

# 3SB3 Pushbuttons and Indicator Lights, 22 mm

## General data

### Overview

#### Front plate mounting

For actuators see page 13/25 to 13/62.

For contact blocks and lampholders see page 13/63 to 13/65.

For holders see page 13/66.

#### Mounting on printed circuit boards

For contact blocks for use on printed circuit boards see page 13/66.

## Design

The 3SB3 series is a modular range of commanding and signaling devices for front panel mounting and rear conductor connection. As an alternative, individual elements can also be supplied for use on printed circuit boards. Complete units are offered for the most commonly used applications.

Actuators and indicators and complete units

The 3SB3 series is available:

- Made of molded plastic in flat, round and square design
- Made of metal in round design.

The devices are of modern industrial design and can be mounted rapidly by a single person. The operating surfaces of the pushbuttons and illuminated pushbuttons are concave. The lenses of the indicator lights are convex.

The metal version with a high degree of protection according to IP67 and NEMA 4 is available for the world market.

One command point comprises:

- An actuator or lens assembly in front of the control panel
- A holder for mounting behind the control panel
- Up to 3 contact blocks and/or 1 lampholder behind the control panel
- A comprehensive range of accessories for inscription

Two contact blocks can be snapped onto the actuator in the standard version.

When three contact blocks or illuminated actuators are required, an additional holder must be plugged onto the actuator from the rear.

- 3SB39 01-0AB holder for 3 contact blocks or for 2 contact blocks and 1 lampholder
- 3SB39 01-0AC holder with pressure plates for actuating a central contact block when using a selector switch, key-operated switch and twin pushbutton with 3 contact blocks.

For illuminated pushbuttons, illuminated switches and illuminated selector switches the holder is included in the scope of supply as standard.

The contact blocks are fitted with slow-action contacts with double operating contacts. These ensure a high switching reliability even with small voltages and currents, such as 5 V/1 mA. They are suitable for use in solid-state systems as well as conventional controls.

## Standards

IEC 60947-1, EN 60947-1,  
IEC 60947-5-1, EN 60947-5-1,  
IEC 60947-5-5, EN 60947-5-5 for EMERGENCY-STOP mushroom pushbuttons.

## Connection methods

The devices are available with screw terminals (box terminals), spring-type terminals or solder pins.

-  Screw terminals
-  Spring-type terminals
-  Solder pin connections

The terminals are indicated in the corresponding tables by the symbols shown on orange backgrounds.

## Application

The devices are climate-proof (KTW 24) and suitable for standard industrial applications and operation in marine applications. For operation in oily atmospheres (organic oils/lubricants) we recommend actuators which are marked as "solvent-resistant".

## AS-Interface solutions

The 3SB3 commanding and signaling devices can be connected to the AS-Interface communication system quickly and safely with the help of various solutions.

The following solutions are available:

- ASIsafe EMERGENCY-STOP mushroom pushbuttons (see page 13/67)
- AS-Interface enclosures with 1 to 6 command points (see page 13/96).
- AS-Interface front panel modules for 4 command points (see Catalog IK PI)

## "Intrinsic safety" type of protection EEx i according to ATEX directive 94/9/EC

The pushbuttons and indicator lights in round design can also be used in hazardous areas. The 3SB34 ...-0. contact blocks and the 3SB34 ...-1A lampholders (with 3SB39 01-1.A LED lamp) with screw terminals or spring-type terminals can be used.

See [www.siemens.com/sirius/atex](http://www.siemens.com/sirius/atex).

## Safety EMERGENCY-STOP pushbuttons according to ISO 13850

For controls according to IEC 60204-1 or EN 60204-1, the mushroom pushbuttons of the 3SB3 series are suitable for use as safety EMERGENCY-STOP pushbuttons.

