■Precautions

1. Plug

| | | |
|---|---|--|
| (1) Mating / unmating | <ul style="list-style-type: none"> • Unmating Insert both ends of the extraction tool under the plug (from the direction opposite to the Cable termination), as shown and pull-up in the direction perpendicular to the mounting surface of the receptacle. <ul style="list-style-type: none"> ● Recommended the use of the extraction tool for unmating. Any attempt of unmating by pulling on the cable may result in damage and affect the mechanical / electrical performance. • Mating Do not attempt to insert on an extreme angle. | |
| (2) Pull forces on the cable after connectors are mated | <p>After the connectors are mating, do not apply a load to the cable in excess of the values indicated in the diagram.</p> | |
| (3) Precautions | Do not twist connectors excessively during mating / unmating. | |

2. Receptacle

| | | |
|--|--|--|
| (1) Recommended reflow temperature profile | <p>① The temperature of the printed circuit board surface temperature at the points of contact with the terminals. ② Reflow soldering should be performed at a printed circuit surface temperature of 250°C max. ③ In individual applications the actual temperature may vary, depending on the solder paste type, volume / thickness and board size / thickness. Consult your solder paste and equipment manufacturer for specific recommendations.</p> | |
| (2) Manual soldering | Soldering iron temperature: 350°C, Soldering time: for 5 seconds max. | |
| (3) Recommended metal mask thickness | 0.1 mm to 0.12 mm | |
| (4) Reflow cycles | 2 times | |

3. Operating environment and storage conditions

| | | |
|-------------------------------------|--|--|
| (1) Operating environment | The connectors are not designed to operate in the following environments: <ul style="list-style-type: none"> • Exposed to a excessive amounts of fine particles and dust • Regions and places having a high density of sulfur dioxide, hydrogen sulfide, nitrogen dioxide or other corrosive gasses. • Environments having large rapid variations in temperature. | |
| (2) Storage conditions - Receptacle | Store in the Hirose Electric packaging. Temperature: -10 to +40°C, Humidity: 85% max. Use within 6 months of delivery. Receptacles for which the storage period has elapsed must be tested for solderability to the PC board mounting surface. | |
