

Hyper Red Backlight Displays

Technical Data Sheet

Part No.: KWB-R7417V/1V-R

Spec No.: R7417 Rev No.: V.2 Date: Sep./23/2008 Page: 1 OF 6 Approved: 3400 Checked: Wu Drawn: Shu

Lucky Light Electronics Co., Ltd.

Features:

- ♦ Low power requirements.
- ♦ Large area, uniform, bright light emitting surface.
- ♦ Easy for installation.
- ♦ Color: Hyper Red.
- ♦ The product itself will remain within RoHS compliant Version.

Descriptions:

♦ The red source color devices are made with AlGaInP on N-GaAs substrate light emitting diode.

Applications:

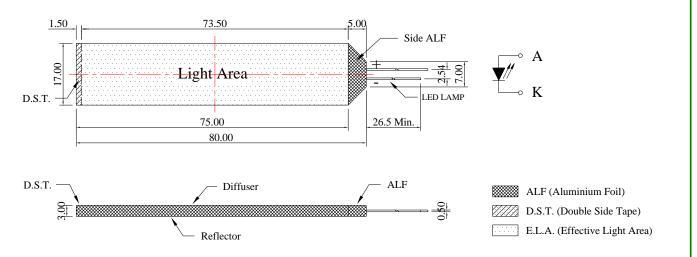

- ♦ Flat backlight for LCD, switches and symbols.
- ♦ Indicator and backlight in office equipment.
- ♦ Indicator and backlight for battery driven equipment.
- ♦ Indicator and backlight for audio and video equipment.
- ♦ Automotive: Backlighting in dashboards and switches.
- ♦ Telecommunication: Indicator and backlighting in telephone and fax.

Spec No.: R7417 Rev No.: V.2 Date: Sep./23/2008 Page: 2 OF 6 Approved: 3400 Checked: Wu Drawn: Shu

Lucky Light Electronics Co., Ltd.

Package Dimension:

Part No.	Chip Material	Face Color	Source Color
KWB-R7417V/1V-R	AlGaInP	White	Hyper Red

Notes:

- 1. All dimensions are in millimeters (inches).
- 2. Tolerance is \pm 0.25mm (.010") unless otherwise specified.
- 3. Specifications are subject to change without notice.

Spec No.: R7417 Rev No.: V.2 Date: Sep./23/2008 Page: 3 OF 6 Approved: 3400 Checked: Wu Drawn: Shu

Lucky Light Electronics Co., Ltd.

Absolute Maximum Ratings at Ta=25℃

Parameters	Symbol	Max.	Unit
Power Dissipation	PD	60	mW
Peak Forward Current (1/10 Duty Cycle, 0.1ms Pulse Width)	IFP	100	mA
Forward Current	IF 25		mA
Reverse Voltage	VR	5	V
Electrostatic Discharge (HBM)	ESD	1000	V
Operating Temperature Range	Topr	-20℃ to +70℃	
Storage Temperature Range	Tstg	-25℃ to +75℃	
Lead Soldering Temperature [4mm (.157") From Body]	Tsld	260°C for 5 Seconds	

Electrical Optical Characteristics at Ta=25℃

Parameters	Symbol	Min.	Тур.	Max.	Unit	Test Condition
Luminous Intensity	Г	30	50		cd/m²	IF=15mA (Note 1)
Forward Current	IF	10	15	20	mA	VF=1.80V
Luminous Uniformity			75%			IF=15mA
Peak Emission Wavelength	λр		632		nm	IF=20mA
Dominant Wavelength	λd		624		nm	IF=20mA (Note 2)
Spectral Line Half-Width	Δλ		20		nm	IF=20mA
Forward Voltage	VF	1.60	2.00	2.40	V	IF=20mA
Reverse Current	IR			60	μΑ	V _R =5V

Notes:

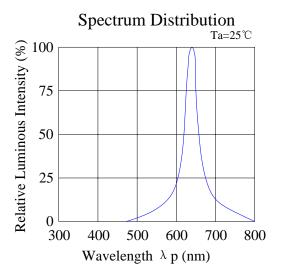

- 1. Luminous intensity is measured with a light sensor and filter combination that approximates the CIE eye-response curve.
- 2. The dominant wavelength (λd) is derived from the CIE chromaticity diagram and represents the single wavelength which defines the color of the device.

Lucky Light Electronics Co., Ltd.

Please read the following notes before using the product:

1. Over-current-proof

Customer must apply resistors for protection, otherwise slight voltage shift will cause big current change (Burn out will happen).

2. Storage

- 2.1 Do not open moisture proof bag before the products are ready to use.
- 2.2 Before opening the package, the LEDs should be kept at 30℃ or less and 90%RH or less.
- 2.3 The LEDs should be used within a year.
- 2.4 After opening the package, the LEDs should be kept at 30℃ or less and 70%RH or less.
- 2.5 The LEDs should be used within 168 hours (7 days) after opening the package.

3. Soldering Iron

Each terminal is to go to the tip of soldering iron temperature less than 260°C for 5 seconds within once in less than the soldering iron capacity 25W. Leave two seconds and more intervals, and do soldering of each terminal. Be careful because the damage of the product is often started at the time of the hand solder.

4. Repairing

Repair should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of the LEDs will or will not be damaged by repairing.

5. Caution in ESD

Static Electricity and surge damages the LED. It is recommended to use a wrist band or anti-electrostatic glove when handling the LED. All devices equipment and machinery must be properly grounded.