## Safety circuits

IEC 60947-5-1 and EN 60947-5-1 require positive opening, i.e. for the purposes of personal safety, the assured opening of NC contacts is expressly stipulated for the electrical equipment of machines in all safety circuits and marked according to IEC 60947-5-1 with the symbol .

Category 4 according to EN 954-1 can be attained with the EMERGENCY-STOP mushroom pushbuttons if the corresponding failsafe evaluation units are selected and correctly installed, e.g. the 3TK28 safety relays or matching units from the ASIsafe, SIMATIC or SINUMERIK product ranges.

<b>Device identification</b>	Snap-on label		
<b>Tightening torques</b>			
• Screw on holder	Nm	max. 1	
<b>Mechanical endurance</b>			
• Pushbuttons	10 × 10 <sup>6</sup> operating cycles		
• Illuminated pushbuttons	3 × 10 <sup>6</sup> operating cycles		
• Actuators, rotary or latching	3 × 10 <sup>5</sup> operating cycles		
• Key-operated switch with key monitoring	1 × 10 <sup>5</sup> operating cycles		
<b>Switching frequency</b>	1/h	1000 operating cycles	
<b>Climatic withstand capability</b> acc. to EN ISO 6270-2	Climate-proof KTW24; suitable for marine applications		
<b>Ambient temperature</b>			
• During operation, non-illuminated and with LED	°C	-25 ... +70	
• During operation, devices with incandescent lamp	°C	-25 ... +60	
• During storage, transport	°C	-40 ... +80	
<b>Degree of protection</b> acc. to IEC 60529			
• Actuators and indicators, standard	IP66	IP65	IP67 and NEMA Type 4
- with protective caps	IP67	IP67	--
• Key-operated switch with key monitoring	IP54	--	--
• Twin pushbuttons (3SB31)	IP65	--	--
<b>Protective measures</b>	Protective measures are met automatically when the actuators and lens assemblies are mounted on metal front plates and enclosures.  When mounted in insulated enclosures, the "total insulation" protective measures are met.		Grounding is necessary for operation with protective extra- low voltage (PELV).
<b>Shock resistance</b> according to IEC 60068-2-27 for half-sine shock type, 11 ms shock duration			
• Devices without incandescent lamp	≤ 50 g		
• Devices with incandescent lamp	≤ 30 g		
<b>Vibration resistance</b> acc. to IEC 60068-2-6			
• Acceleration at frequency 20 ... 200 Hz	5 g		

Type	3SB38 0.-0, 3SB38 0.-1	--	3SB38 0.-2, 3SB38 0.-3
<b>Enclosures</b>			
<b>Enclosure material</b>	Plastic		Metal
<b>Actuators and indicators</b>	Plastic, round		Metal, round
<b>Degree of protection</b> acc. to IEC 60529	IP65		IP67 and NEMA Type 4
<b>Resistance to extreme climates</b> acc. to DIN 50017	KTW 24		KTW 24

# 3SB3 Pushbuttons and Indicator Lights, 22 mm

## General data

### Configuration

#### Mounting and fixing

The 3SB3 devices can be easily and quickly mounted:

- Actuators or indicator lights are positioned in the opening of the front panel from the front
- Position the holder from the rear
- Tighten the screw on the holder
- Snap on the contact block or the lampholder directly onto the actuator from the back

The holder for the round versions is set to a switchboard thickness of 1 to 4 mm when delivered and is placed in the direction of the arrow  $\uparrow$  1–4 mm  $\uparrow$  on the actuator/indicator from the back. The fixing screw is located underneath, on the right.

For a switchboard thickness of 3 to 6 mm, the holder is reversed and mounted in the direction of the arrow at  $\uparrow$  3–6 mm  $\uparrow$  and the fixing screw is located on the upper right. In this case, the fixing screw must be rotated anticlockwise to its limit before mounting the holder.

The control panel depth of 1 to 4 mm can be compensated with the holder for the square version.

When label holders, protective caps or similar accessories are used, the greatest permissible control panel thickness must be reduced by the wall thickness of the accessory part.

