CLMB
AUTOMATED TIP CLEANER

A quick and **harmless** method for **thorough** tip cleaning

Improve thermal transfer with gentle cleaning effortlessly

The CLMB is an Automated Tip Cleaner consisting of **2 motorized brushes** that start/stop working when a **photoelectric sensor** detects the soldering tip at the window. The user just needs to bring the tip gently to the cleaner window and let the system work for as long as necessary. This means less effort and **greater comfort**.

CLMB Automated Tip Cleaner

Basic specifications

Maximum power:	11W
Standby power:	2,1W
Brush speed:	700 – 1000 rpm
Brush diameter:	50 mm
