-immunity	EN61000-6-2	Level: 30 V/m. at 26 MHz – 1000 mHz 80% 1 KHz	TRD0516
Emission	EN61000-6-4	Level is inside limits for 12 V motor	TRD0516
Automotive transients	ISO 7637	Load dump test only accepted on motor power connection.	TRD0521

Terms of use

The user is responsible for determining the suitability of LINAK products for specific application. LINAK takes great care in providing accurate and up-to-date information on its products. However, due to continuous development in order to improve its products, LINAK products are subject to frequent modifications and changes without prior notice. Therefore, LINAK cannot guarantee the correct and actual status of said information on its products.

While LINAK uses its best efforts to fulfil orders, LINAK cannot, for the same reasons as mentioned above, guarantee the availability of any particular product. Therefore, LINAK reserves the right to discontinue the sale of any product displayed on its website or listed in its catalogues or other written material drawn up by LINAK.

All sales are subject to the Standard Terms of Sale and Delivery for LINAK. For a copy hereof, please contact LINAK.