#### Mounting dimensions on front plates

#### Minimum clearance

	a	b
Contact blocks (1 contact) and lampholder		
• For front plate mounting, with screw terminals	30 <sup>1)</sup>	45
• For front plate mounting with spring-type terminals	30 <sup>1)</sup>	30 <sup>1)</sup>
• For use on PCB, with solder pin connections	30 <sup>1)</sup>	30 <sup>1)</sup>
Contact blocks with 2 contacts		
• for front plate mounting	30 <sup>1)</sup>	50
When using holders for inscription labels		
• 12.5 mm × 27 mm	30 <sup>1)</sup>	45 <sup>2)</sup>
• 27.0 mm × 27 mm	30 <sup>1)</sup>	60

<sup>1)</sup> For mushroom pushbutton, EMERGENCY-STOP and push-pull button: Note mushroom diameter  $d = 40$  mm or  $60$  mm.

<sup>2)</sup> 60 mm with contact blocks having two contacts.

# 3SB3 Pushbuttons and Indicator Lights, 22 mm

## Actuators and Indicators, Plastic, Round, 22 mm

**Coordinate switches, complete**

### Overview

Coordinate switch with contact blocks

Coordinate switches control auxiliary circuits permitting movements in various directions of machines and equipment.

The switches are designed for front panel mounting. They are climate-proof.

#### Operation

The 3SB14 00-0J contact block is used, which due to its depth cannot be built into 3SB38 enclosures.

Switches are available as follows:

- With 2 or 4 switch positions
- Latching or momentary contact type
- With or without mechanical interlocking

In the case of switches with mechanical interlock in O position, the switch is unlatched with the unlatching button at the front of the actuating lever.

#### Inscriptions

A name plate consisting of a black, plastic label holder and two or four adhesive, silver-colored inscription labels of 27 mm x 27 mm in size is available for labeling purposes. These labels can be supplied with and without customized inscription.

Note mounting dimensions!

### Options

#### Customized inscriptions

These labeling plates can be inscribed with text or symbols. 5 lines with 11 characters each in a letter height of 4 mm are possible.

#### Ordering notes

Append the following order codes to the Order No.:

- Text line(s) in upper/lower case, upper case always for beginning of line (e.g. "Lift off"): **K0Y**
- Text line(s) in upper case (e.g. "LIFT OFF"): **K1Y**
- Text line(s) in lower case (e.g. "lift off"): **K2Y**
- Text line(s) in upper/lower case, all words begin with upper case letters (e.g. "Lift Off"): **K5Y**
- Symbol with number according to ISO 7000 or IEC 60417: **K3Y**
- Any inscription or symbol according to order form supplement: **K9Y**

When ordering, specify the required inscription in plain text in addition to the order number and order code. In the case of special inscriptions with words in languages other than German, give the exact spelling and specify the language.

In the case of multi-line inscriptions, the text must be assigned to the respective line, e.g. "Z1 = Lift, Z2 = Lower".

Symbols can also be ordered with numbers according to ISO 7000 or IEC 60417.

For special symbols (order code K9Y), a CAD drawing in DXF format can be submitted.

#### Ordering example

A label inscribed with symbol No. 1117 according to ISO 7000 is required:

3SB19 06-2XZ  
K3Y  
Z = 1117 ISO

For other ordering examples see page 13/77.

⚙️ For online configurator see [www.siemens.com/sirius/configurators](http://www.siemens.com/sirius/configurators).

<sup>1)</sup> Also available without holder. Supplement Order No. with "-Z" and quote order code "B01". Price reduction on request.

<sup>2)</sup> For locks with key monitoring the supplied 3SB39 01-0AB holder must be used.  
The key scan is performed by a 3SB34 single-pole NC contact block which must be snap-mounted in the center position. Scanning of the switch positions must be performed by additional contact blocks which are snap-mounted on the actuator.  
Special locks can be ordered only with order code "Y01".

