

A powerful soldering station WSD 121 featuring the WP 120 iron

Precision technology for high quality soldering management

Weller technology works on automatic “power on demand” which senses the thermal requirement for each solder joint size and applies a precise tip temperature during soldering.

Weller soldering iron WP 120

The perfect tool for standard soldering, application on large mass through-hole components, multilayer boards, or metal parts which require maximum power from heating element to transfer the necessary heat.

WSD 121 Set

Offers excellent value for the user; from up-front pricing through to overall cost of ownership.

High life expectancy

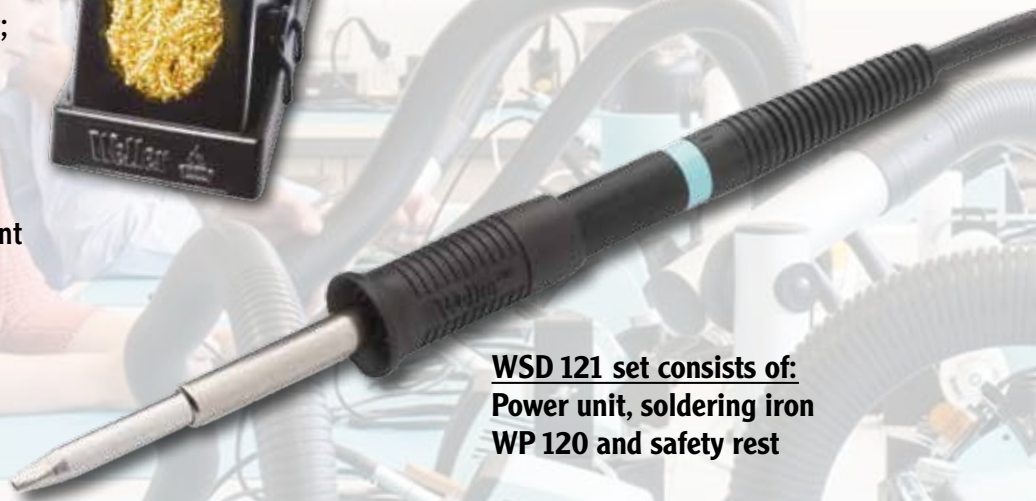

Weller long lasting heating element withstands tens of thousands of heating and cooling cycles.

Order No.:

T005 32 776 70

T005 32 763 70 (UK Version)

T005 32 765 70 (CH Version)

WSD 121 set consists of:
Power unit, soldering iron
WP 120 and safety rest

Back end of tip is recessed
to fit over heater

Pyramid shaped end
to maximize surface contact
with the tip

Silver heating
element

XT series tip

Tip barrel

WP 120 pencil
