Snap-open mechanism, choice of snap-open on left or right. Hinged crossbar can be swiveled by more than 180° on both sides. Lightning-fast closing by hand. Secure fit without additional locking devices.

When to use the Series 3400/3450/3480/3500:

- Snap-open accessibility along both radii
- If integrated strain relief is required at the connection point
- Modular interior separation
- If long service life is required
- If easy installation is required
- If half E-Tube is required (Series 3450)
- If fully enclosed E-Tube is required (Series 3480)

When not to use it:

- If maximum stability is required
▶ **System E4.1, Series E4.42, page 7.48**
- If the application is very simple
▶ **Easy Chain®, Series E300, page 3.52**

- ① Opening system for rapid opening, either from the right or the left
- ② Lateral glide surfaces for side-mounted operation

Short travels - unsupported

Unsupported E-Chains® feature positive camber over short travels. This must be accounted for when specifying the clearance height H_f . Please consult igus® if space is particularly restricted.

The required clearance height:
 $H_f = H + 40$ mm
(with 2,5 kg/m fill weight)

Pitch = 67 mm/link Links/m = 15 (1005 mm) Chain length = $S/2 + K$

Long travel lengths from 10 m to max. 150 m Chain length = $S/2 + K_2$

In case of travels between 4 and 10 m we recommend a longer unsupported length.

Gliding, long travel applications (max. 150 m)

In this case the E-Chain® upper run will be introduced in a guide trough on the lower run. We recommend to realize the engineering of such a plant by our technicians.

"Double" strain relief

If an E-Chain® is harnessed with a very large number of cables, strain relief may be necessary at two levels. Our 30XX.Z and 30XX.ZS strain relief system was developed for this purpose. It can be placed in any position along the E-Chain®. As required, the 30XX.Z and 30XX.ZS strain relief system is simply clamped onto the crossbar of the chain link. No additional installation elements are needed. **Details ▶ chapter 10**

Strain relief separator

Separator with integrated strain relief, for use in the first or last chain link. For manufacturing of switchgear cabinets or for the assembly of machines. Easy to assemble without any fastening device. Separator base 2020.Z is 18 mm and 34501.Z is 14 mm wide. The possible number of separators per E-Chain® is defined by its inner width *B_i* and by the cable-diameter. **Details ▶ chapter 10**

Strain relief for steel mounting brackets

Clip-on connection is not possible with steel mounting brackets. In this case, the tiewrap plates must be bolted directly into separate bore holes in front of the mounting bracket. Alternatively the tiewrap plates 30XX.Z and ZS can be also used here. **Details ▶ chapter 10**