<sup>3)</sup> Keys are not included in scope of supply.

<sup>4)</sup> According to FIAT standards; also available for other users.

For BKS and CES special locks see page 13/68.

For online configurator see [www.siemens.com/sirius/configurators](http://www.siemens.com/sirius/configurators).

<sup>1)</sup> Also available without holder. Supplement Order No. with "-Z" and quote order code "B01". Price reduction on request.

<sup>2)</sup> For locks with key monitoring the supplied 3SB39 01-0AB holder must be used.

The key scan is performed by a 3SB34 single-pole NC contact block which must be snap-mounted in the center position. Scanning of the switch positions must be performed by additional contact blocks which are snap-mounted on the actuator.

Special locks can be ordered only with order code "Y01".

<sup>3)</sup> According to FIAT standards; also available for other users.

For BKS and CES special locks see page 13/68.

## Components for Actuators and Indicators

**AS-Interface F adapters  
for EMERGENCY-STOP devices**

### Overview

EMERGENCY-STOP mushroom pushbutton with F adapter for bus connection

The AS-Interface F adapter is used to connect an EMERGENCY-STOP device according to ISO 13850 from the 3SB3 series to the AS-Interface bus system. The F adapter is suitable for control devices with mounting on front plates.

The F adapter has a safe AS-Interface 2I slave and is snapped from behind onto the EMERGENCY-STOP mushroom pushbutton. In the 2I/1O expanded version, an output is also available for actuating an indicator light with LED.

Depending on the version, screw terminals or spring-type terminals or the insulation piercing method are used for connecting to the AS-Interface bus cable. Addressing is performed using the AS-Interface connection or the integrated addressing socket.

Safety category 4 (SIL 3) is achieved with the adapter.

### Special locks

#### Options

##### Special locks for key-operated switches

The BKS and CES plastic and metal key-operated switches, round and square versions, can be optionally equipped with special locks.

In this case the Order No. of the matching key-operated switch must be supplemented with **"-Z"**, the matching order code **"Y01"** or **"Y02"** and the required lock number.

Order code	Y01	Y02
In accordance with the table of special locks	No	Yes
Normal delivery time	25 working days	5 working days
Additional price per unit	On request	On request
Ordering example	3SB30 00-4LD01-Z Y01 Z = SSG18	3SB30 00-4LD01-Z Y02 Z = SSG11

Available special locks with order code <b>"Y02"</b>	Order No. with order code
<b>Key-operated switch</b>	
CES SSG 11 to SSG 15	<b>3SB3. ...4LD01-Z Y02</b> <b>3SB3. ...4LD11-Z Y02</b> <b>3SB3. ...4LD21-Z Y02</b> <b>3SB3. ...4MD01-Z Y02</b> <b>3SB3. ...4PD...-Z Y02</b> <b>3SB3. ...4QD...-Z Y02</b> <b>3SB3. ...4RD...-Z Y02</b> <b>3SB3. ...4SD...-Z Y02</b>
BKS E1, E2, E7, E9 <sup>1)</sup>	<b>3SB3. ...5AD...-Z Y02</b> <b>3SB3. ...5BD01-Z Y02</b> <b>3SB3. ...5DD...-Z Y02</b> <b>3SB3. ...5ED01-Z Y02</b> <b>3SB3. ...5FD01-Z Y02</b> <b>3SB3. ...5GD01-Z Y02</b>
BKS E9 <sup>1)</sup>	<b>3SB3. ...5FD51-Z Y02</b>
<b>EMERGENCY-STOP mushroom push-buttons</b>	
CES SSP 9	<b>3SB3. ...1KA20-Z Y02</b>
BKS E2, E7, E9 <sup>1)</sup>	<b>3SB3. ...1LA20-Z Y02</b>

<sup>1)</sup> Delivery of these BKS key-operated switches (locks for VW) without key.

