

Amphenol 97 Series MIL-DTL-5015

MATES WITH ALL THREADED MIL-DTL-5015 CONNECTORS

The 97 series is a durable, cost-effective MIL-DTL-5015 available in a variety of shell styles, sizes, contacts, and layouts. Contacts are silver-plated with pre-tinned solder cups. These circular connectors are excellent for industrial applications including robotics, machine tools and welding.

- UL-approved & CSA-certified
- Also called MIL-C-5015 or MS

Note: MS-A version (blue insulator) is inactive for new military designs. The 97 series can be purchased under inactive military part numbers, so use caution. MIL-DTL-5015 uses a gray insulator. Obsolete MS-A connectors can be purchased with the original hard blue insulator or the newer sealed construction, using a soft neoprene insulator. For the neoprene insulator, add "-RES" as a suffix to the part number.

Standard MS3057 cable clamps have dual-clamping action to provide a balanced, positive hold on the wires and greatly reduce moisture transmission. This cable clamp accepts MS3420 bushings. MS3420 bushings can be nested to reduce the inside diameter to more closely match the diameter of the cable or wire bundle.

For use with MS3057-C cable clamps (style-C) to reduce the wire sealing diameter. Bushings can be nested, one inside the other, to progressively reduce the inside diameter of the cable clamp. The column labeled "reduction bushings" shows the acceptable nesting options for each clamp. → See page 21.

GASKETS

Synthetic rubber gaskets are used to ensure a moisture-tight seal between a receptacle and the panel. Gaskets are available for front or rear panel mounting of style 3100 and 3102 connectors. Gasket thickness is approximately .031 inches (1 mm) for nonconductive and low-temperature types.

Conductive shielding gaskets contain an imbedded metal screen for EMI/RFI shielding in addition to moisture sealing. Gaskets are available for front or rear panel mounting of connectors. Gasket thickness is .020 inches (.5 mm).

METAL DUST CAPS WITH SASH CHAIN & DUMMY RECEPTACLES

Metal dust caps are used to protect the contacts when the connectors are left unmated. Dust caps come with metal chain lanyards.

Dummy receptacles are for front or rear panel mounting. The center of the dummy receptacle is closed. Dummy receptacles mount on the same centers and have the same outside dimensions as a 97-3102A receptacle. A version with a clearance hole through the middle of the connector is also available. Call for ordering information.

READ THESE INSTRUCTIONS PRIOR TO ASSEMBLY.

STEP 1: Open both shell kit and insert kit.

STEP 2: Remove yellow tape from insert, being careful not to allow front and rear insulators to come apart.

STEP 3: Insert insulator assembly into shell or barrel, aligning the key and keyway until rear of the insert is positioned just below the retaining spring ring ridge.

STEP 4: Insert the retainer spring ring into the ridge by working one end in first, then working around the ring until it snaps into place.

STEP 5: For barrels, add coupling nut to barrel and slide rear accessories on to cable.

STEP 6: Solder wires onto proper contacts.

STEP 7: Thread endbell onto barrel/shell. Slide cable clamp down the cable and thread onto the endbell. Tighten endbell and cable clamp using endbell accessory tools → See page 122.

STEP 8: Tighten cable clamp screws appropriately for the specific wire/cable in use.
