Set contents:

Wacken Set 1

The ultimate festival set for survival in (almost) every difficult situation.

Rapidaptor holder

Rapid bit change without needing any additional tools. One-hand operation with a freely spinning sleeve for simplified guidance of the tool.

BiTorsion Bits

BiTorsion bits are absolutely premium products. They have a softer BiTorsion zone which reduces the hardness of the shaft by about 20 % in comparison to the drive tip. This means that the peak loads that cause bit breakage and premature wear are absorbed in this zone – something which enhances the service life of the bits.

Kraffform Micro bit holder

Slim Kraffform Micro bit holder with Micro bits.