#### Ordering notes

- For all special locks, an additional price applies.
- The order code **"Y01"** or **"Y02"** must be quoted in accordance with the table above. Automated processing of the order with a defined delivery time can be guaranteed only for correctly submitted orders.
- For applications in which access security is important and several lock numbers are used, we recommend the use of BKS or CES key-operated switches.
- Special locks for VW (E1, E2, ...) will be delivered without keys, all others with 2 keys.

##### Master and master-pass key systems

The following key systems can be supplied with BKS or CES key-operated switches:

- Central lock systems
- Master key systems
- Central master key systems
- Master-pass key systems

When placing an order you must supplement the Order No. of the matching key-operated switches with **"-Z"** and quote the order code **"Y03"**.

Please enquire for price and delivery time.

Example of master-pass key system

## Overview

### Inscription of actuators and indicators

Actuators and indicators of plastic as well as metal version can be optionally inscribed with a laser.

Pushbutton (metal) with laser inscription

The actuators of the pushbuttons, illuminated pushbuttons, mushroom pushbuttons and illuminated mushroom pushbuttons can be inscribed as well as the lenses of the indicator lights.

Selector switches can be inscribed only if they are made of plastic (only one text line on the front ring).

Pushbutton and selector switch (plastic) with laser inscription

### Version

A letter height of 4 mm is used as standard for text inscriptions:

The typeface used is Arial. Other letter heights and typefaces are possible, but must be specified when ordering.

For round buttons and lenses, the possible number of characters per line is:

- 10 characters for one line of text
- 8 characters for 2 lines of text
- 6 characters for 3 lines of text, but 10 characters in the middle line

On square buttons and lenses, 10 characters are possible per line.

### Ordering notes

When ordering, supplement the Order No. of the actuator or the indicator light with "**-Z**" and an order code:

- Text line in upper/lower case, always upper case for beginning of line (e.g. "Lift off"): **Y10**
- Text in upper case (e.g. "LIFT OFF"): **Y11**
- Text in lower case (e.g. "lift off"): **Y12**
- Text in upper/lower case, all words begin with capital letters (e.g. "Lift Off"): **Y15**
- Symbol with number according to ISO 7000 or IEC 60417: **Y13**
- Any inscription or symbol according to order form supplement: **Y19**

Additional price per unit for Y10 to Y19 on request.

When ordering, specify the required inscription in plain text in addition to the order number and order code. In the case of special inscriptions with words in languages other than German, give the exact spelling and specify the language (see [ordering example 1](#)).

In the case of multi-line inscriptions, the text must be assigned to the respective line, e.g. "Z1 = Lift, Z2 =Lower". For long words you can also specify the end-of-line division.

Symbols can also be ordered with numbers according to ISO 7000 or IEC 60417 (see [ordering examples 2 and 3](#)).

For special symbols (order code Y19), a CAD drawing in DXF format can be submitted.

#### Ordering example 1

A round pushbutton with the inscription "Reset" is required:

3SB30 00-0AA41-Z  
Y10  
Z = Reset (English)

#### Ordering example 2

A square pushbutton inscribed with symbol No. 5389 according to IEC 60417 is required:

3SB31 10-0AA31-Z  
Y13  
Z = 5389 IEC

#### Ordering example 3

A round pushbutton inscribed with symbol No. 1118 according to ISO 7000 is required:

3SB30 00-0AA41-Z  
Y13  
Z = 1118 ISO

# 3SB3 Pushbuttons and Indicator Lights, 22 mm

## Inscriptions

### Inscriptions by laser printer

#### Overview

##### Label inscriptions

Using the *Label Designer* software, which can be downloaded from the Internet, and the inscription labels for laser inscription you can create your own customized labels with a standard laser printer.

The self-adhesive or snap-on labels can be stuck or snapped onto the corresponding label holders (see [Name plates](#)). Round labels are provided for inserting in illuminated pushbuttons and switches.

