PC2 8MGT 3200 12

Product # 9275-09129

Poly Chain® GT2 has been designed for optimum performance on high torque, low speed drives in any industrial application. This lightweight belt features increased power ratings of up to 40% higher than previous constructions while maintaining the same long service life. Poly Chain® GT2 operates on Poly Chain® GT pulleys. These belts make an excellent alternative to roller chains, requiring neither re-tensioning nor lubrication. Space-saving, weight-saving and money-saving, Poly Chain® GT2 drives over a long and reliable service life.

- Teeth and body are made of a lightweight polyurethane compound, specially blended for adhesion to the cords and fabric.
- Uniquely formulated polyurethane makes the belt tough and virtually immune to abrasion and chemicals.
- The aramid tensile cords provide extraordinary power-carrying capacity.

Specifications

Product Details ▢

Part #	PC2 8MGT 3200 12
Product #	9275-09129
Description	PC2 8MGT 3200 12
UPC	
Pitch (mm)	3200
Pitch Length (mm)	3200
Section	8MGT
Number of Teeth	400
Width (mm)	12

Construction

Material	PU
----------	----

Packaging details

Customer Pack	1

Features

FEATURES AND BENEFITS

- Flex fatigue life of aramid is exceptional, and its high impact strength withstands shocks and surge loading.
- The fabric covering the teeth is highly resistant to oil, chemicals, pollutants, corrosion and abrasion.
- It is exceptionally durable and remains fully operational.
- The fabric facing reduces friction with the pulley, thereby minimising temperature build-up.

- High efficiency positive drive.
 - Maintenance-free: no lubrication or re-tensioning needed.
 - Savings in space, weight and money.
 - On demand available in PowerPainT™ construction.
 - Temperatures range: -54°C to +85°C.
 - Perfect fit on Poly Chain® GT profile pulleys.
 - Available in 8MGT, 14MGT pitch.
-