The labels are suitable for printing with one to three lines of text or symbols.

For applications with more exacting requirements we recommend factory-printed inscription labels and insert labels (laser-printed or engraved depending on the type).

You can find the *Label Designer* software on the Internet at:

[www.siemens.com/sirius-label-designer](http://www.siemens.com/sirius-label-designer)

## Overview

Pushbuttons (clear) and illuminated pushbuttons with a flat button can be fitted with insert labels for identification purposes, but indicator lights cannot.

These insert labels are made of clear, transparent plastic with black inscription; they can be fitted in any 90° angle.

## Inscriptions

The inscriptions have upper case initial letters. Graphic symbols, including those not listed in the catalog, are according to ISO 7000 or IEC 60417 (see page 13/72).

The insert labels without inscription are suitable for user marking with permanent pen.

## Inscriptions

### Insert labels

#### Options

##### Customized inscriptions

The labels can be inscribed with text and symbols not listed in the ordering data.

By default, a letter height of 4 mm (for a single line of text) or 3 mm (for 2 or 3 lines of text) is used for text inscriptions.

The typeface used is Arial. Other letter heights and typefaces are possible, but must be specified when ordering.

For round insert labels, the maximum possible number of characters per line is:

- 10 characters for one line of text
- 8 characters for 2 lines of text
- 6 characters for 3 lines of text, but 10 characters in the middle line

On square insert labels, 10 characters are possible per line.

##### Examples for customized inscription

Two-line inscription in upper/lower case lettering (K0Y)

Single-line inscription in upper case lettering (K1Y)

Three-line inscription in lower case letters (K2Y)

Symbol number 5011 according to IEC 60147 (K3Y)

Any symbol according to order form supplement (K9Y)

##### Ordering notes

Append the following codes to the Order No.:

- Text line(s) in upper/lower case, upper case always for beginning of line (e.g. "Lift off"): **K0Y**
- Text line(s) in upper case (e.g. "LIFT OFF"): **K1Y**
- Text line(s) in lower case (e.g. "lift off"): **K2Y**
- Text line(s) in upper/lower case, all words begin with upper case letters (e.g. "Lift Off"): **K5Y**
- Symbol with number according to ISO 7000 or IEC 60417: **K3Y**
- Any inscription or symbol according to order form supplement: **K9Y**

When ordering, specify the required inscription in plain text in addition to the order number and order code. In the case of special inscriptions with words in languages other than German, give the exact spelling and specify the language.

In the case of multi-line inscriptions, the text must be assigned to the respective line, e.g. "Z1 = Lift, Z2 = Lower". For long words you can also specify the end-of-line division (see ordering example 1).

Symbols can also be ordered with numbers according to ISO 7000 or IEC 60417 (see ordering examples 2 and 3).

For special symbols (order code K9Y), a CAD drawing in DXF format should be submitted to:

[sirius-attach.aud@siemens.com](mailto:sirius-attach.aud@siemens.com)

##### Ordering example 1

A label with 2 lines of text is required:

3SB19 01-4AZ  
K1Y  
Z1 = LIFT  
Z2 = LOWER

##### Ordering example 2

A label inscribed with symbol No. 5011 according to IEC 60417 is required:

3SB19 01-4AZ  
K3Y  
Z = 5011 IEC

##### Ordering example 3

A label inscribed with symbol No. 1118 according to ISO 7000 is required:

3SB19 01-4AZ  
K3Y  
Z = 1118 ISO

**Overview**

The name plates consist of a black plastic label holder and an inscription label (black with white print or silver-colored with black print) for sticking or snapping in place. They are not suitable for EMERGENCY-STOP pushbuttons.

Note mounting dimensions!

**Inscriptions**

The inscriptions have upper case initial letters. The typeface is Arial. Graphic symbols, including those not listed in the tables, are according to ISO 7000 or IEC 60417 (see page 13/77).

**Self-adhesive labels**

There are 2 sizes available for the round and square ranges:

- Label holders 30 mm × 45 mm × 7 mm with inscription label 12.5 mm × 27 mm.
- Label holders 30 mm × 60 mm × 7 mm with inscription label 27 mm × 27 mm.

**Snap-on labels**

The following version is available for the round range:

- Label holders 29.8 mm × 51 mm × 3 mm with inscription label 17.5 mm × 28 mm (inscription area: 17.5 mm × 27 mm)

<sup>1)</sup> This label holder can also be used for pushbuttons with dust covers if the front panel thickness of 3 mm is not exceeded.

## Options

**Customized inscriptions**

The labels can be inscribed with text and symbols not listed in the ordering data.

The following letter heights are used as standard for text inscriptions:

- Label size 12.5 mm × 27 mm: maximum 3 lines with letter height 4 mm (1-line), 3.5 mm (2-line) or 2.5 mm (3-line)
- Label size 27 mm × 27 mm: maximum 5 lines with letter height 4 mm (1- to 5-line)
- Label size 17.5 mm × 28 mm: maximum 3 lines with letter height 4 mm (1- and 2-line) or 3 mm (3-line)

Up to 11 characters per line are possible. The typeface used is Arial. Other letter heights and typefaces are possible, but must be specified when ordering.

Examples for customized inscription

Two-line inscription in upper/lower case lettering (K0Y)

Single-line inscription in upper case lettering (K1Y)

Three-line inscription in lower case lettering (K2Y)

Symbol number 5011 according to IEC 60417 (K3Y)

Any symbol according to order form supplement (K9Y)

**Ordering notes**

Append the following codes to the Order No.:

- Text line(s) in upper/lower case, upper case always for beginning of line (e.g. "Lift off"): **K0Y**
- Text line(s) in upper case (e.g. "LIFT OFF"): **K1Y**
- Text line(s) in lower case (e.g. "lift off"): **K2Y**
- Text line(s) in upper/lower case, all words begin with upper case letters (e.g. "Lift Off"): **K5Y**
- Symbol with number according to ISO 7000 or IEC 60417: **K3Y**
- Any inscription or symbol according to order form supplement: **K9Y**

When ordering, specify the required inscription in plain text in addition to the order number and order code. In the case of special inscriptions with words in languages other than German, give the exact spelling and specify the language.

In the case of multi-line inscriptions, the text must be assigned to the respective line, e.g. "Z1 = Lift, Z2 = Lower". For long words you can also specify the end-of-line division ([see ordering example 1](#)).

Symbols can also be ordered with numbers according to ISO 7000 or IEC 60417 ([see ordering examples 2 and 3](#)).

For special symbols (order code K9Y), a CAD drawing in DXF format should be submitted to:

[sirius-attach.aud@siemens.com](mailto:sirius-attach.aud@siemens.com)

Ordering example 1

A label with 2 lines of text is required:

3SB39 02-1XZ  
K1Y  
Z1 = LIFT  
Z2 = LOWER

Ordering example 2

A label inscribed with symbol No. 5011 according to IEC 60417 is required:

3SB39 02-1XZ  
K3Y  
Z = 5011 IEC

Ordering example 3

A label inscribed with symbol No. 1118 according to ISO 7000 is required:

3SB39 02-1XZ  
K3Y  
Z = 1118 ISO

# 3SB3 Pushbuttons and Indicator Lights, 22 mm Enclosures

## General data

### Overview

Enclosures with standard and customized equipment

Enclosed pushbuttons and indicator lights are used as hand operated control devices for separately allocated control units and cabinets.

Enclosures with handle are available for suspension (e.g. for crane control units).

The enclosed pushbuttons and indicator lights are available with conventional controls as well as for connection to the AS-Interface bus system.

The following versions are available:

- Enclosures with standard fittings with 1 to 3 command points
- Enclosures with customized equipment with 1 to 6 command points
- Empty enclosures (individual parts must be ordered separately)

#### Customer-specific enclosures

On request enclosures with more than 6 command points can also be supplied with AS-Interface connection.

Use the configurator for selection.

For AS-Interface enclosures [see page 13/96](#).

### Enclosures with standard fittings

- A Top part of enclosure
- B Inscription labels
- C1 Pushbutton
- C2 Indicator light
- D Holder
- E Contact designations
- F Contact blocks, lampholders for floor mounting
- G Bottom part of enclosure
- H Identification letters for the command points
- I Identification number

#### Standards

IEC 60947-5-1, EN 60947-5-1

### Application

The devices are climate-proof (KTW 24) according to EN ISO 6270-2 and suitable for stationary use (weather-protected) and for use in marine applications.

### Technical specifications

Type	3SB38 0.-0, 3SB38 0.-1	3SB38 0.-2, 3SB38 0.-3
<b>Enclosures</b>		
<b>Enclosure material</b>	Plastic	Metal
<b>Actuators and indicators</b>	Plastic, round	Metal, round
<b>Degree of protection</b> acc. to IEC 60529	IP65	IP67 and NEMA Type 4
<b>Climatic withstand capability</b> according to EN ISO 6270-2	KTW 24	
<b>Shock resistance</b> according to IEC 60068-2-27 for half-sine shock type, 11 ms shock duration		
• Devices without incandescent lamp	≤ 50 g	
• Devices with incandescent lamp	≤ 30 g	
<b>Vibration resistance</b> acc. to IEC 60068-2-6		
• Acceleration at frequency 20 ... 200 Hz	5 g	

# 3SB3 Pushbuttons and Indicator Lights, 22 mm Enclosures

## Enclosures with standard fittings

### Overview

Enclosures with standard fittings are available with:

- 1 to 3 command points
- Operational voltage up to 400 V
- Vertical mounting type
- Plastic enclosures are equipped with plastic actuators and indicators, metal enclosures are equipped with metal actuators and indicators
- Contact blocks and lampholders for base mounting (are snapped into the enclosure base); screw terminals (box terminals) as standard; some versions also with spring-type terminals (Order No. ends with -0CC0)

Color of enclosure cover:

- Gray, RAL 7035
- Yellow, RAL 1004

Color of enclosure base:

- Black, RAL 9005

# 3SB3 Pushbuttons and Indicator Lights, 22 mm Enclosures

## Customized enclosures

### Overview

Customized enclosures are available with:

- 1 to 6 command points
- Operational voltage up to 400 V

One command point comprises:

- 1 actuator or indicator
- Up to 3 contact blocks or up to 2 contact blocks + 1 lamp-holder
- 1 inscription label

For plastic enclosures the command points are equipped as standard with plastic actuators and indicators, for metal enclosures they are equipped with metal actuators and indicators.

For cable entry in each case, a hole is provided at the top and bottom:

- For M20 for 1 to 3 command points
- For M25 for 4 and 6 command points

### Ordering notes (selection by configurator)

To order customized enclosures with the 3SB3 control devices (except suspended pushbuttons), use the 3SB3/3SF5 configurator to select the blocks for equipping. An electronic order form will be generated for the additional options. The configurator is available in the electronic catalog CA 01 on DVD or in the online catalog (Mall) on the Internet:

[www.siemens.com/industrymall](http://www.siemens.com/industrymall)

Supplement the Order No. with the order code "K0Y" (as already listed in the selection table).

The list price of the complete enclosure is generated in the configurator for the customized equipment.

Please send the resulting electronic order form along with your order by e-mail to our Competence Center at

[sirius-attach.aud@siemens.com](mailto:sirius-attach.aud@siemens.com)

If you are unable to access either catalog, please contact our Technical Assistance.
